

The Rise of Mašriqī and Mağribī Pedagogical Canons of the Qur'ānic Reading Traditions (*qirā'āt*): ca. 300–650 AH

2026-07-12

This study reframes the development of the *qirā'āt* discipline between the 4th and 7th centuries AH as the simultaneous emergence of two geographically delimited pedagogical canons—Mašriqī and Mağribī—rather than a single tradition punctuated by the interventions of exceptional individuals. The argument rests on a survey of documented *qirā'āt* works composed between the activity of Ibn Muğāhid (d. 324) and ca. 650 AH, together with the authors who produced them; the results are stored as a database and reproduced in the Appendices. Rigorous statistical analysis demonstrates that an author's region of origin, far more than scholarly mobility or work format, is the decisive predictor of preference between the Set of 7 and the Set of 10+ Readings. A century-by-century narrative reconstruction traces the divergent regional trajectories and correlates major inflection points with documented geopolitical events. An analysis of pedagogical practice shows the same divergence reproduced in titular vocabulary, in the architecture of paired curricular works, and in distinctive regional orientations toward didactic poetry and grammatical theory. Two appendices catalogue the underlying corpus: Appendix A presents the prosopography of *qirā'āt* authors with full biographical references, and Appendix B inventories the works on each Set of Readings.

تَبَدَّتْ لَنَا وَسَطُ الرُّصَافَةِ نَحْلَةً	تَبَدَّتْ لَنَا وَسَطُ الرُّصَافَةِ نَحْلَةً
فَقُلْتُ شَبِيبِي فِي التَّغْرِبِ وَالنَّوَى	فَقُلْتُ شَبِيبِي فِي التَّغْرِبِ وَالنَّوَى
نَشَأَتْ بِأَرْضِ أَنْتِ فِيهِ غَرِيبَةٌ	نَشَأَتْ بِأَرْضِ أَنْتِ فِيهِ غَرِيبَةٌ
تَمَاءَتْ بِأَرْضِ الْغَرْبِ عَنْ بَلَدِ النَّحْلِ	تَمَاءَتْ بِأَرْضِ الْغَرْبِ عَنْ بَلَدِ النَّحْلِ

1 Introduction

Geography has exerted a substantial influence on the historical development of the Qur'ānic Reading Traditions (*qirā'āt*).² For instance, the stemmatic analysis of the earliest available Qur'ānic codices, many dating to the first or early second century, indicates that, “Muslims had at their disposal regional orthographic data from at least five locations: Syria, Medina, Basra, Kufa, and Mecca.”³ By the fourth century, the geographer Abū 'Abd Allāh al-Maqdisī (or Muqaddasī, d. after 381) in his *Aḥsan al-taqāsīm fī ma'rifat al-aqālīm*, was able to describe all seven Ptolemaic geographic climes in terms of their knowledge of and adherence to specific Reading Traditions.⁴ Geography has continued to shape preferences for certain Reading Traditions into the present day at the population level, as in the prevalence in North Africa of the Reading of Nāfi' (d. 169 or 170), or the popularity in Sudan of the Reading of Abū 'Amr b. al-'Alā' (d. ca. 154).⁵ This paper extends this focus of inquiry by describing the geographically delimited, simultaneous development of two “canons” of *qirā'āt* literary production and pedagogy in the regions of the “Mašriq” and “Mağrib” from the beginning of the fourth century through the middle of the seventh.

This is not the first attempt to identify what differentiated the so-called “Mašriqī” and “Mağribī” systems of *qirā'āt* scholarship based on their acceptance of a given Set of Readings: the Set of 7, as represented in the Seven Readings

²The Arabic terms *qirā'āt* or *qirā'ah* are multivalent when used as a technical term, and are employed in the following ways throughout this article. A “Set of Readings” (e.g., *al-qirā'āt al-'ašr*) comprises a fixed number of such Traditions transmitted as a unit. A “(Qur'ānic) Reading Tradition” (*qirā'ah*) encodes the vocalized text of the entire Qur'ān in the rendition of a historical figure. Infrequently, “an individual variant” (*qirā'ah*) or “individual variants” (*qirā'āt*) appear in this article, referring to a specific point of disagreement in the various transmission pathways (*riwāyāt*, *ṭuruq*) of a Reading Tradition. “Qur'ānic Reading Traditions,” “Reading Traditions,” and *qirā'āt* when it modifies “discipline” are used interchangeably in the body of this text. This attempt at terminological clarification follows Shady Hekmat Nasser, *The Second Canonization of the Qur'ān (324/936): Ibn Mujāhid and the Founding of the Seven Readings* (Leiden: Brill, 2020), 5–9; idem, “The Canonizations of the Qur'ān: Political Decrees or Community Practices,” in *Non Sola Scriptura: Essays on the Qur'an and Islam in Honour of William H. Graham*, ed. Bruce Fudge et al, Routledge Studies in the Qur'ān 6 (New York: Routledge, 2022), 93–107, at 93n1.

described by Abū Bakr Ibn Muğāhid (d. 324) in his *K. al-Sab‘ah fī al-qirā’āt*; “a Set of 7+1,” referring to the addition of one additional Reading, almost always that of Ya‘qūb al-Ḥaḍramī (d. 205), to Ibn Muğāhid’s 7; and a “Set of 10+ Readings,” referring to some configuration Ibn Muğāhid’s 7 and of at least 3, and oftentimes many more, Readings.⁶ Perhaps the most forceful assertion of regional activity around a given Set of Readings coalescing into a “canon” is provided by the Mağribī sub-region of al-Andalus; scholarship on this region since at least the seminal work of Maḥmūd Makkī in the early 1960s has posited a unique and revolutionary period of disciplinary development around the Set of 7.⁷ Even earlier, Gotthelf Bergsträßer (d. 1933) and Otto Pretzl (d. 1941) traced a geographical route of the development of the Reading Traditions through a small number of key texts which are taken to represent successive stages in a process of continuous “canonization”: first, a group of works concentrating on the Set of 7 Readings by the Mašriqī Ibn Muğāhid’s *K. al-Sab‘ah*, followed by two Mağribī works, Abū ‘Amr ‘Uṭmān b. Sa‘īd al-Dānī’s (d. 444) *K. al-Taysīr*, Abū Muḥammad al-Šāṭibī’s (d. 590) *Ḥirz al-amānī wa-wağh al-tahānī*, known colloquially as *al-Šāṭibiyyah*; and then, a what could otherwise be termed a quantum leap to the Set of 10+ Readings, as represented in the various works of the late Mašriqī author Ibn al-Ġazarī (d. 833).⁸ Bergsträßer and

⁶For a schematic presentation of the Readers who populated these different Sets, refer to ‘Abd al-Wahhāb b. Wahbān al-Mizzī (d. 768), *Aḥāsīn al-aḥbār fī maḥāsīn al-sab‘ah al-aḥyār a’immat al-ḥamsah al-amṣār allaḍīna intaṣarat qirā’atuhum fī sā’ir al-aqṭār*, ed. Aḥmad b. Fāris al-Sallūm (Riyadh: Dār Ibn Ḥazm, 1425/2004), 484–87 (§ iḥṭilāf al-muṣannifīn tartīb ḥā’ulā’ al-sab‘ah). Consult further Christopher Melchert, “The Relation of the Ten Readings to One Another,” *Journal of Qur’anic Studies* 10, no. 2 (2008):73–87, at 74–75, and Christopher Melchert and Asma Afsaruddin, “Reciters of the Qur’ān,” *Encyclopaedia of the Qur’ān*, ed. Jane Dammen McAuliffe (Leiden: Brill, 2001–2006), 4.386–92, at 389–90. We note a specific difference between the Set of 7, and Sets of 7+1 and 10+ Readings. The Set of 7 Readings, represents, as far as is possible to establish, a group of Readers that does not depart that given by Ibn Muğāhid except possibly in terms of order of presentation. However, both the Sets of 7+1 and 10+ exhibit a degree of variability in the works of different authors, such that we refer to them as “a Set”, rather than “the Set”; and compare compare with Melchert’s concern (“The Relation of the Ten Readings to one another,” 75) to specify, with respect to the Set of 10+, that “although ‘the three after the seven’ [viz. Readings which distinguish a specific Set of 10 from Ibn Muğāhid’s Set of 7] is a useful expression, the concept postdates [Abū al-‘Izz] al-Qalānīsī [d. 521].” The extent of this variability is described in detail in the narrative description of the development of the Mašriqī and Mağribī corpora, below.

⁷Maḥmūd Makkī, “Ensayo sobre las aportaciones orientales en la España Musulmana,” *Revista del Instituto de Estudios Islámicos* (Madrid) 9–10 (1961–62):65–222, and *Revista del Instituto Egipcio de Estudios Islámicos* (Madrid) 11 (1963):7–140, *infra*. Compare with Angelika Neuwirth, “Koranlesung zwischen islamischen Ost und West,” in *Islām e Arabismo na Península Ibérica. Actas do XI Congresso da União Europeia de Arabistas e Islamólogos*, ed. Adel Sidarus (Évora, Portugal: Universidade de Évora, 1986), 305–16, at 308–9, describing the reception of Ibn Muğāhid’s “canonical” materials and their elaboration over the course of the fifth century, and elsewhere (ibid, 315–16) specifying the number of “canonical readers at no fewer than ten.” For a further references to scholarship on the Reading Traditions in al-Andalus, especially those written in Spanish, see now Cristina de la Puente, “Studies on the Transmission of ‘Qur’ānic Readings’ (*Qirā’āt*) in al-Andalus,” *Asian Research Trends*, New Series 6 (2011):51–63; and Abdenour, Padillo Saoud, “Novedades sobre las lecturas coránicas en al-Andalus,” *Alhadra* 3 (2017):185–209. The bibliographies of both of these latter works have been foundational for my understanding of the current state of scholarship on the *qirā’āt* in al-Andalus, and the works they refer to are also cited throughout the present essay.

⁸Gotthelf Bergsträßer and Otto Pretzl, “Die Geschichte des Korantexts, Zweites Kapitel: Die Lesung,” in *Geschichte des Qorāns, Teil 3*, ed. Theodore Nöldeke, second revised edition (Leipzig: Dietrich, 1938), 205–48, in English as “Literature of the Variant Readings,” in *The History of the Qur’ān*, tr. Wolfgang Behn, Text and Studies on the Qur’ān 8 (Leiden: Brill, 2013), 471–504, hereafter cited as *GdQ*

Pretzl further noted developments within the *qirā’āt* discipline which depended on geographic considerations, such as their remarks that, “in the Maghreb, in Egypt, and also in Syria, the Seven or Eight readings were widespread, [but] the East produced a greater number of works on the *qirā’āt* of the Ten [Readers]”;⁹ or that the introduction of *al-Šāṭibīyyah* into the Mašriq (at an unspecified date), “represents the repercussions of the Spanish science of the variant readings on the East.”¹⁰ Following closely on these latter results, a number of scholars have sketched out a similar course of a regionally-based development within the *qirā’āt* discipline from a canon of 7 Readings to 10+, including Muḥammad al-Muḥtār Walad Ubbāh in his monograph *Tārīḥ al-qirā’āt fī al-Mašriq wa-l-Mağrib*, and Shady Hekmat Nasser in a number of publications; Nasser, in particular goes so far as suggest that “it might be appealing to assume that there existed two separate traditions between the eastern and western regions of the Islamic empire.”¹¹

Despite his tacit acknowledgement of regional variation in shaping the *qirā’āt* discipline, Nasser’s studies bear further remark for their argument that additional factors proved more decisive for the formation of a *qirā’āt* canon. On this point, he is unequivocal: “Our understanding and knowledge of the variant readings of the Qur’ān are limited by what the religious and political institutions of the Islamic world, since Ibn Mujāhid’s time until today, force us to think as canonical and standard.”¹² By “religious institutions,” Nasser appears to mean pedagogical fora that sustained the transmission of the Reading Traditions, as in his discussion of “the phenomenal spread and success of student manuals of *at-Taysīr* and *ash-Shāṭibīyyah*,” which “overshadowed” other *qirā’āt* works of their day and age because of their popularity as curricular documents, or their authors’ placement in prestigious

according to the German and English texts. The third part of the second, revised edition of *GdQ* departs much more substantially from Nöldeke’s original than the first two parts, and so we credit Bergsträßer and Pretzl accordingly for the formulations therein. Mentions of “canonical” or “canon” are discussed extensively with reference to Ibn Muğāhid beginning at *GdQ*, 3.210/550, and subsequently for al-Dānī, at *GdQ*, 3.215/554.

⁹Bergsträßer and Pretzl, *GdQ*, 3.225/562. Compare with Nasser, *The Transmission of the Variant Readings of the Qur’ān*, 64; and idem, “The Canonizations of the Qur’an,” 101, who notes “In the eastern part of the Islamic world, the manuals of *Qirā’āt* did not stop at seven Readings. Works on 8, 9, 10, and up to 14 eponymous Readings were frequently authored”

¹⁰Bergsträßer and Pretzl, *GdQ*, 3.219/558.

¹¹Muḥammad al-Muḥtār Walad Ubbāh, *Tārīḥ al-qirā’āt fī al-Mašriq wa-l-Mağrib* (Salé, Morocco: Manšūrāt al-Munazzamah al-Islāmiyyah li-l-Tarbiyah wa-l-‘Ulūm wa-l-Taḳāfah [UNESCO], 1422/2001), especially 187–246 (§ Madrasat al-Qayrawān wa-ta-tīrūhā fī al-Andalus), 249–342 (§ al-madrasah al-Andalusiyyah), 345–423 (§ ‘aṣr al-taṭbīt wa-l-takmīl bayna al-Andalus wa-l-Šarq). Compare with Shady Hekmat Nasser, “The Two-*Rāwī* Canon before and after ad-Dānī (d. 444/1052–3),” where the given quote appears at 72; idem, *The Second Canonization of the Qur’ān*, 5–9; and idem, “The Canonizations of the Qur’ān,” 97–107.

¹²Nasser, “The Two-*Rāwī* Canon before and after ad-Dānī (d. 444/1052–3),” 74.

institutions, as with al-Šāṭibī's occupation in 572 of the chair of *qirā'āt* studies at al-Madrasah al-Fāḍiliyyah in Cairo, or Ibn al-Ğazarī's evident "pedagogical [...] success in popularizing his own series of didactic poems on the Set of 10 Readings."¹³ More forcefully, he argues across a series of studies and encyclopaedia articles for the decisive intervention of "political institutions" during a multi-step process of canonization, at each stage involving intrigue between a number of actors: a conspiracy between Ibn Muğāhid and highly placed representatives of the tottering Abbasid bureaucracy to prosecute a series of trials against the "noncanonical" readings of Ibn Šanabūd (d. 328) and Ibn Miqsam (d. 354); al-Dānī, who sought out in Dāniyah the patronage of the newly installed warlord ruler, Abū al-Ğayš Muğāhid (re. 405–436), whom Ibn Ḥaldūn (d. 808) apparently identifies as responsible for "transforming Dāniya into a centre of *Qirā'āt* studies";¹⁴ and Ibn al-Ğazarī, whom Nasser credits with "an active political life and connections with major jurists of the time [who] played an important role in imposing his authority in the field," such as Tāğ al-Dīn al-Subkī (d. 771), from whom he obtained a *fatwā* "acknowledging the ten canonical Readings—not only the seven—[as] a fundamental, necessary element of religion," and who moreover "changed patrons and switched political sides to augment his power and prestige."¹⁵

Nasser and others who argue for the institutional design of the *qirā'āt* discipline have constructed a remarkably coherent narrative of its development, one which invokes distinctive pedagogical practices tied to the transmission of the Reading Traditions, while emphasizing the "top-down" reach of political authorities above all else. Whereas the identification of the pedagogical element in the constitution of the *qirā'āt* discipline is persuasive, the portions of this narrative that appeal to the intervention of political authorities do not stand up to scrutiny. Objections to each of the instances that Nasser cites as constitutive of "canonizations" of the contents of the Reading Traditions,

¹³For al-Šāṭibī, see Nasser, "The Two-*Rāwī* Canon before and after ad-Danī (d. 444/1053–4)," 74; and in idem, "The Canonizations of the Qur'an," 103, where he argues that both *al-Šāṭibiyyah* and another work which versified an original work by al-Dānī on the consonantal text (*rasm*) of the Qur'ān, entitled '*Aqīlat atrāb al-qaṣā'id fī asnā al-maqāṣid*,' "became stable textbook manuals in different schools and *madrasas*, where it is common to read in the biographies of scholars that they studied, heard, or memorized both works (*al-shāṭibiyyatān*) as part of their academic training." For his academic appointment, see Angelika Neuwirth, "al-Šāṭibī," *EI2*. See also Nasser, "The Canonizations of the Qur'an," 106, discussing the influence of Ibn al-Ğazarī's didactic poems, entitled *al-Durrah al-muḍiyyah fī al-qirā'āt al-ṭalāt al-marḍiyyah* (a *rā'iyyah* in the *tawīl* meter composed in emulation of *al-Šāṭibiyyah*); *Ṭayyibat 'al-Naṣr fī al-qirā'āt al-'aṣr*, in which he compressed his *K. Naṣr al-qirā'āt al-'aṣr*; and *al-Muqaddimah al-Ğazariyyah fī al-tağwīd*, respectively.

¹⁴Nasser, "The Canonizations of the Qur'an," 102. See further on the ruler David J. Wasserstein, "Mudjāhid," *EI2*, and note 21, below.

¹⁵Nasser, "The Canonizations of the Qur'an," 105–6; idem, "Ibn al-Jazarī," *EI3*.

as well as his lack of a formal conception of a “canon,” can be stated as follows.

First, the connection between Ibn Muğāhid's publication of *K. al-Sab'ah* and the aforementioned trials of Ibn Šanabūd and Ibn Miqsam is tenuous at best, as has been stated and reiterated by Christopher Melchert in a number of publications.¹⁶ Several of Melchert's articles respond directly to Nasser, even going so far as to call his attempts to connect Ibn Muğāhid's support for (or limitation to) Seven Readings and the aforementioned trials as “clearly wrong.”¹⁷ Next, Ibn Ḥaldūn represents an insufficient authority for identifying Dāniyah as a “center of *qirā'āt* studies” independent of the activity of al-Dānī. This is especially true when one considers the objectives of the nascent *tā'ifah* state, which placed a demonstrably greater emphasis on achieving diplomatic victories through piracy than supporting the publication of *qirā'āt* works.¹⁸ Finally, Ibn al-Ğazarī's solicitation of a *fatwā* from Tāğ al-Dīn al-Subkī cannot be interpreted as an act of state: the Mamlūk-era practice of *futyah*, according to David S. Powers, “remained a private activity performed independently of state control.”¹⁹

In addition to these objections, one may also criticize Nasser's failure to define what a “canon” is, what it does,

¹⁶Christopher Melchert, “Ibn Muğāhid and the establishment of the Seven Qur'anic Readings,” *Studia Islamica* 91 (2000):5–22 noting at 21–22, that, “No account of Ibn Miqsam's trial mentions the Seven of Ibn Muğāhid. Rather all accounts stress the issue of interpreting the consonantal outline and departing from the received tradition. Likewise, no account of Ibn Shannabūd's [sic] trial mentions the Seven. Rather, all accounts stress the issue of rare variants, shawādh, his [viz. Ibn Šanabūd] own confession the issue of non-ʿUṣmānic variants in particular. If these trials had amounted to endorsements of Ibn Muğāhid's Seven, no later scholars should have proposed a different set of acceptable readings.”; idem, “The Relation of the Ten Readings to one another,” *Journal of Qur'anic Studies* 10, no. 2 (2008):73–87, at 81, mentioning the salient issue at the trial of Ibn Miqsam as the creative grammatical readings of the consonantal text of the Qur'ān; idem, the “Variant Readings in Islamic law,” *JQSA* 7 (2022):7–25, at 21–23; and idem, “Variant Qur'anic Readings before and after Ibn Muğāhid,” *JQSA* 10, no. 1 (2025):173–208, at 208 stating, “What the state enforced at the trials of Ibn Miqsam and Ibn Shannabūd [sic] was not a recent innovation, Ibn Muğāhid's identification of seven authoritative readings. Rather, the state enforced a fairly longstanding consensus against coming up with new readings on the sole basis of grammar and reason in the one case [viz. Ibn Miqsam], against reciting non-ʿUṣmānic Companion readings in the other [viz. Ibn Šanabūd].”

¹⁷Melchert, “The Relation of the Ten Readings to one another,” 23, stating: “He [viz. Nasser] is clearly wrong, anyway about state recognition of Ibn Muğāhid's set of Seven Readings,” and referring to his earlier article, “Ibn Muğāhid and the Establishment of the seven Qur'anic Readings”

¹⁸For a basic overview of the history of the city in this period, consult the references in Jaume Galiana Llorca, “La Taifa de Denia,” *Revista UNAILA* 38 (2018):255–72. A much fuller description of the political, intellectual, and material conditions of the *tā'ifah* of Dāniyah has been published in Francisco Franco-Sánchez and Josep A. Gisbert Santonja, eds., *Dénia. Poder i el mar en el segle XI: El regne taifa dels Banū Muğāhid / Dénia. Poder y el mar en el siglo XI: El reino taifa de los Banū Muğāhid* (Alicante: Universidad de Alicante, Servicio de Publicaciones, Dénia, Ajuntament de Dénia, Madrid: Instituto Egipcio de Estudios Islámicos en Madrid, 2019). For the *tā'ifah* policy of piracy, see especially Travis Bruce, “Piracy as Statecraft: The Mediterranean Policies of the Fifth/Eleventh-Century Taifa of Denia,” *Al-Masāq* 22, no. 3 (2010):235–48. More positively, Muğāhid also appears to have supported the career of Abū al-ʿAbbās al-Mahdawī (d. ca. 440), specifically his composition of the *muḥtaṣar* of his large *tafsīr*, indicating that martial and intellectual objectives were not mutually exclusive. I am grateful to Conor Dube for providing nuance to my understanding of this circumstance.

¹⁹David S. Powers, “Fatwā, premodern,” *EI3*. He also notes, concerning the issuing practice of *futyah* in North Africa, that, “beginning in the ninth/fifteenth century, large collections began to appear in the Islamic West that brought together *fatwās* issued by *muftīs* in a specific region or city, in an effort to provide a comprehensive view of the legal tradition in that area. See further the remarks in Melchert, “The Variant Readings in Islamic Law,” 22–23, referring to al-Subkī's *fatwā* as “an advisory opinion as opposed to a *qāḍī*'s binding *ḥukm*.”

or the criteria needed to determine its existence.²⁰ Similarly, Nasser, who only considers two Sets of Readings in the development of the *qirā'āt* discipline—Ibn Muğāhid's Seven, and a set of 10 Readings, the latter of which are primarily represented in the works of Ibn Mihrān (d. 381) as well as a small number of other Mašriqī authors—fails to account for the full range of possible canonical configurations. Rather, his formulation of the problem neglects the well known phenomenon of the publication of works on the Set of 7+1, a development noted as early as 1860 by Theodor Nöldeke (d. 1930) in the first edition of *Geschichte des Qorāns* and subsequently elaborated upon by Pretzl in his seminal 1936 survey of *qirā'āt* literature.²¹ Moreover, as Melchert rightly notes, Nasser's characterization of Ibn Mihrān's publication of works on the Set of 10 Readings as in his *K. al-Mabsūt* (or 11, in the case of his *K. al-Ġāyah*) as an attempt “to add more readings to the canonical Seven [...] assumes that a canon of seven had been established before him, which needs demonstration.”²²

The demonstration of the “canonicity” of one or another Set of Reading Traditions is not beyond the grasp of modern scholarship. The study of the formation, maintenance, and deactivation of canons represents a vast humanistic pursuit, and scholars from many fields have published well-formulated models which could be applied to the case of the *qirā'āt*.²³ Within the domain of Islamic Studies a variety of these models have already been implemented

²⁰The failure to appropriately formulate these questions with respect to scholarship on the Hebrew Bible is addressed in Eugene Ulrich, “Ch. 17: The Notion and Definition of Canon,” in *The Dead Sea Scrolls and the Developmental of Composition of the Bible*, Vetus Testamentum Supplements 169 (Leiden: Brill, 2015), 265–79.

²¹For the identification of Ya'qūb's Reading as an addition to Ibn Muğāhid's Seven Readings, see Theodor Nöldeke, *Geschichte des Qorāns* (Göttingen: Verlag der Dieterichschen Buchhandlung, 1860), 338 (§ Dritter Theil. Geschichte des 'Otmānischen Qorāntextes – Geschichte der lesarten vom 5ten bis 9ten Jahrh. [...]); and Otto Pretzl, “Die Wissenschaft der Koranlesung ('ilm al-qirā'ah), ihr literarischen Quellen und ihr Aussprachegrundlagen (uṣūl),” *Islamica* 6 (Leipzig):1–47, 230–46; a third section of this paper, 290–331, describes further elements of the Reading Traditions beyond the production of works of the three Sets of Readings described here. The development of the Set of 7+1 Readings is described in more concrete terms in the narrative analysis, below.

²²Melchert, “The Variant Readings in Islamic Law,” 22.

²³Reference to the vast literature on canons is impossible, and the following titles gesture toward what the author views to be significant landmarks in the field. For an extensive overview of the various ways in which the term canon has been employed, see Gabrielle Rippl and Simone Winko, eds., *Handbuch Kanon und Wertung: Theorien, Instanzen, Geschichte* (Stuttgart: J.B. Metzler'sche Verlagsbuchhandlung, 2013). Studies which have substantially informed the author's own approach to the study of the canon include: J.Z. Smith, “Sacred persistence: Towards a redescription of the canon,” in *Approaches to Ancient Judaism: Theory and Practice*, ed. William Scott Gree, Brown Judaic Studies 1 (Missoula, MT: Scholars Press, 1978), 11–28; Aleida Assman and Jan Assmann, eds., *Kanon und Zensur: Beiträge zur Archäologie der literarischen Kommunikation II* (Munich: Wilhelm Fink Verlag, 1986); Arie van der Kooij and Karel van der Toorn, eds., *Canonization and Decanonization: Papers Presented to the International Conference of the Leiden Institute for the Study of Religions (LISOR), held at Leiden 9–10 January 1997*, Studies in the History of Religions 82 (Leiden: Brill, 1998); Hindy Najman, “The Vitality of Scripture within and beyond the Canon,” *Journal for the Study of Judaism* 43 (2012):497–518; Damied Agut-Labordère and Miguel John Versluys, eds., *Canonization as Innovation: Anchoring Cultural Formation in the First Millennium*, Euhormos: Greco-Roman Studies in Anchoring Innovation 3 (Leiden: Brill, 2022); and Rebecca Scharbach Wollenberg, *The Closed Book: How the Rabbis Taught the Jews (Not) to Read the Bible* (Princeton: Princeton University Press, 2023).

with impressive results for a number of sub-disciplines, including: *ḥadīṭ*,²⁴ *fiqh* (law),²⁵ and Arabic and Persian literature.²⁶ The canonization of the Qur'ānic text, especially the establishment of the now-standard 'Uṣmānic *muṣḥaf*, has also generated considerable scholarly interest, given its direct relation to the study of the transmission of vital cultural information within early Islamic societies, in this case: the literal Word of God. In this regard, several recent comparative, material, and theoretical studies of the fixing and spread of this document in the first Islamic centuries have generated new and useful insights into various aspects of the historical question of the canonization of the Qur'ānic text.²⁷ In this spirit, Nasser's attempt to make the contents of the Reading Traditions with the concept of "canon" salient for the Reading Traditions is laudable, although his results instead highlight a clear need to engage more deeply with the available empirical data and theoretical models in order to realize this ambition.

²⁴The publications of Jonathan A.C. Brown remain the major intervention in this regard. Consult primarily Jonathan A.C. Brown, "Criticism of the Proto-Hadith Canon: al-Dāraqūṭnī's Adjustment of the *Ṣaḥīḥayn*," *Journal of Islamic Studies* 15, no. 1 (2004):1–37; "Ch. 2: The Study of Canons and Canonization," in *The Canonization of al-Bukhārī and Muslim: The Formation of the Sunnī Ḥadīṭ Canon*, Islamic History and Civilization Studies 69 (Leiden: Brill, 2007), 20–46; and "The Canonization of Ibn Mājah: Authenticity vs. Utility in the Formation of the Sunni Ḥadīṭ Canon," *Revue des mondes musulmanes et de la Méditerranée* (REMM) 129 (2011). doi:<https://doi.org/10.4000/remmm.7154>. See further on the "canonization" non-*Ṣaḥīḥ* works of *ḥadīṭ* in Garrett Davidson, *Carrying on the Tradition: A Social and Intellectual History of Hadith Transmission across a Thousand Years*, Islamic History and Civilizations Studies and Texts 160 (Leiden: Brill, 2020); for the contribution of the commentarial tradition to the canonization of this material, see Joel Blecher, *Said the Prophet of God: Hadith Commentary across a Millennium* (Berkeley and Los Angeles: University of California Press, 2018). Consult further the references in Stijn Aerts, "Canon and canonisation of ḥadīṭ," *EI3*.

²⁵In addition to the seminal work of Brannon M. Wheeler, *Applying the Canon in Islam: The Authorization and Maintenance of Interpretive Reasoning in Ḥanaḥī Scholarship* (Albany, NY: SUNY Press, 1996), see now the extensive theoretical treatments and bibliographies provided in Gudrun Krämer and Sabine Schmidtke, "Introduction: Religious Authority and Religious Authorities in Muslim Societies. A Critical Overview," in *Speaking for Islam: Religious Authorities in Muslim Societies*, ed. Gudrun Krämer and Sabine Schmidtke (Leiden: Brill, 2006), 1–14; and Eirik Hovden, "Understanding and Framing Change in Islamic Law: Potential and Possible Pitfalls of the Concepts of Canonization and Codification," *Oxford Journal of Law and Religion* 12, no. 3 (2023):289–313.

²⁶For Arabic, consult Muhsin J. Musawi, "Canons, thefts, and palimpsests in the Arabic literary tradition," *Journal of Arabic Literature* 51, no. 2 (2020):165–88; and further the references in G.J.H. van Gelder, "Canon and canonization in Classical Arabic literature," *EI3*. The intersection of the Qur'ān, Arabic literature writ large, and "the canon," is treated in a diffuse way in Aziz el-Azmeh, "The Muslim canon from Late Antiquity to the Era of Modernism," in *Canonization and Decanonization*, ed. A. van der Kooij and K. van der Toorn, 173–228; and more focusedly in Bruce Fudge, "Qur'an, Canon, and Literature," in *Sacred Tropes: Tanakh, New Testament, and Qur'an as Literature and Culture*, ed. Robert Sabbath, Biblical Interpretation Series 98 (Leiden: Brill, 2009). For the development of a Persian literary "canon," see the initial remarks in E.A. Poliakova, "The Development of a literary canon in medieval Persian chronicles: The Triumph of etiquette," *Iranian Studies* 17.2–3 (1984):237–56.

²⁷For the comparative perspective, see especially Rein Ferhouth, *Canonical Texts: Bearers of Absolute Authority: Bible, Koran, Veda, Tipitake: A Phenomenological Study*, tr. Henry Jansen and Lucy Jansen Hofstad (Amsterdam: Rodopi, 1994), and Angelika Neuwirth, "Vom Rezitationstext über die Liturgie zum Kanon: Zu Entstehung und Wiederauflösung der Surenkomposition im Verlauf der Entwicklung eines islamischen Kultus," in *The Qur'ān as Text*, ed. Stefan Wild, Islamic Philosophy, Theology and Science – Text and Studies 27 (Leiden: Brill, 1996), 69–106. On material studies, see Marijn van Putten, "'The Grace of God' as evidence for a written Uṣmānic archetype: The importance of shared orthographic idiosyncrasies," *BSOAS* 82, no. 2 (2019):271–88, which consciously avoids the application of the term "canon" to this process; Sidky, "On the Regionality of Qur'ānic Codices"; Hamdan, *Der Koran als Kodex*; and Vahidnia, "Whence Come Qur'ānic Codices?" For theoretical approaches, consult Tilman Seidensticker, "Koran," in *Heilige Schriften: Eine Einführung*, ed. Udo Tworuschka (Darmstadt, Germany: Wissenschaftliche Buchgesellschaft, 2000), 111–30; François Déroche, *La voix et la calame. Les chemins de la canonisation du Coran* (Paris: Collège de France and Fayard, 2016), and Aziz el-Azmeh, "Canon and canonisation of the Qur'an," *EI3*.

The remainder of this paper proceeds toward a description of what Asma Sayeed and Nour-Eddine Qaouar have called a “pedagogical canon,” defined here as: “a corpus chosen and reproduced by actors and institutions within a given intellectual discipline in order to ensure the continuity and stability of domain-specific knowledge.”²⁸ As stated above, we argue that discipline of *qirā’āt* evinces two geographically delimited systems which meet this definition of a pedagogical canon: one comprising the lands of the Egyptian Delta westward, referred to as “the Mağrib,” and the other comprising the Trans-Jordan and areas northward as well as the eastern coast of the Red Sea eastward as “the Mašriq.”²⁹ Although the scope of our claims requires a high burden of proof, we believe that it can be met by implementing the following approach.

First, we provide a survey of documented *qirā’āt* works with a demonstrable association to a Set of Readings that were produced between the period of Ibn Muğāhid’s activity, roughly from the beginning of the fourth century, until approximately 650, as well as their authors; the results of this survey appear in the attached Appendices. Although the start and cutoff date of this survey implicate geopolitical institutions and events, this was not the defining force which shaped the *qirā’āt* discipline. To show that it was geography, and not some other factor, which defined the boundaries of the transmission of the Reading Traditions, we use a Bayesian statistical modeling process to quantify the effect that an author’s place of birth exerted over their preference for a given Set of Readings. We then provide a narrative account of the century-by-century development of the *qirā’āt* corpus in each of the Mašriq and Mağrib, mapping key actors and institutions which ensured the continuity and stability of the *qirā’āt* corpus, as well as noting striking features of the *qirā’āt* authors as individuals and as a community. Finally, we turn to the pedagogical aspects of the *qirā’āt* discipline which sustained the vitality of these two canons, and identify region-specific practices which shaped the independent development of the Mašriqī and Mağribī corpora of the Reading Traditions for over three and a half centuries.

²⁸The wording is original to the author. For a slightly more diffuse formulation of the concept and an excellent case study, see Asma Sayeed and Nour-Eddine Qaouar, “Mastering Mālikī Law: A Moroccan Case Study,” *Oxford Journal of Law and Religion* 12, no. 3 (2023):455–78. We engage more deeply with the arguments of this publication in the appropriate section on pedagogy, below.

²⁹On the difficulties of mapping the extent of these two regional areas, see now Giovanna Calasso, “Constructing the Boundary between Mashriq and Maghrib in Medieval Muslim Sources,” in *The Maghrib in the Mashriq: Knowledge Travel and Identity*, ed. Maribel Fierro and Mayte Penelas, *Studies in the History and Culture of the Middle East* 40 (Berlin: Walter de Gruyter, 2021), 35–78. We believe that the boundary established here provides remarkably strong proof of the analytical utility of this operation.

2 Data and Methods

The historical development of competing Sets of Reading Traditions can only be traced through the works that transmit them and the authors who produced them. Accordingly, the relevant evidence gathered for this study is primarily bio-bibliographic, implicating the use of methods from the closely related fields of bibliography: “the discipline that studies texts as recorded [material] forms, and the processes of their transmission, including their production and reception”; and prosopography, or collective biography, in this case concerning the temporally and geographically extensive community of agents who recorded and disseminated the content of the Reading Traditions in material forms. This paper contributes to the growing body of “bibliometric” research within these two fields, comprising both traditional and computational approaches, which seeks to study the development of intellectual disciplines as expressed through their production of literary artifacts.³⁰

The results of the survey are available in the Appendices, which are reproduced online as a searchable database along with an explanation of the technical methods of analysis used herein in order to supplement the materials presented in the main text of this paper.³¹ In compiling the corpus, Omar Hamdan’s bio-bibliographical surveys of *qirā’āt* works and authors spanning the second through ninth centuries serve as a primary reference. Therein, Hamdan unites the bibliographic data on *qirā’āt* found in four major sources: Ibn al-Nadīm’s (d. 380) *al-Fihrist*, al-Dānī’s *Ġāmi‘ al-*

³⁰For the definition of bibliography, see D.F. McKenzie, *Bibliography and the sociology of texts* (Cambridge: CUP, 1998), 12. A parallel approach, termed “social codicology,” has been elaborated in Olly Ackerman, *Social Codicology: The Multiple Lives of Manuscripts in Muslim Societies*, Leiden Studies in Islam and Society 21 (Leiden: Brill, 2025). For bibliometrics, especially for their relevance to the study of the growth of intellectual disciplines, consult the references in Ioannis Passas, “Bibliometric Analysis: The Main Steps,” *Encyclopedia* 4, no. 2 (2024):1014–25. doi:<https://doi.org/10.3390/encyclopedia4020065>. Prosopography, bibliography, and bibliometrics have a long history in the field of Islamic Studies, broadly conceived. For prosopography in Arabic, consult the references in Claude Gilliot, “Prosopography in Islam: An Essay of Classification,” *Medieval Prosopography* 23 - Arab-Islamic Medieval Culture (2002):19–54. For the rich history of digital approaches, see Carmen Escribano Ródenas and Juan Martos Quesada, “Los itinerarios de aprendizaje exterior de los intelectuales Hispano-Musulmanes: estudio estático,” in *Science and Technology in the Islamic World* 21 - *Proceedings of the XXth International Congress of History of Science (Liège, 20–26 July 1997)*, ed. S.M. Razaullah Ansar, De Diversis Artibus (Turnhout, Belgium: Brepols, 2002):43–63; Maxim Romanov, “Digital Analysis of Arabic Biographical Collections,” *Comparative Oriental Manuscript Studies Newsletter* 4 (2012):9–11; idem, “Algorithmic Analysis of Medieval Arabic Biographical Collections,” *Spæculum* 92, no. 1 (2017):226–46. doi:<https://doi.org/10.1086/693970>; and Abdurrahman Atçil, Salih Günaydin, Gürzat Kamî, Abdullah Karaarslan, “Building a Digital Tabaqat: Challenges, Opportunities and Research Prospects,” *Journal of the Ottoman and Turkish Studies Association* 9, no. 2 (2022):243–66. On digital approaches to studying the circulation of premodern Arabic books, see now Nadine Löhr, “Off the Record: On Studying Lost Arabic Books and their Networks,” *medieval worlds: comparative & interdisciplinary studies* 18 (2023):219–45. doi:https://doi.org/10.1553/medievalworlds_no18_2023s219.

³¹Author, “The Mašriqī and Mağribī Pedagogical Canons of Qur’ānic Reading Traditions Exploring the Development of the Classical *qirā’āt* Corpus.” (2026). URL:<https://019bd312-18b3-e74e-7e13-e30ed530a9bb.share.connect.posit.cloud/>

bayān fī al-qirā’āt al-sab‘, al-Ḍahabī’s (d. 748) *Ma’rifat al-qurrā’ al-kibār (MQK)*, and Ibn al-Ġazarī’s (d. 833) *Ġāyat al-nihāyah (ĠN)*, adding considerably to the seminal bibliography of *qirā’āt* published by Otto Pretzl more than 90 years ago.³² To ensure comprehensive coverage of both the Mašriqī and Mağribī regions, the present study supplements Hamdan’s findings, which are particularly robust for the Mašriq, with the bibliography of Andalusī *qirā’āt* literature documented in two related databases, *Historia de los Autores y Transmisores Andalusies (HATA)* and *Prosopografía de los ulemas de al-Andalus (PUA)*, as well as other sources cited in the Abbreviations table in the Appendices.³³ The bio-bibliographic data compiled over the course of this survey are subject to additional statistical analyses, the foundations of which are described in technical detail in the aforementioned online supplementary materials, and which will be reviewed in non-technical terms when they are introduced in the following sections.

Encoding biographical data (Authors)

Each author is coded for three primary variables: regional origin (macro-region and sub-region), mobility (whether there is a record of travel between the Mašriq and the Mağrib), and death century.³⁴ For twenty of the 105 authors in the corpus (19%), the sources record only approximate death dates; that is, a date qualified by terms such as “around,” (*hawla, naḥwa*) “before,” (*qabla*) or “after” (*ba’d*) a given year. As a result, each author was assigned a value for death century rather than a precise death year, which allows for grouping authors of roughly common eras with which to measure change in production over time.

Regional origin refers, in general, to the macro-region in which a given author was born and principally active.

³²The most accessible coverage of the period described here appears in Omar Hamdan (‘Umar Ḥamdan), *Mu’ğam mušannafāt ‘ulūm al-Qur’ān al-Karīm* (Beirut: Dār Ibn Ḥazm, 1439/2018), which is supplemented, with laudable detail, by idem, *Adab ‘ilm al-qirā’āt* (= *Die Fachliteratur der Koranlesungen*), ed. Taghrid Hamdan (Tübingen: Lehrstuhl für Koranwissenschaften Zentrum für islamische Theologie - Eberhard Karls Universität Tübingen, 1445/2023). For the editions of the classical sources used in this study, consult the Abbreviations Table in the Appendices.

³³Maribel Fierro, ed., *Historia de los Autores y Transmisores Andalusies*. 2019—. URL:<https://www.eea.csic.es/red/hata/index.html>; and María Luisa Ávila et al, eds., *Prosopografía de los ulemas de al-Andalus*. 2007—. URL:<https://www.eea.csic.es/pua/index.php>.

³⁴On the study of mobility in Islamic societies, generally, see Kuroki Hidemitsu, ed., *The Influence of Human mobility on Muslim Societies* (London: Routledge, 2003); and Richard Gale, “The Place of Islam in the Geography of Religion: Trends and Intersections,” *Geography Compass* 1.5 (2007):1015–36. doi:<https://doi.org/10.1111/j.1749-8198.2007.00054.x>. On mobility as a feature of an entire epoch, see Stephan Conermann, ed., *Everything is on the Move: The Mamluk Empire as a Node in (Trans-)Regional Networks* (Göttingen: V & R Press in association with Bonn University Press, 2014).

For Andalusī authors, geographic and mobility data were drawn from the *PUA* database; for all other authors, the requisite data were drawn from Ibn al-Ğazarī’s *ĠN*, and supplemented where absent by *MQK* or other bio-bibliographic works. Table 1 lists the sub-regions and principal cities used in this analysis.

Table 1: Macro- and sub-regions used in the geographic coding of authors

Macro-region	Sub-region	Principal cities
Mašriq	al-‘Irāq	Baġdād, Wāsiṭ
	al-Šām	Dimašq, Ḥalab
	Ğibāl-Ṭabaristān	Hamaḍān, Iṣbahān
	Ḥurāsān	Nīsābūr
	Fārs	Šīrāz
	al-Ḥiġāz	Makkah
Mağrib	al-Andalus	Qurṭubah, Iṣbīliyyah
	Ifriqiyah	al-Qayrawān
	Egypt ³⁵	Cairo, al-Iskandariyyah

Additionally, authors in the corpus are classified by their recorded itineraries as either stationary—active only in their region of origin—or inter-regional—attested as having traveled between the Mašriq and the Mağrib. For all individuals, the total number of recorded stops in *ĠN* and *MQK* was also tallied as a rough index of the extent of a given figure’s mobility. An intermediate form of mobility, where a given author leaves his sub-region of origin, but does not travel beyond the macro-region (e.g., the Ifriqī authors who traveled to al-Andalus or Egypt) could be described colloquially as “infra-regional.” In general, we have refrained from making overly-broad statements

³⁵We use the single, English appellations of “Cairo” and “Egypt”, rather than an Arabic equivalent, because the settlement at the modern site of Cairo was referred to in classical sources by various names; the sources nearly universally refer to “Miṣr,” rarely to “Fustāt,” even for figures who were active primarily after the establishment of “*miṣr al-Qāhirah*” in 359/970 by the Fatimid dynasty.

about regional developments based on this last type of mobility so as not distract from the focus of this essay, which is differentiating patterns of literary production in the Mašriq as a whole versus the Mağrib as a whole. Full biographical references for authors are provided in Appendix A.

Encoding bibliographic data (Works)

Each work in this survey is classified according to three broad criteria: association with a Set of Readings, format, and survival status.

In establishing an association with a set of Readings (7, 7+1, 10+), we follow the seminal categories identified by Pretzl. Such associations are determined through titular references (e.g., *K. al-Sab‘ah fī al-qirā’āt, al-Taḍkirah fī al-qirā’āt al-ṭamān, al-Ġāyah fī al-qirā’āt al-‘ašr*) or specific bibliographic evidence, such as a later authority’s designation of a specific set to a lost title; e.g., Ibn al-Ġazarī’s identification of Ibn Šīṭā’s (d. ca. 450) *K. al-Taḍkār fī al-qirā’āt al-‘ašr* as containing 10 Readings.

Works were also classified by how their contents were formatted, constituting the most substantial amount of bibliographic variety to encode. The first and best-represented category in our survey is the “descriptive catalogue”: a reference work presenting variant readings in Qur’ānic order, e.g. Ibn Muğāhid’s *K. al-Sab‘ah*. Next is the *mufradah*, a monograph on the specific readings associated with a single Reader. A third format is didactic poetry, in which information about the Reading Traditions is supplied according to a designated poetic meter (*baḥr*). A final class of works are grouped together on the basis of their implication with “text reuse,” or an author’s implicit or explicit reproduction in his own work of material from another written source.³⁶ The primary formats that exhibit text reuse are: “expansions” (e.g., *šarḥ*) that elaborate upon an earlier work, and “compressions” (e.g., *muḥtaṣar, iḥtiṣār*) that abridge one; a significant proportion of didactic poetry also qualifies for this label, insofar as it can be established

³⁶On the distinction between explicit and implicit forms of text reuse, the latter including forms such as allusions, paraphrases and translated materials, see Daria Elagina, “Encoding of text reuse in the Project Beta maṣāḥḥaṭ,” *Journal of the Text Encoding Initiative* Rolling Issue (2022). URL:<http://journals.openedition.org/jtei/3763>. An overview of nineteenth- and twentieth-century approaches to text reuse through the application of source criticism of Arabic sources is presented in Sebastian Günther, “Assessing the Sources of Classical Arabic Compilations: The Issue of Categories and Methodologies,” *British Journal of Middle Eastern Studies* 32, no. 1 (2005):75–98.

that their contents versify an original work on a specific Set of Readings, such as *al-Šāṭibiyyah*, which versified the contents of al-Dānī's (d. 444) *K. al-Taysīr*.³⁷ A final category, "special topics in performance" (*adā'*) was also coded, but in general it was not possible to establish consistent relationships between works of this format and a specific Set of Readings; as a result, works belonging to this format are not included in the statistical analyses that follow. Nevertheless, observing the production of *adā'* works provides valuable evidence about pedagogical methods and emphases, and are therefore dealt with in a limited capacity in the remainder of this essay.³⁸

Finally, works were also classified by their survival status: "published" (a complete or partial edition exists), "extant" (known only from unpublished manuscripts), or "lost" (known solely from references in later sources such as *al-Fihrist*, *MQK*, and *ĠN*). In the analysis that follows, a work's survival status is noted only when the work is lost; works whose status is not specified in the body of the text have been documented to be extant or published; full bibliographic documentation of works appears in Appendix B. The distribution of works across these categories, and across formats and Sets of Readings, is presented in the descriptive overview that follows.

3 The Development of *qirā'āt* literature in the Mašriq and Mağrib (ca. 300–650 AH): A

Statistical approach

Descriptive overview

Of the 173 works surveyed, eighty-eight transmit the Set of 7 (51%), twenty-seven a Set of 7+1 (16%), and fifty-eight a Set of 10+ (34%). This survey represents the largest and most broadly researched effort to document the

³⁷In the course of this survey, we conditioned a text's identification as an instance of "text reuse" on the secure identification of an antecedent, whether through manual checking of the contents of an extant work or the commentary of the primary sources in the case of lost works. It should be noted that Hamdan in several places in his surveys misidentifies the source of text reuse, and we have noted where our results differ from his, accordingly.

³⁸Two early titles on *adā'* are notable in this regard, and worthy of additional investigation. The first is entitled *K. fī al-adā'* attributed to Abū al-Qāsim Muṭarrif b. 'Abd al-Raḥmān b. al-Farağ al-Andalusī (d. third c.?), for which see Ibn al-Ğazarī, *ĠN*, 2.300; see further the references in Hamdan, *MM*, 79n2. The other is a *K. Šarī'at al-maqāri'* attributed to Ibn Abī Dāwūd al-Siğistānī (d. 316), also noted for his work on early Qur'anic codices (*maṣāḥif*), for which see al-Ğahabī, *MQK*, 2.521; consult further the references in Hamdan, *MM*, 84n6.

distribution of Sets of Readings in *qira’āt* literature, surpassing the 52 titles considered, on the sole basis of their appearance in Kâtep Çelebî’s (d. 1067) *Kašf al-ẓunūn fī asāmī al-kutub wa-l-funūn*, by Christopher Melchert and Asma Afsaruddin, and the 57 titles considered by Otto Pretzl from various bibliographic and manuscript sources.³⁹

The distribution of the production of *qirā’āt* works in each region in Figure 1 begins with a period marked by a virtual Mašriqī dominance in the fourth century, sustained output from both regions in the fifth century, an output which was substantially maintained across the sixth century, and a comparatively small seventh-century sample, owing to the temporal parameters of the investigation. In total, 109 of these works were composed by Mašriq-born authors, and sixty-four by Mağrib-born authors; of these, forty-five works are attributed to inter-regional authors, leaving ninety-three by stationary Mašriqīs and thirty-five by stationary Mağribīs. Of the 105 distinct authors, eighteen composed works in more than one Set, and only one Mašriqī—Abū ‘Alī al-Ahwāzī (d. 446)—composed works in all three (Set of 7: *al-Mūğaz*; Set of 7+1: *al-Wağīz*; and Set of 10+: *al-Iqnā’* and *mufradāt*, both lost). Of the remaining multi-Set authors, eleven span the Sets of 7 and 7+1 (a significant proportion of which are Mağribīs), four span the Sets of 7 and 10+, and two span the Sets of 7+1 and 10+.⁴⁰

When framed in terms of geographical region, Mašriq and Mağrib, these data provide significant information about each of the five properties coded in this survey: the Set of Readings a given work transmits, its format, its survival status, its author’s region of origin at the sub-regional level, and its author’s mobility.

³⁹Melchert and Afsaruddin, “Reciters of the Qur’ān,” noting that the total number of titles that occur in this section of *Kašf al-ẓunūn* is 155, and reporting the following counts: Set of 7: 44; Set of 7+1: 8; and a final category comprising “other numbers of readings, of which just one is devote to the whole fourteen”: 29. The ratio of 7/7+1 that they report (5.5/1) is significantly different from the number reached in this survey (3.3/1). The authors, to my knowledge, have never provided the underlying data of their analysis, a situation which makes it impossible to assess the value thereof; compare with a similar criticism of the so-called statistical method used by Melchert in a previous publication in Hythem Sidky, “Consonantal Dotting and the Oral Quran,” *JAOS* 143, no. 4 (2023):785–814, at 794. Pretzl, “Verzeichniss,” reports the following counts: Set of 7: 37; Set of 7+1: 8; 10+: 12.

⁴⁰A dedicated treatment of Sibṭ al-Ḥayyāt’s (d. 541) œuvre merits separate investigation: his output extends well beyond the three Sets coded in this study, addressing Sets of 5, 6, 8, 9, and 11 Readings, among others; however, consult the references in Hamdan, *MM*, 204–9.

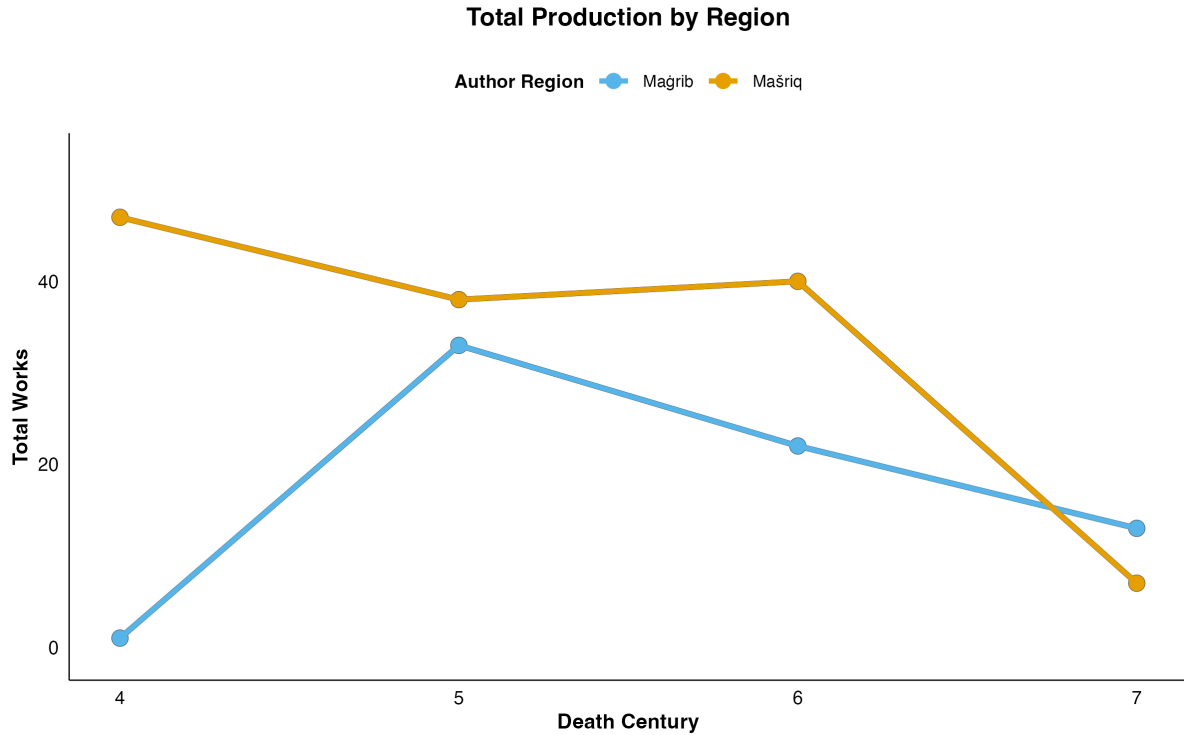

Figure 1: Production of works on the qirā'āt by century

Set of Readings

The two regions differ outwardly in which Sets of Readings they produce. Mašriqī authors produced fifty-three of their 109 recorded works on a Set of 10+ Readings (49%), a share that increases from 15% in the fourth century to 80% in the sixth, whereas works on the Set of 7 fall from twenty-four to four total works over the same time span. For Mağribī authors, the pattern is reversed: forty-nine of their sixty-four works (77%) transmit the Set of 7, concentrated in the fifth and sixth centuries, whereas only five total works on a Set of 10+ were produced in this region across the entire period. The Set of 7+1 Readings occupies a relatively minor position in both regions (~16% of total production), although its initial prevalence in al-Šām and subsequent spread to al-Andalus is notable, and discussed in more detail below.

Format

Mašriqī and Mağribī authors agreed on the central set of formats for presenting the Reading Traditions, comprising descriptive catalogues (106 works, 61%), the largest category overall, expansions (22, 13%), and compressions (12, 7%). These three formats account for more than 80% of all titles produced in this survey, and the descriptive catalogue format, alone, constitutes the lion’s share of production in each region (Mašriq 65%, Mağrib 55%). The other coded formats represent a marginal, but analytically useful share of data.⁴¹ The regional differential in preference for a specific format of presenting a Set of Readings, although relatively minimal in statistical terms, is addressed in greater depth in the section on Pedagogy, below.

Survival status

Only eighty of the 173 works (46%) survive in manuscript or published form, as shown in Figure 2. The extent of this “shadow corpus” of lost works is significant, and our ability to integrate it into this analysis is largely due to the aforementioned bibliographic efforts. At the regional level, survival rates differ, but not dramatically: 50% of Mağribī works survive, compared to only 44% of Mašriqī works. Format also correlates with survival: compressions have the highest loss rate (83%), followed by didactic poems (75%), descriptive catalogues (52%), ‘*adā*’ works (50%), *mufradāt* (47%), and expansions (41%).

Sub-regional distribution

The spatial distribution of the production of works on the Sets of Readings, both century-by-century and cumulatively, is visualized in Figure 3, Figure 4, and Figure 5. In all three map groups, orange marks the Mašriq and blue the Mağrib; color saturation is normalized to peak sub-regional production across all centuries, so that darker shading indicates higher output relative to the overall maximum for that Set of Readings. As the century-by-century

⁴¹Specifically: *mufradāt* (17, 10%), didactic poems (12, 7%), and *adā*’ works (4, 2%).

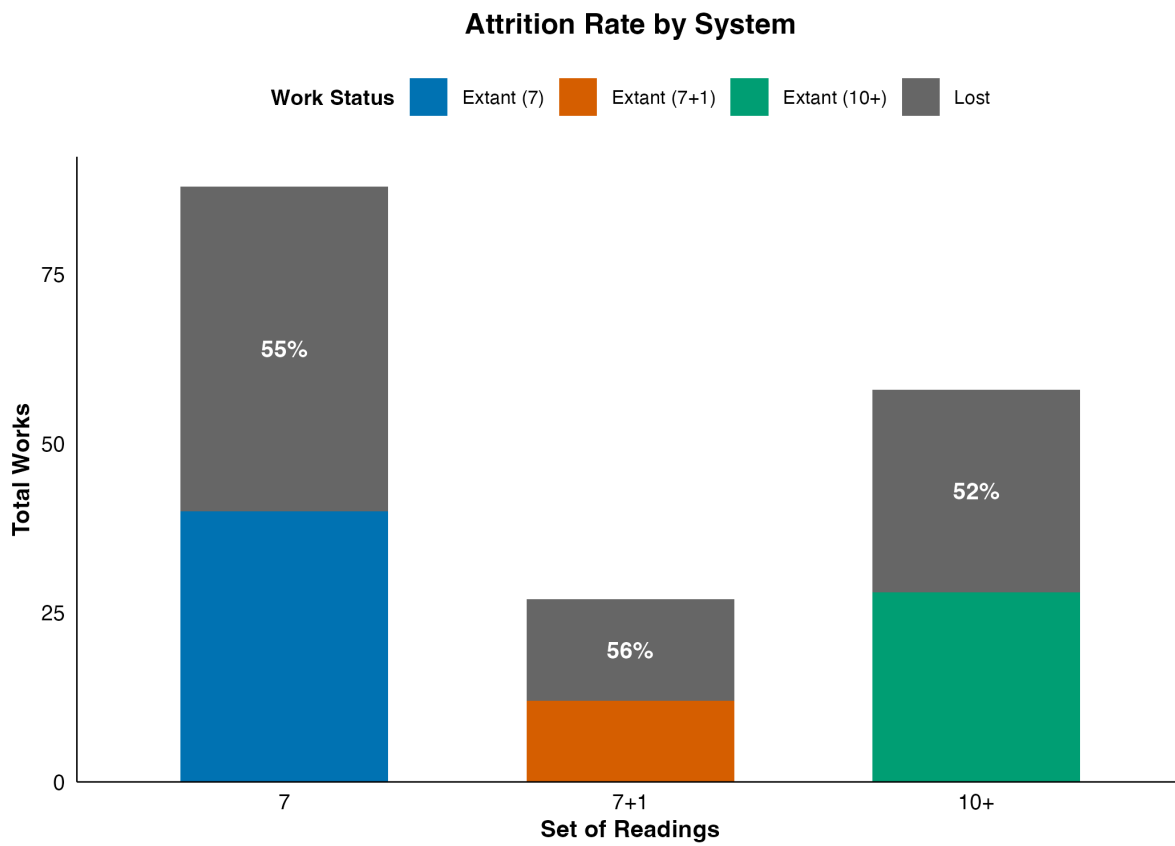

Figure 2: Extant and lost works by sets of Readings

panels illustrate, production within a given region can be highly volatile: sub-regions that dominate in one century may contribute nothing in the next, and the leading hub may shift from Iraq to Fārs or from al-Andalus to Egypt. Despite this volatility, the cumulative panels reveal that these sub-regional fluctuations resolve into coherent macro-regional patterns: Mašriqī authors concentrate their output on a Set of 10+, Mağribī authors on the Set of 7, and a Set of 7+1 remains a secondary presence in both.

Table 3 summarizes the sub-regional production by Set of Readings and century.

Mobility

The two categories of authors—stationary and inter-regional—display notably different profiles across several biographical qualities. In the fifth century, stationary Mašriqī authors average 1.9 recorded stops in their itineraries, whereas Mağrib-to-Mašriq travelers average 10.3 stops. It should be noted that this figure is substantially inflated by the exceptional case of Abū al-Qāsim Yūsuf b. 'Alī b. Ġubārah al-Huḍalī (d. 465), whose thirty-eight recorded

stops make him the author with the most extensive itinerary in this survey. Al-Hudālī himself was well aware of his singularity: both al-Dāhabī and Ibn al-Ġazarī report that al-Hudālī declared that if he learned of anyone more widely traveled than he for the sake of learning *qirā'āt*, he would journey to meet that person directly.⁴² Excluding him, the Mağribī inter-regional average drops to 6.3 stops per author.

Two further indicators confirm that inter-regional authors constitute a distinctive class. First, they are more prolific: inter-regional authors average 2.0 works per person, compared to 1.6 for stationary authors, and this disproportion grows among Mağribīs (2.1 works per inter-regional author vs. 1.5 for stationary). Second, their works survive at markedly higher rates: 60% of works by stationary authors are lost, consistent across the Mašriq and Mağrib, whereas only 36% of inter-regional authors' works are lost. This aggregate figure is substantially influenced by al-Dānī (d. 444), who alone accounts for nine of the forty-five inter-regional works (20%), of which an anomalous 78% survive; excluding him, the inter-regional loss rate rises to 39% (fourteen of thirty-six works), though the overall pattern holds. The distinctiveness of this group—in their travel, their productivity, and the survival of their works—warrants separate analysis of their compositional choices, a subject which is taken up in a dedicated section below.

Summary

These descriptive statistics present strong evidence of patterned literary production of in the discipline of *qirā'āt* in the Mašriq and Mağrib. Both regions present remarkable similarities, including their production in similar formats of works, similar loss rates of the corpus, and relative proportion of stationary authors. Higher rates of mobility, documented in inter-regional authors, mark a unique sub-population of *qirā'āt* authors who were more prolific and whose works were better preserved. They also present intriguing evidence of regional differentiation, such as the much more extensive overall production in the Mašriq, as well as strong correlation between regional origin and

⁴²al-Dāhabī, *MQK*, 2.818; and Ibn al-Ġazarī, *ĠN*, 2.397–98, where the Arabic reads (following *MQK*): *fa-ḡumlatu man laqītu fī hāḡā l-'ilmi talāṡmi'ati wa-ḡamsatin wa-sittūna šayḡan min āḡiri l-Mağribi ilā bābi Farḡānati yamīnan wa-šamālan wa-ḡabalan wa-baḡran wa-law 'alamtu aḡadan yuqaddimu 'alayya fī hāḡihī l-ṡarīqati fī ḡamī'i bilādi l-Islāmi la-qaṡadtuh.*

preference for Sets of Readings documented in the Mašriq (Set of 10+) and Mağrib (Set of 7), which for the most part coheres even at the sub-regional level.

However, several features of our data require caution in their interpretation. The corpus is both unbalanced and relatively sparse: the production of Mašriqī authors dwarfs that of the Mağribīs, and the corpus contains approximately one work for every two years covered. Similarly, sub-regional concentrations are substantially attributable to individual prolific authors: in al-Andalus, al-Dānī alone accounts for eight of the eighteen fifth-century works on the Set of 7 (44%), with a ninth—his *Mufradat Ya ‘qūb*—belonging to the Set of 7+1; in fourth-century Mašriqī production of works on a Set of 10+, four of the six recorded works belong to Ibn Mihrān (d. 381), based in Nīsābūr/Iṣbahān (Ġibāl-Ṭabaristān), and the remaining two were composed by Fārsī authors as commentaries on his *al-Ġāyah*; the Ibn Ġalbūn family produced six of the eight works on the Set of 7 attested for fourth-century Šām; and in fourth-century Iraq, Ibn Muğāhid authored four of the ten works on the Set of 7. Such variability should be borne in mind particularly when interpreting the maps: sub-regional saturation simply reflects the number of works, not the number of independent authorial programs. To test whether the regional differences observed here are statistically robust despite these uncertainties, the following section applies a Bayesian framework analysis to the same data.

Bayesian analysis

We fit a Bayesian multinomial logistic regression to the 173 works, treating the Set of Readings a given work is associated with as the categorical outcome of the model, and including an author’s origin Region and death century (mean-centered) as predictors. The choice of a Bayesian model, as opposed to a Frequentist approach, is motivated both the strength of our prior assumptions about the relative difference in *qirā’āt* scholarship between the Mašriq and Mağrib, based on the preceding analysis, as well as the need to model the uncertainty of relatively unbalanced, sparse, and otherwise uncertain data, as discussed above. The advantages offered by Bayesian modeling help us, in turn, to pose three questions about the regional differentiation of the *qirā’āt* discipline, each of which presupposes

the answer to the last. First: did the production of the two regions actually diverge, and did the gap between them widen over the period surveyed? Second, and only if it did: how far apart did the two systems get—measured not in the abstract, but against how far apart they *could* have got, given what the two regions demonstrably held in common? And third: is it an author's regional origin that drives the pattern, or can his sub-region, his mobility, or the genre in which he wrote explain it away?

Did the two regions' output diverge—and did the gap widen?

The model's temporal predictions offer the most intuitive entry point to our data: they show what the regression expects regional output to look like in terms of production of works dedicated to a Set of Readings in each region and century. Figure 6 is divided into two panels, one for each region; within each panel, the x-axis marks the century (4th–7th AH) and the y-axis gives the predicted probability that a work produced in that region and century belongs to a given Set of Readings. Three colored lines trace the three Sets of Readings, with shaded bands marking the 50% credibility intervals and thin background lines representing individual posterior draws, which convey the full range of the model's uncertainty.

As Figure 6 illustrates, the two regions are already distinguishable in the fourth century on the basis of the production of works on a Set of 10+ Readings alone: the regional gap in predicted probability of transmitting this Set stands at roughly twenty-seven percentage points (Mašriq 30%, Maġrib 3%). By the seventh century, this gap has more than doubled to fifty-eight points (Mašriq 78%, Maġrib 20%). The Set of 7 shows the inverse pattern: the Maġrib's predicted share rises from around 78% in the fourth century to a plateau around 68%, whereas the Mašriq's share declines monotonically to a share of just about 16%. Across the entire four-century span of this survey, the two regions show distinct preferences for a given Set of Readings.

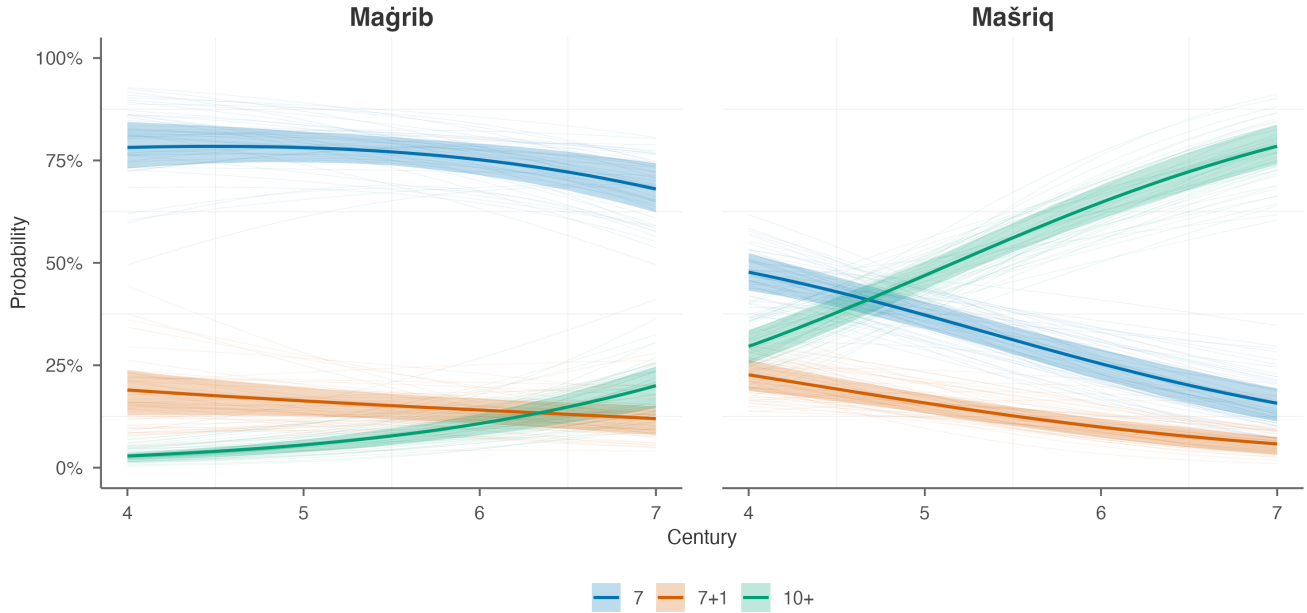

Figure 6: Posterior temporal predictions with uncertainty: predicted probability of each Set of Readings across centuries for Mašriq and Mağrib, with 50% credible intervals (shaded bands) and a sample of individual posterior draws (thin lines) conveying visual texture of the model’s uncertainty.

How different did the two regional systems actually become?

To move beyond the question of *whether* the regions differ and toward the question of *how much* they differ, we employ a summary metric called Jensen-Shannon Divergence (JSD).⁴³ JSD indexes the amount of dissimilarity between two systems by computing a single-number expressed on a continuum between 0 and 1. Mapped to the present dataset, a score of 0 means the two regions exhibit exactly the same literary production of Sets of Readings, and a score of 1 means that the regions exhibit completely opposite patterns. Whereas JSD allow us to model the differences between the Mašriqī and Mağribī systems efficiently in theory, the nature of real-world, historical data places constraints on the amount of differentiation that two systems are likely to achieve; this circumstance,

⁴³JSD is computed from the full 3-category probability vectors and is symmetric across all categories; it does not privilege any single Set as a baseline, as in the multinomial regression. Whereas the Bayesian multinomial regression internally designated a Set of 10+ as the reference category in the initial analysis, which affects the interpretation of individual coefficients (e.g., “the log-odds of 10+ relative to 7 are higher in the Mašriq”), by the time those coefficients are converted via the softmax function into probability vectors and fed into the JSD formula, the reference category no longer provides any discriminatory power. By contrast, the Dirichlet-smoothed estimate never has a reference category at all—it draws probability vectors directly from observed counts. The two methods are therefore fully independent in their statistical machinery, and the constrained-max construction’s use of the Set of 7 as the shared category reflects the empirical data (both regions produce Set of 7 works in every century), not a parametric assumption.

in turn, makes it unlikely that the model will return scores of maximum “convergence” and “divergence” (0 and 1, respectively). One such constraint in our data is the documentation that authors in both the Mašriq and Mağrib continuously produced works on the Set of 7 throughout the period surveyed, thus making a score of 1 impossible to achieve.⁴⁴

Owing to the introduction of this extra layer of complexity, we estimate the JSD using two independent methods and compare the outcomes, which are visualized in Figure 7 and Figure 8. Both figures express the divergence as a proportion of that constrained maximum, so that the quantity plotted is not an abstract distance in bits but the answer to the question posed: how far apart the two systems got, out of how far apart they could have got. Each also carries the other estimate as a faint dotted line, so that the two may be read against one another. The two estimation methods, which share no statistical machinery, converge closely on the magnitude of the divergence between the Mašriqī and Mağribī systems of production of *qirā’āt* works, and agree that it grows over time; where they differ is on the rate at which that divergence accumulated.

The model-based estimate (Figure 7), which structurally pools information across centuries in order to make up for the sparseness of the data, exhibits less uncertainty and traces a smooth, steadily rising trajectory of divergence between the two regions. The Dirichlet-smoothed estimate, a model-free robustness check that more closely tracks the unevenness of our data, locates much more uncertainty but clearly finds the majority of the divergence in a single leap from the fourth to the fifth century, after which the divergence of the Mašriq from the Mağrib reaches a relative equilibrium. Despite these differences, both methods agree on key aspects of the development of the Mašriqī and Mağribī *qirā’āt* systems during this period, namely, that the divergence, measured in raw JSD, increases substantially over the centuries surveyed, consistent with the widening gap in production of the Sets of 7 and 10+ visible in the temporal predictions (Figure 6). The narrative analysis that follows in a separate section, below, will assess the merits of each estimate against the historical evidence.

⁴⁴This finding is underscored by the observation that even works on a Set of 10+ Readings in virtually all cases describe the *ne varietur* Readings documented in the two other Sets.

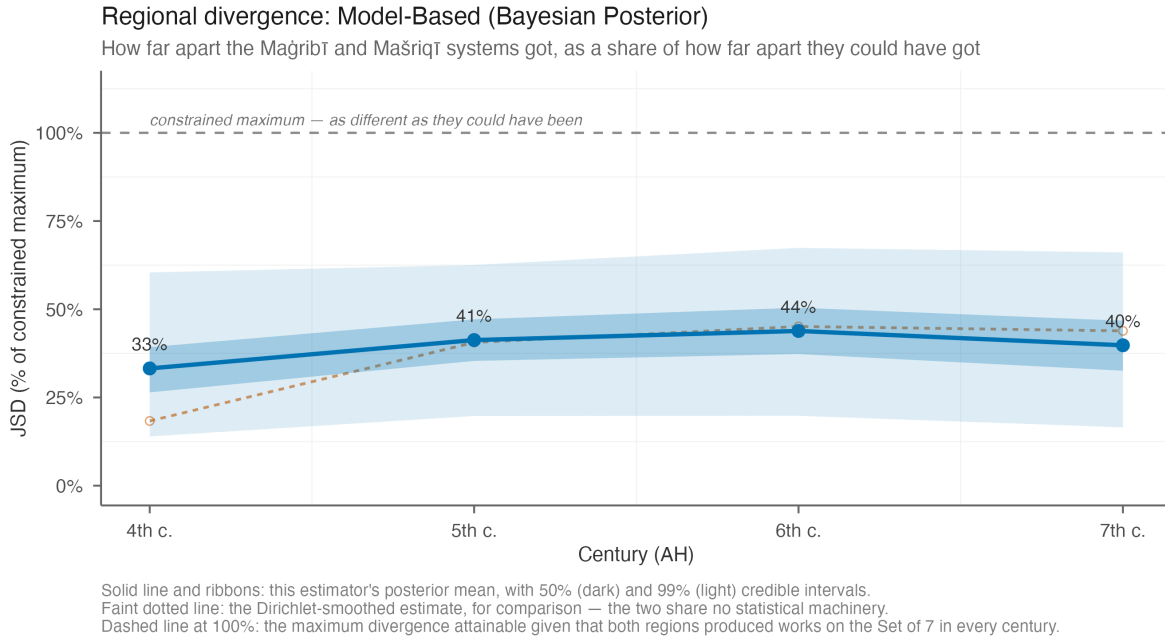

Figure 7: Model-based divergence between the Mağribī and Mašriqī distributions of Sets of Readings, by century, derived from the Bayesian multinomial regression posterior and expressed as a proportion of the constrained maximum (dashed line at 100%). The distance below that line is the shared core of Readings neither region abandoned. Ribbons show 50% and 99% credible intervals; the faint dotted line is the Dirichlet-smoothed estimate, given for comparison.

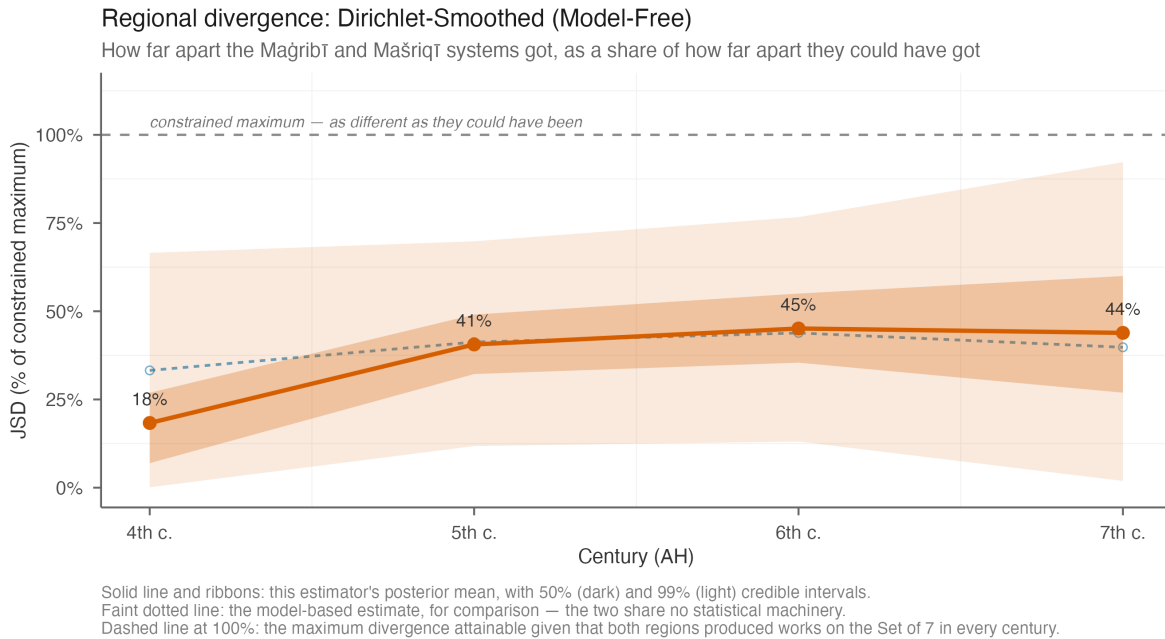

Figure 8: Dirichlet-smoothed (model-free) divergence between the same distributions. Each century is treated independently, using Dirichlet(1 + counts) posteriors, which is why the fourth century—where the Mağrib is represented by a single work—is pulled sharply toward the two regions' agreement. Conventions as in Figure 7; the faint dotted line is the model-based estimate.

Averaged across the three and a half centuries surveyed, the two methods' reckoning of the divergence agrees to within a few points (40% from the model-based estimate of Figure 7, 37% from the Dirichlet-smoothed estimate of Figure 8, both as a proportion of the constrained ceiling). But the average both understates that agreement and conceals what is most instructive about it. Taken century by century, the two estimates are all but identical from the fifth century onward—one point apart in the fifth, one in the sixth, four in the seventh. They part company in exactly one place: the fourth century, where they stand fifteen points apart (model-based 33%, Dirichlet-smoothed 18%).

That lone disagreement is not a defect in either method. It is a demonstration of what each one is for. The fourth century is the single century in which the Mağrib is very nearly absent from the record: one attested work, against forty from the Mašriq. The Dirichlet-smoothed estimate treats each century on its own terms, and with one Mağribī work to go on its probability vector for that region is dominated by the uniform prior, which draws the two regions toward one another and the measured divergence down to 18%. The model-based estimate borrows strength from the centuries on either side—it assumes a consistent regional tendency operating across the whole period—and infers 33%. Where the corpus is thick, the two methods converge; where it runs out, they diverge in precisely the manner their construction predicts.

This has a consequence for how the two curves ought to be read. Their apparent disagreement about the *rate* at which the divergence accumulated—the model's gradual rise set against the Dirichlet's sharp leap from the fourth century to the fifth (Figure 8)—reduces entirely to their disagreement about the fourth century. It is not a disagreement about history, but about how to estimate a quantity from a century that contains a single work. From the fifth century onward, wherever the corpus can support an independent estimate, the two methods tell the same story to within a point or two. That the disagreement is confined to the one century in which the data cannot bear the weight, and vanishes everywhere else, is the strongest evidence available to us that the magnitude of the divergence is a property of the corpus and not of the machinery used to measure it.

Neither reading is wrong. Together they place the observed divergence between roughly one-fifth of the constrained ceiling at its fourth-century floor and nearly one-half at its sixth-century peak, and both indicate a substantial increase in the separation of the two regions’ *qirā’āt* systems over time.

The estimates of divergence between the Mašriqī and Mağribī *qirā’āt* authors in terms of a preference for a given Set of Readings provides a quantitative basis from which to conclude that the two regional systems achieved a significant degree of dissimilarity. The observed JSD, which reaches only about one-third to nearly one-half of the constrained ceiling (depending on the century and the estimation method), indicates the two further aspects of the divergence between the two regions. First, both estimates confirm that the Mašriq and Mağrib never produced identical distributions of Sets of Readings during the period surveyed. Second, authors from the two regions never fully abandoned a shared “core” of Readings. Rather, the divergence measured in these data suggests the operation of fundamentally different processes underlying the establishment of a core of Set of Readings in the Mašriq and Mağrib.⁴⁵

⁴⁵Melchert (“Variant Qur’anic Readings Before and After Ibn Mujāhid,” 205) suggests that a principle of “limiting diversity” exerted some unspecified degree of influence of *qirā’āt* scholarship throughout the fourth century, on the basis of the exclusive endorsement of 7 Readings by Ibn al-Nadīm (d. 380/990) in his *al-Fihrist*. Although Melchert qualifies this statement by noting that “he [viz. Ibn al-Nadīm] did not speak for everyone [viz. “limiting diversity” in the number of Readings],” his characterization of Ibn al-Nadīm as a reliable barometer for measuring “a historic shift” of any magnitude within the discipline of *qirā’āt* is hazardous for a number of reasons. First, to the extent that Ibn al-Nadīm’s pronouncements in *al-Fihrist* on the acceptability of a certain Set of Readings implicate some regionally-based trend, we should not expect them to be reflective of the inhabitants of the Mağrib in the first place, given that the lack of Mağribī sources listed in this work. See Maribel Fierro and Mayte Penelas, “Introduction,” in *The Maghrib in the Mashriq*, 1–32, at 13.

Second, Melchert appears to be unaware of earlier, similarly conclusive statements in *qirā’āt* literature concerning the exclusive adoption of the Set of 7 Readings, particularly the status accorded to this Set by Ibn Muğāhid’s near-exact contemporary, Abū Muzāḥim al-Ḥāqānī (d. 325), in his *al-Qaṣīdah al-Ḥāqāniyyah* (= *qaṣīdah rā’iyyah fī al-tağwīd*); see Abū Muzāḥim Mūsā b. ‘Ubayd Allāh al-Ḥāqānī, *al-Qaṣīdah al-Ḥāqāniyyah fī al-tilāwah wa-ḥusn al-adā’* in Ġānim Qadūrī al-Ḥamad, *Abḥāl fī ‘ilm al-tağwīd* (Amman: Dār al-‘Ammār, 1423/2002), 28–34, at 28–29 lines 8–11 = ed. ‘Alī Ḥusayn al-Bawwāb in *Min Daḥā’ir al-Turāṭ* (Riyadh: Kunūz al-Isbīliyyā, 1441/2019), 17–32, at 18–20 lines 8–11. For the argument connecting Ibn Muğāhid’s and al-Ḥāqānī’s projects, see now Lauren E. Osborne, “Sound-History of the Quran: A Study of Mūsā ibn ‘Ubayd Allāh ibn Ḥāqān (or al-Ḥāqānī)’s (d. 325/937) *Qaṣīda fī al-tağwīd*,” *Mélanges de l’Institut dominicain d’études orientales* 37 – La récitation dans les premiers siècles de l’islam (2022):87–114, at ¶13, where she states: “the codification of the *qirā’āt* [by Ibn Muğāhid was] roughly contemporaneous with or even slightly after the likely moment of composition of Ibn Ḥāqān’s *Rā’iyya*.” The contributions of al-Ḥāqānī, and the long tail of the effects of his poem on the discipline of *qirā’āt* is taken up in the section on pedagogy, below.

Is it regional origin that drives this—or something else?

The preceding sections establish that the Mašriq and Mağrib differ in both their production of works on the Sets of Readings and in their conceptualization of a defined “core” of Readings to be reproduced. The remaining question is how confident we are that an author’s regional origin itself—rather than some other variable—drives this pattern. The model’s posterior contrasts address this question directly. Figure 9 visualizes the answer in three panels, one for each Set of Readings (Set of 10+, Set of 7, Set of 7+1). In each panel, the x-axis represents the difference in predicted probability between the two regions (the value associated with the Mašriq subtracted from that of the Mağrib): positive values mean the Mašriq has a higher predicted probability, whereas negative values mean the Mağrib has a higher predicted probability. The y-axis counts how many of the model’s posterior simulation draws produced a given difference; in other words, how often the model derived each value when it estimates the regional gap. Three other vertical lines offer reference points: the colored pair of dashed lines marks the bounds of the 99% credible interval, the range within which 99% of all simulation draws fall; the solid black line within the shaded regions marks the posterior mean, representing the model’s best single estimate of the center of difference; and the dashed vertical line at the zero marker serves as the “null” line. If the distribution of the differences between the predicted regional probabilities were centered on zero, this would indicate no difference between regions.

What these figures reveal is striking. For a Set of 10+, every single simulation of the paths to the observed distribution places the Mašriq ahead of the Mağrib: the entire histogram sits to the right of zero, with no overlap whatsoever. For the Set of 7, the pattern reverses exactly: every draw places the Mağrib ahead, and the histogram sits entirely to the left of zero. For a Set of 7+1, by contrast, the histogram straddles zero, meaning the two regions are, for the most part, statistically indistinguishable for this Set, matching the uncertainty of the simpler statistical analysis on its prevalence conducted in the previous section.

The posterior analysis allows us to state confidently that an author’s origin provides us with more information about which Set of Readings he wrote about than any other variable encoded into the model. When we express this

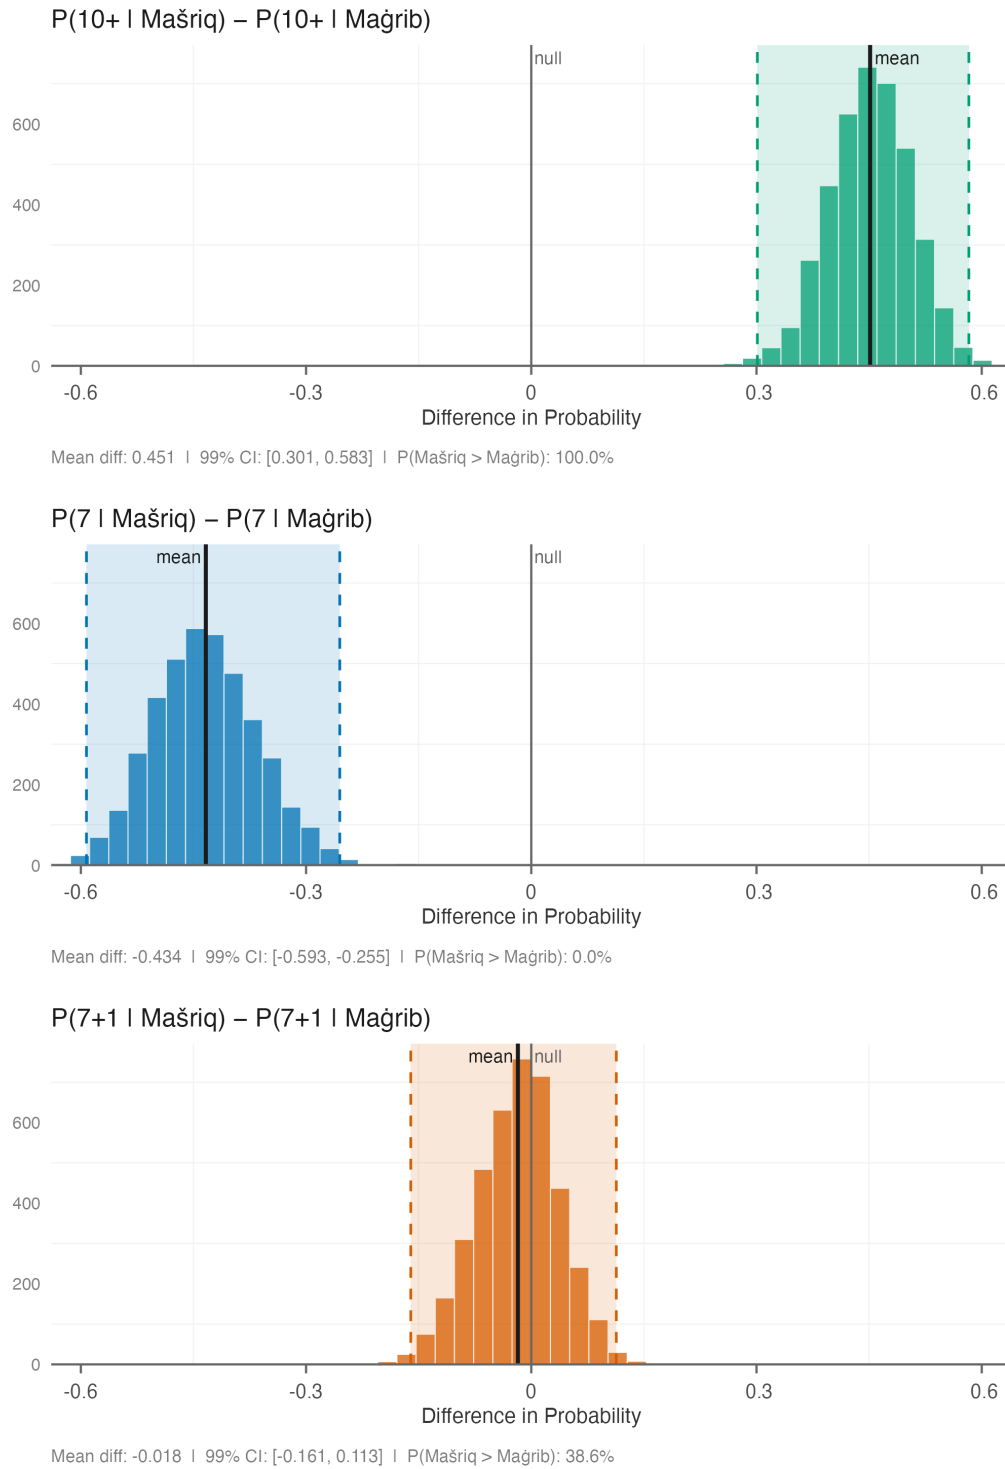

Figure 9: Posterior contrasts: distribution of the difference in predicted probability $P(\text{system} \mid \text{Mašriq}) - P(\text{system} \mid \text{Maġrib})$ for each set of Readings, averaged across centuries

confidence as an odds ratio, we can state that a Mašriqī work is between 18 and 19 times more likely to transmit a Set of 10+ than the Set of 7 (median OR = 18.8, 99% CI [5.7, 86.5]).

It remains to ask whether it is really *region* that does this work. Three rival explanations present themselves, and each can be entered into the model directly. The first is **sub-region**: perhaps no macro-regional tendency exists at all, and what we are observing is the aggregate of a few dominant local schools—Iraq, al-Šām, al-Andalus—which merely happen to fall on opposite sides of the line we have drawn. The second is **mobility**: perhaps the pattern belongs not to where a scholar was born but to whether he travelled. The third is **genre**: perhaps a Set of Readings follows the kind of book being written, and region follows genre. We therefore refit the model four times, adding sub-region as a varying intercept, then mobility, then work format, then an interaction between mobility and century.

The regional effect survives all of them. In every specification the Set-of-10+ Region coefficient remains positive and its 99% credible interval excludes zero, and the coefficient itself barely moves: +3.0 on the log-odds scale in the base model, +3.0 when sub-region is entered as a varying intercept, +2.7 with mobility controlled for, and +3.1 with format. The sub-region control is the most demanding of the three, since sub-region is nested *within* region and therefore competes with it directly for the same signal; that the regional coefficient is undiminished even there is the strongest available indication that the macro-regional boundary is not an artifact of sub-regional aggregation. Macro-regional origin should accordingly be treated as the dominant, if not the sole, structural predictor of an author's preference for a Set of Readings.⁴⁶

⁴⁶The Region coefficient is the log-odds of a Set of 10+ versus the Set-of-7 baseline, per unit Mašriq; the values given in the body are posterior means. The best-fitting model by LOO cross-validation ($\Delta\text{LOOIC} \approx 24$ relative to the base) is the one that adds work format. The fourth extended model fits an interaction between mobility and century, on the hypothesis that the compositional choices of inter-regional authors might have diverged from the norms of their region of origin over time; the posterior leans in that direction but does not support the claim, and it is reported here as a null (Set-10+-vs-Set-7 interaction coefficient = -0.51 , 99% CI $[-2.10, +0.91]$, $P < 0 = 82.0\%$). Full coefficient comparisons, forest plots, and LOO-CV tables are available in the Confound Analysis card of the supporting digital application for this project.

Conclusions of Bayesian analysis

Bearing in mind the results of the Bayesian multinomial regression analysis, we are now in a position to answer the three questions with which this section began. The two regions' output did diverge, and the gap between them widened across the period: the regional difference in the predicted probability of transmitting a Set of 10+ grows from twenty-seven percentage points in the fourth century to fifty-eight in the seventh. That divergence reached roughly 40% of the maximum the two regions could have attained while both continued to produce works on the Set of 7—a figure on which two estimators sharing no statistical machinery agree. And the driver of the pattern is macro-regional origin itself, which survives controls for sub-region, mobility, and genre alike. These data unambiguously support the conclusion that three and a half centuries of *qirā'āt* scholarship in the Mašriq and Maġrib followed markedly different trajectories which can best be captured in their collective preference for a Set of 10+ and 7 Readings, respectively. With this statistical confirmation of regional differentiation in hand, we now turn to a detailed narrative of the these trajectories in each region.

4 Narrative Analysis

In keeping with the geographic focus of this research, it is useful to orient the narrative of independent regional development to specific locations which feature prominently in the development of the *qirā'āt* corpus during the period under investigation. Table 4 summarizes the principal hub cities associated with *qirā'āt* authors, including their cities of origin and those to which they traveled, and the shifts they underwent across centuries.

Table 4: Principal hub cities of *qirā'āt* production by century and region (number of associated scholars).

Century	Mašriq (top cities)	Maġrib (top cities)
4th	Bagdād (11), Ḥalab (4), Anṭākiyah (3), Dimašq (3), Nīsābūr (3)	Cairo (5)

Century	Mašriq (top cities)	Maġrib (top cities)
5th	Baġdād (17), Makkah (7), Nīsābūr (5), Dimašq (5)	Cairo (12), Qurṭubah (7), al-Qayrawān (5), Išbīliyyah (4)
6th	Baġdād (12), Iṣbahān (4), Wāsiṭ (4), Makkah (4), Šīrāz (3)	Išbīliyyah (5), Qurṭubah (5), al-Iskandariyyah (4), Cairo (3)
7th	Dimašq (2)	al-Iskandariyyah (5), Cairo (4)

In both the Mašriq and Maġrib, certain cities feature regularly. In the Mašriq, Baġdād is a constant, and the dominant hub in every century from the fourth through the sixth. Secondary hubs wax and wane, often in concert with specific dynasties. In al-Šām production seems to have catalyzed during the Hamdanid dynasty (re. 293–394), based in Ḥalab; across the fourth and fifth centuries, Šīrāz and Iṣbahān served as seats of Buyid power (re. 366–ca. 419) and, Nīsābūr flourished under Ghaznavid suzerainty (re. 366–582), to name only a handful of regionally influential dynasties. In the Maġrib, Cairo, functions primarily as a transit node for inter-regional scholars and a destination for Mašriqī migrants throughout the fourth and fifth centuries, especially during Fatimid rule (re. 297–567). Many scholars who passed through there were ultimately destined for the Ḥiġāz: nine scholars are attested at both Cairo and Makkah, forming a pilgrim-scholar axis that connected the Maġribī and Mašriqī networks. In the fragmented political landscape of al-Andalus, Qurṭubah dominates as the primary center of *qirā’āt* production from the fifth century onward, although other outposts, both within and outside the Iberian peninsula, were also influential.⁴⁷ For instance, Dāniyah developed a strong local tradition after the arrival of Abū ‘Amr ‘Uṭmān b. Sa‘īd, later to adopt the sobriquet “al-Dānī” in honor of the city’s hospitality; Išbīliyyah, too, emerges as a secondary hub in the sixth and seventh centuries.⁴⁸ By the seventh century, Egypt would shed its largely transit-based function in the network

⁴⁷ María Jesús Viguera Molins, “Al-Andalus and North and West Africa (Eleventh to Fifteenth Centuries),” in *The New Cambridge History of Islam, Volume 2: The Western Islamic World – Eleventh to Eighteenth Centuries*, ed. ⁴⁸ For an approximate index of the growth of the discipline of *qirā’āt* in individual cities during this period, see the prosopographical analyses in José María Fórneas Besteiro, “Elencos biobibliográficos arábigoandaluces. Estudio especial de la *Fahrasa* de Ibn Atiyya

of *qirā'āt* scholars, and emerge as an active center of indigenous production in its own right.

The Development of Mašriqī *qirā'āt* Literature

The development of a corpus of *qirā'āt* literature in the Mašriq was not a straightforward affair. Instead, significant differences developed at the level of major sub-regions such as Iraq, al-Šām and Ḥurāsān, each of which maintained significant historical trajectories past the foundational period of the fourth century. Nevertheless, region-wide alignment on multiple instantiations of a Set of 10+ Readings was attained by no later than the middle of the fifth century, and continued unabated until near the end of the surveyed period, at which time a resurgence of interest in the Set of 7 Readings becomes detectable.

The fourth century: A multi-polar region

Fourth-century Mašriqī output clusters around three geographic poles, each favoring a different Set of Readings: Iraq for the Set of 7, al-Šām for a Set of 7+1, and Ḥurāsān for a Set of 10+.

In Iraq, Ibn Muğāhid (d. 324) touched off an intensive cluster of literary activity with his *K. al-Sab'ah* and four related, although unfortunately lost, works. His students amplified this output: al-Naqqāš (d. 351) produced a trilogy on the Set of 7, all lost; Abū Ṭāhir Ibn Abī Hāšim (d. 349) composed his lost descriptive catalogue *K. al-Bayān* as an attempt to surpass the documentation of *K. al-Sab'ah*; and al-Ḥusayn b. 'Uṭmān al-Bağdādī (d. 378) produced the earliest known Mašriqī didactic poem on the Set of 7, also lost. Yet the same milieu also produced at least two (lost) works on a Set of 7+1—including by al-Naqqāš and Ibn Ḥasnūn (d. 386), both students of Ibn

al-Garnati [sic] (481–541/1088/1147),” Ph.D. Diss. supervised by Elías Terés Sadaba (Madrid: Universidad Complutense - Facultad de Filosofía y Letras, 1971); Francisco Rodríguez Mañas, “Las lecturas coránicas en al-Andalus (ss. V/XI-XII/XIII) a través de la *Takmila* de Ibn al-Abbār,” in *Ibn al-Abbār, polític i escriptor àrab valencià (1199–1260). Actes del Congrés Internacional 'Ibn al-Abbar et seu temps. Onda, 20–22 febrer, 1989*, eds. Muğāhid—indicating that no single Set could claim the crown of canonicity in fourth-century Iraq. The near total extinction of works produced in Iraq during this period underscores the importance of the aforementioned “shadow corpus” to investigating this crucial period of disciplinary formation.

In al-Šām the situation mirrors Iraq, except that scholars there exhibit a distinctive preference for a Set of 7+1 Readings, with a secondary emphasis on production of works on the Set of 7. Abū Bakr al-Dāğūnī (d. 324), Abū Ishāq al-Anṭākī (d. 338), Abū Ṭāhir al-Anṭākī (d. 380), and Abū al-Faḥ al-Ḥimṣī al-Ḍarīr (d. 401) all composed a single work on 8 Readings, although al-Dāğūnī’s work differed from those of his compatriots by including the Reading of Abū Ġa‘far al-Madanī (d. 130) rather than that of Ya‘qūb.⁴⁹ Aside from this minor difference, it is striking that all the works noted above share what we will refer to, for the sake of convenience, as the “1 Book/8 Readings” configuration, as opposed to the “7 + *mufradat* Ya‘qūb” configuration of a Set of 7+1 that would predominate in the Mağrib. The Ibn Ġalbūn family of Aleppo—Abū al-Ṭayyib (d. 389) and his son Abū al-Ḥasan (d. 399)—notably produced works on both Sets of 7 and the 1 Book/8 Readings format while in al-Šām; Ibn al-Ġazarī in *GN* preserves evidence of Abū al-Ḥasan’s teaching his *K. al-Taḍkirah* in Dimašq before his family’s departure to Egypt, sometime before 352 AH. Several other Šāmī scholars migrated to Egypt during this period, where they created an émigré community that proved decisive for the westward transmission of a Set of 7+1, discussed in more detail below.

In Nīsābūr, Abū Bakr Ibn Mihrān (d. 381), originally from Iṣbahān, consecrated a regional tradition on a Set of 10+ with a number of works, among them *K. al-Ġāyah fī al-qirā’āt al-‘ašr* (11 Readings), *K. al-Mabsūṭ* (10 Readings),

⁴⁹Melchert (“Variant Qur’anic Readings Before and After Ibn Muğāhid,” 203) comments, with reference to the *K. al-Taḍkirah fī al-qirā’āt al-ṭamān* of Abū al-Ḥasan Ibn Ġalbūn (d. 399), that “respect for Ya‘qūb al-Ḥaḍramī’s readings appears to be a tenth century innovation in consideration of his minor presence in extant ninth-century commentaries, also the early tenth-century commentaries [...]” Here, Melchert appears to be ignorant of evidence that would place the documentation of this reading either contemporary with Ya‘qūb himself, or as early as the late third century. For the first instance, a so-called *ḡāmi’ fī wuḡūh al-qirā’āt* ascribed to Ya‘qūb, see Abū Bakr Muḥammad b. al-Ḥasan al-Zubaydī al-Andalusī, *Ṭabaqāt al-naḥwīyyīn wa-l-luḡawīyyīn*, ed. Muḥammad Abū al-Faḍl Ibrāhīm, Ḍaḡā’ir al-‘Arab 50, reprint (Cairo: Dār al-Ma‘ārif, N.D.), 54 №18, *apud* Hamdan, *Adab*, 71 №26.

For literary production on Ya‘qūb’s reading later in the third century, a *kitāb qirā’at Ya‘qūb* cited by al-Dānī known to ‘Abd Allāh b. al-Ḥusayn Ibn Ḥasnūn (295–386), for which see Abū ‘Amr al-Dānī, *Mufradat Ya‘qūb*, ed. Šāliḥ Ḥātim al-Dāmin (Dammām, KSA: Dār Ibn al-Ġawzī, 1429/2008), 119 (Q al-An‘ām 6:111), where the Arabic reads: *fa-lammā ra’ā* [viz. “‘Abd Allāh b. al-Ḥusayn” = Ibn Ḥasnūn] *fī kitāb qirā’at Ya‘qūb* [...]. Owing to the apparent existence of this book prior to Ibn Ḥasnūn, as well as his documented relationship with Muḥammad b. Hārūn al-Tammār (d. 310), the noted transmitter of Ya‘qūb’s Reading, we may tacitly identify this *kitāb* as the product of al-Tammār; compare with the more explicit documentation of a *kitāb* attributed to al-Tammār in Hamdan, *Adab*, 280 №172. Consult further on the relationship between al-Tammār and Ibn Ḥasnūn the references in al-Ḍahabī, *MQK*, 532 №265; and Ibn al-Ġazarī, *GN*, 2.271–72 №3503, where Ibn Ḥasnūn (= “al-Sāmarrī”) is quoted for poetry transmitted by al-Tammār.

and the lost *K. al-Šāmīl*, as well as several *mufradāt* for Readers included in a Set of 10+. This œuvre, particularly *K. al-Ġāyah*, generated commentaries, possibly within Ibn Mihrān’s own lifetime, from two other Fārsī scholars: ‘Alī b. ‘Abd Allāh al-Fārsī, Abū al-Ḥasan (d. ca. 390), whose *Šarḥ* ‘al-Ġāyah’ is lost, and Abū al-Ḥasan ‘Alī b. Muḥammad al-Fārsī (d. ca. 390), who composed a lost *‘Ilal* ‘al-Ġāyah’. Ibn Mihrān’s own four works plus these two commentaries account for the entirety of fourth-century production on a Set of 10+, establishing a Fārs–Ḥurāsān coupling that underscores this Set of Reading’s origins as a phenomenon of the eastern provinces rather than the Mašriq as a whole. But Ḥurāsān also produced work on other Sets of Readings, notably an unnamed work Abū Naṣr Aḥmad al-Ḥaddādī (d. after 400) on the Set of 7, demonstrating that this Set circulated in the same region contemporaneously with Ibn Mihrān’s more celebrated experimentation with a Set of 10+.

Several well-traveled fourth-century Mašriqī scholars exhibit the extent to which contact with different sub-regions—and, hence, different Sets of Readings—influenced the Set of Readings to which a scholar might choose to dedicate a work. Abū ‘Alī al-Fārisī (d. 377), a native of Fasā in Fārs and a close contemporary his sub-regional compatriot Ibn Mihrān, traveled to Baḡdād to study with Ibn Muḡāhid, where he produced works which exclusively focused on the Set of 7, such as his *K. al-Ḥuḡḡah fī ‘ilal al-qirā’āt al-sab‘*, in which substantial portions of the *K. al-Sab‘ah* are reproduced with letter-perfect accuracy.⁵⁰ Ibn Ḥālawayh (d. 370), originally from Hamadān, likewise moved to Baḡdād to study with Ibn Muḡāhid, where he composed two works on the Set of 7; however, upon relocating to Ḥalab he apparently dedicated his *K. al-Badī‘* to the Hamdanid ruler Sayf al-Dawlah (re. 333–56), a work on a Set of 7+1 that reflects the local Šāmī preference for an additional Reading to the more widely circulating Set of 7.⁵¹

⁵¹See the note on the flyleaf of the manuscript at Ibn Ḥālawayh, *K. al-Badī‘*, Dublin, Chester Beatty Library, Ar. 3051, fol. 1r. URL: https://viewer.cbl.ie/viewer/image/Ar_3051/11/. The Arabic reads: *hādā l-kitābu ta’līfu l-šayḥi l-fāḍili ḡamālī l-udabā’i wazīri l-fuḍalā’i Abī ‘Abd Allāh al-Ḥusayn b. Ḥālawayh qaddasa llāhu rūḥahū allafahū li-l-amīri l-ḡalīli Sayfi l-Dawlati al-Ḥamdānī raḥimahū llāhu kānat waḥdahu bni Ḥālawayhi sanati sab‘īna wa-ṭalāṭmi’atin qālahū al-Yāfi ‘fī ta’rīḥih [= Mir’āt al-zamān]; a marginal note in the same hand continues: *wa-kānat waḥdahu l-amīri Sayfi l-Dawlati l-Ḥamdānī sanati sittin wa-ḥamsīna wa-ṭalāṭmi’atin qālahū al-Yāfi ‘wa-ḡayruḥ*. Compare with a further text, reportedly entitled “*kitāb muḡadwal fī al-qirā’āt*,” dedicated to ‘Aḡud al-Dawlah (re. 338–72), documented in Hamdan, *MM*, 109n2. Consult further the references in Ibn Ḥālawayh, *K. al-Badī‘*, ed. Ḡāyid Zaydān Muḥlif (Baghdad: Dīwān al-Waqf al-Sunnī and Markaz al-Buḥūṭ wa-l-Dirāsāt al-Islāmiyyah), 3 (Editor’s Introduction).*

The co-existence of various Sets of Readings across these sub-regions militates against any straightforward narrative of “canonization” of the Set of 7 throughout the Mašriq, much less Iraq. Even in this latter locale, within the generation of Ibn Muğāhid’s own students and contemporaries, continuity in terms of production of works on the Set of 7 Readings was not a given. In fact, region-wide continuity on a given Set of Readings would not be achieved until the next century, a period dominated by the production of works on a Set of 10+ Readings.

The fifth century: The “maximalist” turn and regional alignment on the Set of 10+

The fifth century marks the principal turning point in Mašriqī scholars’ attraction to works on a Set of 10+. Production of works in this Set of Readings expanded from the aforementioned six total works in the fourth century to twenty-two in the fifth. A word on how these regional totals are reckoned: a work is assigned to the region in which it was produced, which is not always the region of its author’s birth. Al-Huḍalī (d. 465), a native Mağribī, composed his maximalist *K. al-Kāmil* in the Mašriq; conversely, the Mašriqīs Abū ‘Alī al-Mālikī (d. 438) and Naṣr al-Fārsī (d. 461) both wrote their works on a Set of 10+ in Egypt. The works of such inter-regional authors are counted under both regions, since they belong to both stories; readers should therefore not take an author’s origin as an index of where he wrote, nor expect the regional totals for a given century to sum to the number of works it contains. The most notable feature of this wave of production is a “maximalist” impulse, which apparently drove authors to compile works documenting far more than 10 Readings. The first dedicated *qirā’āt* work in which this tendency is documented is the *K. al-Muntahā* by Abū al-Faḍl al-Ḥuzā’ī (d. 408), in which he brought together fifteen Readings. Abū ‘Alī al-Ahwāzī (d. 446) compiled perhaps eighteen or twenty-one Readings in his lost *K. al-Iqnā’*. The maximalist tendency reached its fullest expression in al-Ahwāzī’s students, Abū Ma’šar al-Ṭabarī (d. 478) and Abū Bakr al-Rūḍbārī (d. 489), each of whom reused the text of *al-Iqnā’* apparently in its entirety, adding documentation of additional Readings, so that each work describes twenty-four Readings. Al-Rūḍbārī’s output is especially notable, as it marks the second major tradition of a Set of 10+ to reach Ḥurāsān, independent of Ibn Mihrān’s circle of influence in Nīsābūr.

Ḥurāsānī production of Set-of-10+ works in this period is oriented almost entirely toward Ibn Mihrān's *al-Ġāyah*, extended into the fifth century through the commentarial tradition it inspired, e.g., Abū al-Ḥasan al-Sa'īdī al-Ḥaddā's (d. ca. 410) lost *ṣarḥ* of the work. Abū 'Abd Allāh al-Andarābī's (d. ca. 470) *K. al-Īdāh* likewise supplements rather than displaces the Nīsābūrī line: it takes the eleven Readings of *al-Mabsūṭ* as its base and adds the *iḥtiyārāt* of Abū 'Ubayd al-Qāsim b. Sallām (d. 224) and Abū Ḥātim al-Siğistānī (d. 255), extending the set of Readings transmitted by Ibn Mihrān rather than substituting a new configuration of Readers. Iraqi authors of the first half of the fifth century, by contrast, focused on composing works on ten or eleven Readings; Aḥmad b. Riḍwān al-Ṣaydalānī (d. 423), Abū 'Alī al-Mālikī (d. 438), Ibn Ṣittā (d. ca. 445), and Ibn Fāris al-Ḥayyāt (d. 452) all fit this trend. By mid-century, a Set of 10+ had become the default orientation for new Iraqi compositions, a position which continued into the next century.

Mašriqī production of works on a Set of 7+1 halved: five Mašriqī works on this Set are attested for the fifth century—among them al-Ahwāzī's *al-Wağīz* and Abū Ma'sar al-Ṭabarī's (d. 478) *K. al-Talḥīṣ fī al-qirā'āt al-ṭamān*, the only two of the five to survive—compared to ten in the fourth century.⁵² As for the Set of 7, Mašriqī production declined from twenty-four works in the fourth century to seven in the fifth, three of which were authored by Iraqis; akin to the situation in the fourth century, nearly all of these works on the Set of 7 Readings are lost.⁵³ While this allegiance to the model set by Ibn Muğāhid's *Sab'ah* is striking, the near total loss of Mašriqī works on the Set of 7 Readings first observed in the preceding century makes it difficult to discern the relationship between the works in this Set, in particular.

The scale of these shifts in composition—a tripling of Set of 10+ production alongside a two-thirds decline in the Set of 7—accounts for much of the Mašriqī contribution to the divergence registered in Figure 7 and Figure 8.

⁵²In order of death date, the five are: Abū al-Faḥ Fāris b. Aḥmad al-Ḥimṣī al-Ḍarīr (d. 401), *K. al-Manša' fī al-qirā'āt al-ṭamān* (Appendix B.2.11); Abū al-Ḥasan 'Alī b. Ġa'far al-Sa'īdī al-Ḥaddā' (d. ca. 410), *Tabṣirat al-bayān fī al-qirā'āt al-ṭamān* (B.2.12); al-Ahwāzī (d. 446), *K. al-Wağīz* (B.2.14); Abū Ma'sar 'Abd al-Karīm b. 'Abd al-Ṣamad al-Ṭabarī (d. 478), *K. al-Talḥīṣ fī al-qirā'āt al-ṭamān* (B.2.17); and Abū Bakr Aḥmad b. Muḥammad al-Ḍarīr al-Harawī (d. 489), *K. al-Taḍkirah fī al-qirā'āt al-ṭamāniyah* (B.2.18). The three lost works are those of al-Ḥimṣī, al-Sa'īdī, and al-Harawī.

⁵³The authors are Abū Naṣr Aḥmad b. Muḥammad al-Haddādī (d. after 400), al-Ḥuzā'ī (d. 408), Abū al-Qāsim 'Abd al-Ġabbār b. Aḥmad al-Ṭarsūsī (d. 420), Aḥmad b. Masrūr al-Ḥabbāz (d. 442), al-Ahwāzī (d. 446), although it is possible that his *K. al-Mūğāz* (Set of 7) was written after his arrival in Dimašq in 390, Abū al-Ḥaṭṭāb al-Ṣūfī (d. 476), and 'Alī b. 'Abd al-Raḥmān al-Bağdādī (d. 497).

The Dirichlet-smoothed estimate, which treats each century independently, concentrates nearly the entire fourth-to-fifth-century JSD jump on this side of the equation: the Mašriqī distribution swung from a multi-polar fourth century (in which all three Sets established patterns of sub-regional influence) to a fifth century dominated by a Set of 10+. The model-based estimate, by contrast, spreads this transition across the full period as a gradual linear trend—a smoothing that, in light of the evidence presented here, understates the seismic shift represented by Mašriqī scholars' attraction to documenting Readings well beyond Ibn Muğāhid's 7.

The sixth century: Consolidation of the Set of 10+

Of Mašriqī works produced in the sixth century, twenty-four of thirty (80%) transmit a Set of 10+. The geographic center of gravity consolidated around the Bağdād–Wāsiṭ–Hamaḍān axis. The culminating figures are Abū al-‘Izz al-Qalānisi (d. 521) and Sibṭ al-Ḥayyāt (d. 541), whose works represent the mature Iraqī corpus on ten and eleven Readings. The works of these scholars eventually reached al-Šām, and became the preserve of the outstanding transmitter of the Readings, Tāğ al-Dīn Abū Yumn al-Kindī (d. 613), underscoring that the development of the corpus depended, at least in part, on specific teachers who sustained transmission networks across sub-regional boundaries.⁵⁴ Al-Kindī's preeminence within the broader Mašriqī pedagogical tradition will be treated in greater detail, below.

In the eastern sub-region of Ġibāl-Ṭabaristān, Abū al-Karam al-Šahrazūrī (d. 550) composed *al-Miṣbāḥ al-zāhir fī al-‘ašr al-bawāhir* and Abū al-‘Alā’ al-Hamaḍānī (d. 569) *K. Ġāyat al-iḥtiṣār fī al-qirā’āt al-‘ašr*—both extant works on a Set of 10+, each of which conforms to “the” Set of 10+ recognized by later Mašriqī authors, such as Ibn al-Ġazarī in his *Našr al-qirā’āt al-‘ašr*. Likewise, in Fārs, Abū Ḍarr al-Yazdī (d. after 580) continued to produce major compilatory works on a Set of 10+, including *Ġāyat al-muntahī wa-nihāyat al-mubtadī fī al-qirā’āt al-‘ašr*, *K. al-Muntaqā fī al-‘ašarah*, and a compression (*muḥtaṣar*) of the *Muntaqā*. In addition to illustrating Mašriqī authors' convergence on a unified Set of 10+ Readings, al-Yazdī's pairing of the *Muntaqā* with its own

⁵⁴Consult the references in Tayyar Altıkulaç, “Ebū’l-Yūmn el-Kindī,” *TDVİA*.

abridgement illustrates the practice of *auto-compression*: the composition by a single author of both a base work and an abridgement or elaboration of his own text, also attested earlier in the century in Sibṭ al-Ḥayyāt's publication of the descriptive catalogue *al-Iḥtiyār* paired with the lost didactic poem *Irādat al-tālib*. This format would become very popular in the Mağrib, where the base text-commentary pairing became a hallmark of regional scholarship, as discussed on the section on pedagogy, below.

Works on a Set of 7+1 effectively disappeared from Mašriqī production after the mid-sixth century. The latest Mašriqī authors of this Set—Ibn Abī Mušayraḥ al-Ḥaḍramī (d. 560) of the Ḥiğāz and Abū 'Abd Allāh al-Fārsī (d. 565) of Fārs—represent the last vestiges of its production for the period surveyed. The Set of 7 contracted to a similarly marginal presence: only four works are attested for sixth-century Mašriqī authors, such as al-Bārī' al-Dabbās (d. 524) in his lost *al-Šams al-munīrah fī al-qirā'āt al-sab' al-šahīrah*, Sibṭ al-Ḥayyāt's *al-Īğāz* and the lost *al-Mu'ayyadah*, and Ibn al-Harrās's (d. 580) *K. al-Bahğah* (lost). Notably, production in the Set of 7 was sustained almost entirely by authors whose primary output was on a Set of 10+.

The seventh century

The seventh century yields only six works by three Mašriqī authors who remained in the region—Muntağab al-Dīn al-Hamaḍānī (d. 643), who crossed to the Mağrib, is treated with the inter-regional scholars below—but their distribution signals a shift in the production of works on different Sets of Readings. With respect to the now well-established Set of 10+, Muḥammad b. Maḥmūd al-Ṭūsī (d. ca. 620) of Ḥurāsān produced *Bustān al-mubtadī*, an abridgement of Ibn Mihrān's *al-Ġāyah*; and Ibn Dillāh al-Wāsiṭī (d. 653) composed two works entitled *K. al-Mubhirah fī al-qirā'āt al-'ašarah* and *K. al-Muğniyah fī al-qirā'āt al-'ašarah*. On the Set of 7, Ibn Dillāh also produced *Hidāyat al-rifāq fī qirā'āt al-sab'ah a'immat al-āfāq*, confirming the pattern observed in the sixth century of Mašriqī scholars writing on both Sets. Šu'lah al-Mawšilī (d. 653), who died at only thirty-two years of age, on the other hand, focused his production exclusively on the Set of 7: *K. al-Šum'ah fī al-qirā'āt al-sab'ah* and the

celebrated *Kanz al-ma'ānī fī šarḥ 'Hirz al-amānī'*—both commentaries on *al-Šāṭibiyyah*, reflecting the increasing popularity of Mağribī works in the Mašriq during this period, as discussed below.

Summary

Viewed across the centuries, the Mašriqī trajectory resolves from a rather mixed picture in the earliest phase into a clear preference for a Set of 10+ Readings by the middle of the fifth century. The fourth century was multi-polar: the Set of 7 dominated in Iraq and al-Šām, a Set of 7+1 established itself in al-Šām, and a Set of 10+ first appeared in Ḥurāsān. The fifth century saw a decisive maximalist turn, with a Set of 10+ tripling in production while the Sets of 7 and 7+1 contracted sharply. The sixth century consolidated a Set of 10+ as the default orientation for new Mašriqī compositions, whereas the Set of 7 was sustained almost entirely by authors whose primary output was on the larger Set. The seventh century, with only three active authors surveyed, defies any categorical statement although the documented turn toward the Set of 7 portends a shift in regional dynamics, covered more fully in the section on Inter-regional scholars, below.

The Mağrib

The growth of the *qirā'āt* discipline in the Mağrib forms in many respects tracks with that of the Mašriq; in multiple cases, a through-line of developments that started in the Mašriq and reached their full potential in the Mağrib can be detected. Yet despite numerous commonalities, Mağribī *qirā'āt* scholars as a whole displays a very different profile from their Mašriqī counterparts in terms of their overall profile within the transcontinental network of *qirā'āt* scholarship, the Sets of Readings they preferred, their mode of presenting the Sets of Readings, and their ability and willingness to engage with works which originated in a different region.

The fourth century: al-Muẓaffar b. Aḥmad al-Miṣrī (d. 333)

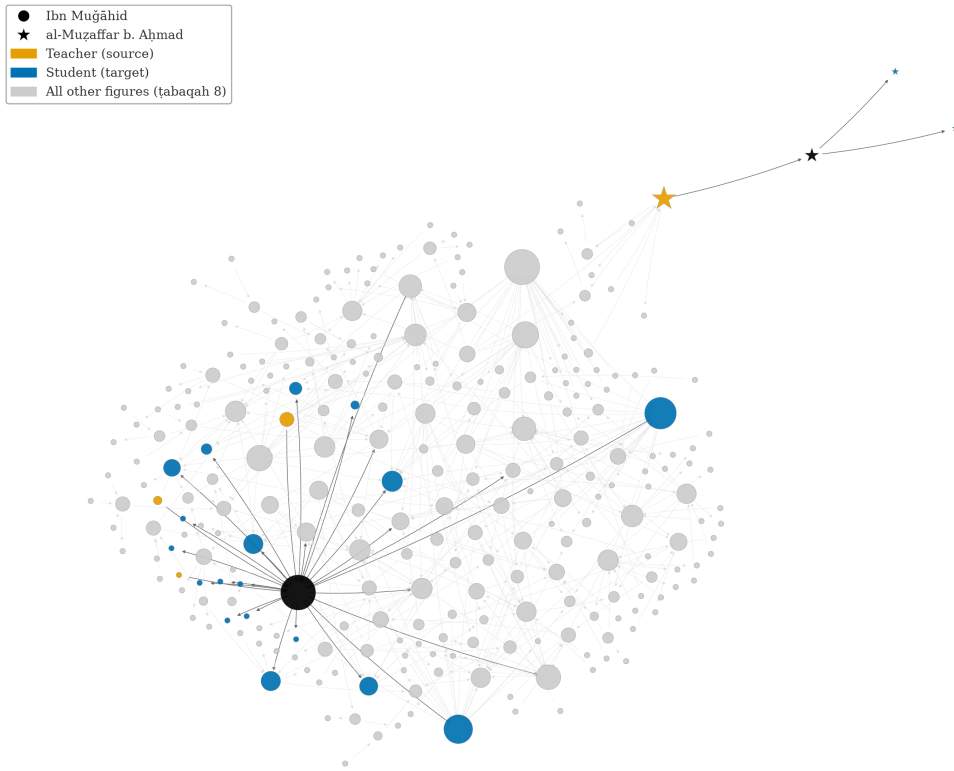

The only attestation of native Mağribī production in the discipline of *qirā'āt* for the period surveyed is al-Muẓaffar b. Aḥmad al-Miṣrī's (d. 333) lost *K. Iḥtilāf al-sab'ah*. As the oldest known Mağribī work on the Set of 7, *K. Iḥtilāf al-sab'* provides a unique point of access to the early development of the *qirā'āt*. Its author was stationary, with no recorded travel beyond Egypt, and his work left no discernible legacy through obvious forms of text reuse, such as inspiring the production of commentaries. Moreover, nearly two centuries elapsed before another text by an Egyptian author is recorded in our corpus. These circumstances pose an important, and as yet to our knowledge, unaddressed question: Does al-Muẓaffar's *K. Iḥtilāf al-sab'ah* reflect an independent, indigenous Egyptian tradition of documenting the 7 Readings, or was this work dependent in some way on Ibn Muğāhid's *K. al-Sab'ah*, a title widely recognized to have had a unique influence on the dissemination of the Set of 7 Readings?⁵⁵

Given the parlous state of our information about both al-Muẓaffar b. Aḥmad himself and his work, the following remarks should be treated as subject to further qualification. Nevertheless, an examination of the personal networks of students and teachers for both al-Muẓaffar and Ibn Muğāhid, as recorded in al-Dahabī's *MQK*, should shed light on the potential intersection of authorial programs from the Mašriq (as represented by Ibn Muğāhid) and Mağrib (as represented by al-Muẓaffar). Both figures appear in the eighth *ṭabaqah* of al-Dahabī's *MQK*; the network for all figures from this *ṭabaqah*, with both al-Muẓaffar b. Aḥmad and Ibn Muğāhid highlighted, is visualized in Figure 10:⁵⁶

The two authors' personal networks do not intersect directly—they share no immediate teachers or students—and each figure represents very different structural and epistemic portions of the *qirā'āt* network across the third and fourth centuries. This distance between them can be formalized through metrics of Social Network Analysis (SNA),

⁵⁵See, for instance, the contention by Bergsträßer and Pretzl, *GdQ*, 3.183, 526: “Against this historical background the revolution of the sciences of the Koran that Ibn Muğāhid initiated can be illustrated.”

⁵⁶The visualization is based on ongoing research to extract and computationally analyze the entire *qirā'āt* network preserved in *MQK*, using the *Network Extraction from Historical Arabic Documents (NEHAD)* toolkit developed by the author, which is currently in preparation for publication.

265 Nodes | 423 Edges | Node size $\approx$ Degree | Teacher $\rightarrow$ Student

Figure 10: Transmission network of the eighth *ṭabaqah* in al-Dahabī's *MQK*, showing the completely disconnected personal networks of al-Muzaḥḥar b. Aḥmad (star) and Ibn Muğāhid (circle).

such as “geodesic distance.”⁵⁷ Geodesic distance measures the least number of “steps” it takes to link one figure to another within the network, using only the documented paths therein. Within the eighth *ṭabaqah* of *MQK*, Ibn Muğāhid is on average approximately 2.8 steps away from every other scholar, and the furthest point from him in the network lies six steps away.⁵⁸ By way of contrast, al-Muẓaffar b. Aḥmad sits at a remove of five steps from Ibn Muğāhid, a distance surpassed only by al-Muẓaffar’s students, ranking him among the most peripheral figures to one of the leading lights of Baġdādī *qirā’āt* scholarship. This confirms in quantitative terms the impression conveyed by a visual inspection of Figure 10, as well as other basic SNA statistics: Ibn Muğāhid and al-Muẓaffar, despite being near-exact contemporaries, occupied remote positions within the same *qirā’āt* network.⁵⁹

This formal understanding of the distance between Ibn Muğāhid from al-Muẓaffar b. Aḥmad in al-Ḍahabī’s presentation of the contemporaneous *qirā’āt* network can be substantially nuanced by a more qualitative inspection of the data provided in *MQK*. Al-Muẓaffar b. Aḥmad had only one known teacher, Aḥmad b. ‘Abd Allāh b. Muḥammad b. Hilāl al-Azdī (d. 310), the sole figure that connects the al-Muẓaffar sub-graph to the rest of the *qirā’āt* network; al-Ḍahabī names him without further elaboration. By contrast, al-Ḍahabī records three teachers for Ibn Muğāhid and discusses the nature of their personal interactions extensively.⁶⁰ The dissimilarity becomes even clearer when considering the two figures’ reputation as teachers whose influence drove the continued development of the *qirā’āt*

⁵⁷ Mark E.J. Newman, *Networks: An Introduction*, second ed. (Oxford: Oxford University Press, 2016), 132–33 (§ 6.11.1).

⁵⁸ This constraint is reminiscent of the parlor game, “Six Degrees of Kevin Bacon,” a basic formal description of which can be found at Patrick Reynolds, “The Oracle of Bacon” (1999–). URL: <https://www.oracleofbacon.org/ack.php>. This application is but one illustration of the “small world phenomenon” first posed by Stanley Milgram (d. 1984), and formalized for rigorous sociological analysis in Duncan J. Watts, “Networks, Dynamics, and the Small-World Phenomenon,” *American Journal of Sociology* 105, no. 2 (1999):493–527. doi:<https://doi.org/10.1086/210318>.

⁵⁹ Three further SNA measures sharpen the contrast between the two scholars. *Degree* is the total number of teachers and students a scholar has documented in the network. *Betweenness centrality* measures how often a scholar lies on the shortest path between any two other scholars (a bridge-vs-peripheral index). And *hub* is a score (HITS) that rises when a scholar is cited as a teacher by others who are themselves widely cited as teachers. These network statistics are computed over the documented *ṭabaqah*-8 graph (260 figures), excluding the four unnamed students and the inferred third teacher that are rendered alongside Ibn Muğāhid in Figure 10 for completeness. Ibn Muğāhid has a degree of 23—the three teachers and twenty students documented for him across the *ṭabaqah*; a betweenness centrality of 0.0083; and a hub score of 0.0987, the highest of any figure in the *ṭabaqah*. Al-Muẓaffar has a degree of 3, a betweenness of 0.0001 (statistically indistinguishable from the graph median and *ṭabaqah* minimum of 0), and a hub score effectively 0.

⁶⁰ al-Ḍahabī, *MQK*, 1.534–35, documents Ibn Muğāhid’s connections, and specifically the terminology which Ibn Muğāhid used to document these connections, to the following figures: Qunbul al-Makkī (d. 291), Abū al-Za’rā’ ‘Abd al-Raḥmān b. ‘Abdūs (d. ca. 280), and ‘Abd Allāh b. Kaṭīr “al-Ṣadūq”, also known as “al-Ṣaġīr” (d. late third c.?; cf. Ibn al-Ġazārī, *ĠN*, 1.445 №853). Notable here is al-Ḍahabī’s focus on the methods of transmission by *tilāwah*, as opposed to the much more extensively documented *riwāyah* pathways that Ibn Muğāhid himself provides in *K. al-Sab’ah*. The formal and functional differences between *riwāyah* and *tilāwah* transmission in the formative period of the *qirā’āt* discipline comprises the subject of a forthcoming publication by the present author.

discipline. Al-Ḍahabī only records two students for al-Muẓaffar: the grammarian Muḥammad b. Ḥurāsān al-Ṣiqillī (d. 386), who is known primarily as the transmitter of the works of the famous Egyptian grammarian Abū Ġa'far (Ibn) al-Naḥḥās (d. 338); and Muḥammad b. 'Alī b. Aḥmad al-Uḍfuwī (al-Uḍfuwī, d. 388), who authored an influential *tafsīr* entitled *al-Istignā' fī 'ulūm al-Qur'ān*, itself an important source of *qirā'āt* data, that was reused in its own right throughout the Mağrib.⁶¹ Al-Ḍahabī opens the discussion of Ibn Muğāhid's students, however, by stating that their numbers were legion (*qara'a 'alā bni Muğāhidi umamun lā yaḥsūn*), and proceeds to document eighteen students, among them luminaries of a long-tailed generation of scholars such as Šāliḥ b. Idrīs (d. 345), Abu Ṭāhir Ibn Abī Hāšim (d. 349), Abū 'Īsā Bakkār b. Aḥmad (d. 353), Abū Bakr al-Šaḍā'ī (d. 373 or 376), and Abū al-Farağ al-Šanabūḍī (d. 380 or 388), to name only those associated primarily with Bağdād. Beyond the students named in his own tarğamah, al-Ḍahabī's eighth *ṭabaqah* documents a further two students for Ibn Muğāhid in the entries of other scholars, so that the network as a whole records twenty students alongside three teachers for him.

Although the bibliographic evidence pertaining to al-Muẓaffar b. Aḥmad's *K. Iḥtilāf al-qurrā' al-sab'* remains far from conclusive, close examination of the existing record with both computational and traditional prosopographical methods sheds extensive light on the conditions of its composition. The combination of the (near) simultaneity of Ibn Muğāhid's and al-Muẓaffar's careers along with the remoteness of and differences between Ibn Muğāhid's and al-Muẓaffar's personal networks provides compelling evidence that neither one of these figures influenced the other's composition of a work on the Set of 7.

No other indigenous, fourth-century Mağribī authors are recorded in the database, meaning no other works on any Set of Readings is attested for this period. The Set of 7+1, however, arrived in Egypt during this century through Šāmī émigrés, most notably Abū al-Ṭayyib Ibn Ġalbūn (d. 389) and his son Abū al-Ḥasan (d. 399). The migration of the Ibn Ġalbūns, as well as other Šāmī scholars, at this early date set the stage for al-Dānī's encounter with the Sets of 7 and 7+1 during his stay in Egypt.

⁶¹ On al-Ṣiqillī, consult Ibn al-Ġazarī, *ĠN*, 2.13637 №2989. On al-Uḍfuwī, consult the references in M. Suat Mertoğlu, "Üdfüvî, Muhammed b. Ali," *TDVİA*; and Nāhid Muḥammad 'Ayyāš Ramaḍān, "Maḥṭūṭ 'al-Istignā' fī 'ulūm al-Qur'ān': Mumayyazātuhū wa-qīmatuhū al-'ilmiyyah wa-mu'allifuh," *Mağallat al-'Arabiyyah li-l-Dirāsāt al-Islāmiyyah wa-l-Šar'iyyah* (Egypt) 18 (2022): 16–89.

The fifth century: The crystallization of the primary (7) and secondary (7+1) Mağribī corpora

The fifth century is the formative period for Mağribī *qirā'āt* production: thirty-six works in total, of which twenty-six transmit the Set of 7, five a Set of 7+1, and five a Set of 10+. Unlike the Mašriq in the fourth century, however, the developments which took shape during this century did not result in what we referred to as a “multi-polar” region as was seen in the Mašriq, with different sub-regions adopting different Sets of Readings. Rather, Mağribī authors developed a dual-layered corpus: a primary body of works built around the Set of 7, and a secondary body alongside it acknowledging the Reading of Ya'qūb al-Ḥaḍramī (d. 205). The geographical center of gravity of literary production shifted decisively from the previous century, with the densest concentration of activity centered in al-Andalus.

The Primary corpus: The Set of 7

The central figure in the adoption of the Set of 7 Readings as the primary corpus for the region is the Andalusī Abū 'Amr al-Dānī (d. 444), whose eight works on the Set of 7 alone account for nearly one third (31%) of the century's total production in this Set. Al-Dānī's output furthermore spans a remarkable range of formats: the encyclopedic descriptive catalogue *Ġāmi' al-bayān fī al-qirā'āt al-sab' al-mašhūrah*, its concise abridgement *K. al-Taysīr*, didactic poetry (*al-Urğūzah al-munabbihah*, *K. al-Iqtīṣād*), monographs on individual Readers (*K. al-Tahdīb*, *K. Iḥtilāfihim fī al-yā'āt*), and pedagogical summaries (*Tabṣirat al-mubtadī*, *Taḍkirat al-ḥāfiẓ*). The breadth of this output is itself significant: al-Dānī was not merely composing works on the Set of 7 at random, but rather building a complete instructional paradigm, including works suited to every level of competence and covering the breadth of the discipline. A critical mass of stationary Andalusī scholars sustained the discipline alongside al-Dānī. Ismā'īl b. Ḥalaf al-Naḥwī (d. 455) produced three works including *K. al-Unwān* and a now lost abridgement (*iḥtiṣār*) of Abū 'Alī al-Fārsī's (d. 377) *K. al-Ḥuğğah*;⁶² al-'Āṣī al-Iṣbīlī (d. 470) composed two lost works, *K. al-*

⁶²Consult the documentation at Fierro (ed.), *HATA*, id531. URL:<https://www.eea.csic.es/red/hata/obra.php?ido=531>. Similar works are ascribed to Makkī b. Abī Ṭālib Ḥammūš (Appendix A.2.5), *HATA*, id351. URL:<https://www.eea.csic.es/red/hata/obra.php?ido=351>; and Muḥammad b. Šurayḥ al-Ru'aynī (Appendix A.2.13), *HATA*, id657. URL:<https://www.eea.csic.es/red/hata/obra.php?ido=657>.

Taḍkirah and *K. al-Muḥaḍḍab*; and Sulaymān b. Nağāḥ (d. 496), al-Dānī’s student, contributed a didactic poem, discussed in further detail below.

The founding generation of Ifrīqī scholars from this century stands out for their exceptional mobility: all seven works of this period from Ifrīqiyah are attributed to scholars who traveled beyond the sub-region. Ibn Sufyān al-Qayrawānī (d. 415), author of *K. al-Hādī*, and Makkī b. Abī Ṭālib (d. 437), who produced *K. al-Tabṣīrah* and *al-Kašf*, were inter-regional scholars whose formation was shaped by sustained contact with the Mašriqī environment; al-Mahdawī (d. 440) later traveled westward to al-Andalus. The complete absence of stationary production distinguishes Ifrīqiyah from al-Andalus, which sustained a robust locally rooted tradition alongside mobile scholars. The high mobility profile of Ifrīqī scholars was compounded by the Hilālīan sack of al-Qayrawān in 449/1057, which devastated the city’s institutions and dispersed its literate elites, a development which makes the partial collapse of the Qayrawānī footprint in the subsequent century difficult to separate from the broader geo-political context without much further research.⁶³

In Egypt, only a single locally anchored author, al-Mu‘addil al-Miṣrī (d. ca. 500), produced a work on the Set of 7 entitled *K. ‘Umdat al-intihāb*, and, like al-Muzaḥḥar b. Aḥmad before him, operated in apparent isolation from broader Mağribī networks.

The Secondary corpus: The Set of 7+1

Al-Dānī encountered a Set of 7+1 through the Šāmī émigrés in Egypt, but he recast it in a distinctively Mağribī format. Al-Dānī did not adopt the Mašriqī “1 Book/8 Readings” model that had characterized Šāmī *qirā’āt* literature in the fourth century—and with which al-Dānī came into direct contact, especially in the form of *K. al-Manša’*

⁶³On the historical developments that led up to the Hilālīan incursion see Mohamed Talbi, “al-Qayrawān,” *EI2*, with additional comments in Sylvie Denoix, “Founded cities of the Arab World from the seventh to the eleventh centuries,” in *The City in the Islamic World*, ed. Salma Khadra Jayyusi *et al.*, 2 vols., Handbook of Oriental Studies - Section 1: The Near and Middle East 94 (Leiden: Brill, 2008), 115–39, at 126–29 and the bibliography cited there. On the rhetorical importance of the fall of the city, see now Nizar F. Hermes, “‘It Eclipsed Cairo and Outshone Baghdad!’: Ibn Rashīq’s Elegy for the City of Qayrawan,” *Journal of Arabic Literature* 48, no. 3 (2017):270–97; and idem, “‘Woe is me for Qayrawan!’ Ibn Sharaf’s *Lāmiyya*, the Plight of Refugees and the Cityscape,” in *The City in Arabic Literature: Classical and Modern Perspectives*, ed. Gretchen Head and Nizar F. Hermes (Edinburgh: Edinburgh University Press, 2017), 81–102.

fi al-qirā’āt al-ṭamān composed by his teacher, the Šāmī émigré Abū al-Faṭḥ Fāris al-Ḥimsī (d. 401). Rather, he composed a separate *mufradah* of the Reading of Ya’qūb alongside his numerous works on the Set of 7, inaugurating the distinct “7 + *mufradah* Ya’qūb” configuration. This format acknowledged the Reading of Ya’qūb al-Ḥaḍramī without compromising the primacy of the Set of 7: a Mağribī solution to the attraction of a well-documented and highly-regarded eighth Reading Tradition.⁶⁴

The remaining Set-of-7+1 works of this century reflect the thinness of the secondary corpus relative to the primary one. Al-Dānī’s student Ibn Šurayḥ al-Išbīlī (d. 476) was the first to imitate this format, composing his own *mufradat* *Ya’qūb* alongside two works on the Set of 7. The older Šāmī tradition of 1 Book/8 Readings also persisted despite al-Dānī’s intervention. The only extant example of this type, a short title attributed to Ibn Ḥazm (d. 456) entitled *al-Qirā’āt al-mašhūrah fi al-’amṣār*, merely lists, over the course of three pages of edited text, the 7 Readers and Ya’qūb and provides the *isnāds* that Ibn Ḥazm had received back to those figures. A second, lost, work by Ibn al-Bayyāz (d. 496) entitled *K. al-Nabḍ al-nāmiyah fi al-qirā’āt al-ṭamāniyah*, also seems to have adopted the Šāmī format. With only five works produced during this century, a Set of 7+1 represents a genuinely secondary corpus, shared across the sub-regions of Egypt and al-Andalus—when compared against the publication of twenty-six works on the Set of 7 across the entire region.

An author’s production of works in both of these Sets of Readings is the key indicator of how they viewed the discipline of *qirā’āt* as a system of knowledge production. Al-Dānī composed eight works on the Set of 7 alongside a *Mufradat Ya’qūb*; his student Ibn Šurayḥ al-Išbīlī (d. 476) produced *K. al-Kāfi* and *K. al-Taḍkīr* (both Set of 7) alongside his own *Mufradat Ya’qūb*. In both cases, the same author produced works in both Sets, and in both cases the Set of 7 output far exceeded the Set of 7+1 component. This pattern is fundamentally different from the fourth-century Mašriq, where different scholars in different sub-regions established a single, dominant Set of Readings. The fifth-century Mağrib, by contrast, presents the same scholars consistently producing works in two Sets. This is

⁶⁴ Ibn al-Ğazarī, *ĞN*, 2.387 records the comment of Abū al-Ḥasan al-Sa’īdī al-Ḥaḍḍā’ (Appendix A.1.24) comparing the completion of the Set of 7 Readings with the Reading of Ya’qūb to the completion of prophethood with the Prophet Muḥammad (*da’atnī nafsī li-ta’līfi kitābin mūğazin fi l-qirā’āti mutammaman bi-Ya’qūbi bni Ishāq fi l-qirā’āti kama tammama l-nabī [...] al-nubuwwāt*).

the earliest evidence for a primary-and-secondary corpus structure: the Set of 7 as the core, the *mufradah* of Ya'qūb as its authorized supplement. The two Sets did not function as competing alternatives but a hierarchy, and the scholars who built them understood them as such. As will be shown below, this dual-corpus pattern persists without interruption across subsequent centuries and sub-regions, from Qurṭubah through Sicily to al-Iskandariyyah.

The case for the appearance of primary and secondary preference for a Set of Readings in the Mağrib during this century can be further bolstered by the contemporaneous reception of Set of 10+ Readings. The evidence with regard to this Set of Readings is unfortunately limited to consideration of a single lost text ascribed to al-Ṭalamankī (d. 429) entitled *K. al-Rawḍah fī al-qirā'āt al-ʿašr*, the earliest known Mağribī work on a Set of 10+ Readings. The consideration *K. al-Rawḍah* within the context of the fifth-century Mağribī discipline of *qirā'āt* illustrates the apparent lack of attraction to Readings not already covered by their primary (Set of 7) and secondary (Set of 7+1) corpora. Furthermore, al-Ṭalamankī appears to have composed this work only after an extended period of travel in the Mašriq, suggesting that access to a Set of 10+ Readings was restricted to those who had direct, personal contact with that region.⁶⁵ On top of this, al-Ṭalamankī's *K. al-Rawḍah* never generated a lasting local tradition of commentary, as was seen to be the case Ibn Mihrān's works on a Set of 10+, particularly *K. al-Ġāyah fī al-qirā'āt al-ʿašr*.

Taken together with the Mašriqī developments described above, the fifth century emerges as the century in which regional divergence of the respective *qirā'āt* paradigms was, in large part, accomplished. The contributions of the Mağribī authors of this century to our understanding of the discipline of *qirā'āt* are extensive: where the fourth century offers only a single Mağribī work—al-Muzaḥḥar b. Aḥmad's isolated *K. Iḥtilāf al-sab'ah*—the fifth produces thirty-six works, concretizing an extensive primary corpus around the Set of 7 and a secondary concentration around the *mufradah* of Ya'qūb that had no effective precursor in this region. As with the Mašriq, the narrative description of Mağribī developments in this century once again closely aligns with the Dirichlet-smoothed JSD

⁶⁵ An alternative explanation of al-Ṭalamankī's sojourn to the east is that he merely returned with a copy of al-Mālikī's *K. al-Rawḍah*, rather than his own composition. Unfortunately, and similar to the case of al-Muzaḥḥar b. Aḥmad's *K. Iḥtilāfāt al-qurrā' al-sab'ah*, the lack of bibliographic details concerning this work prevents us at this time from a more robust examination of this possibility.

estimate (Figure 8), discussed above, which more than doubles between the fourth and fifth centuries, jumping from 18% to 41% of the constrained maximum. This accelerated divergence was the result of both regions simultaneously instantiating opposing preferences—the Mašriqī maximalist wave and general orientation toward a Set of 10+, as opposed the Mağribī consolidation around the Set of 7 with its secondary supplement of the Reading of Ya‘qūb—in the same century. In succeeding centuries, Mağribī scholars would further consolidate the positions that this decisive generation first staked out.

The sixth century: Contraction in al-Andalus, expansion in Egypt

The output of Andalusī scholars shrinks considerably in this century, while at the same time a perceptible shift occurs toward stationary authors and narrower genres; in particular, didactic poems and brief compendia replace the expansive treatises of the preceding century. In al-Qayrawān, the sole sixth-century Ifrīqiyyan work is Ibn Ballīmah al-Qayrawānī’s (d. 514) *K. Talhīṣ al-‘ibārāt bi-laṭīf al-‘iṣārāt*, a descriptive catalogue on the Set of 7; like other Qayrawānīs before him, Ibn Ballīmah was an inter-regional scholar, moving later in his life to al-Andalus, underscoring that the Ifrīqī portion of this network continued to emphasize relatively high rates of mobility. Egypt, by contrast, begins its transformation from place of transit to a scholarly hub specific to the *qirā’āt* discipline, a process driven largely by immigration. Such is the case for two of the most influential Mağribī scholars who bookend this century: Ibn al-Faḥḥām al-Ṣiqillī (d. 516), author of *K. al-Tağrīd*, and al-Šāṭibī (d. 590), whose *al-Šāṭibiyyah* became arguably the single most influential work on the Set of 7 in the history of the discipline.⁶⁶ Each of them had already published their works before relocating to Egypt.

The secondary corpus on a Set of 7+1 continues to develop in this century, with four works—three of which adopt the *mufradah* format, sustaining the “7 + *mufradah*” configuration inaugurated by al-Dānī. Ibn al-Faḥḥām al-Ṣiqillī (d. 516) produced *Mufradat Ya‘qūb*; Šu‘ayb al-Ašğā’ī (d. 538) composed a lost *K. Qirā’at Ya‘qūb b. Iṣḥāq al-Ḥaḍramī*; and Šurayḥ al-Ru‘aynī (d. 539) produced *al-Ġam‘ wa-l-tawğīḥ li-mā infarada bihī Ya‘qūb*. The *mufradah*

⁶⁶See the bibliography in Appendix B.1.73.

format thus passes from al-Dānī and Ibn Šurayḥ in the fifth century to three sixth-century authors—a clear line of imitation spanning a century and a half. The sole representative of the older single-volume approach is Aḥmad b. Muḥammad b. Ḥalaf al-Anṣārī (d. 516), who composed the lost *al-Mufīd fī al-qirā'āt al-tamān*, a descriptive catalogue treating all eight Readings in one work. Crucially, three of the four sixth-century 7+1 authors also produced works on the Set of 7—Ibn al-Fahḥām his *K. al-Tağrīd li-buğyat al-murīd*, al-Anṣārī his (lost) *al-Muqni' fī al-qirā'āt al-sab'*, and al-Ašğā'ī in his (lost) *K. al-Taqrīb wa-l-iš'ār fī maḍāhib al-qurrā' al-sab'ah*—sustaining the dual-preference pattern of same-author, dual-Set production established by al-Dānī and Ibn Šurayḥ in the preceding century. Šurayḥ al-Ru'aynī is the sole exception: his only extant sixth-century contribution is *al-Ġam' wa-l-tawğīh*, with no separate work attributed to him for the Set of 7.

The Set of 10+ Readings is represented by two figures in this century. Ibn Uḥt Ġānim al-Mālaqī (d. 525), was the first stationary Mağribī scholar to compose a work on the Set, specifically his lost *K. Ta'līl al-qirā'āt al-'ašr*. The contrast of Ibn Uḥt Ġānim with al-Ṭalamankī (d. 429), who produced the earliest Mağribī work on a Set of 10+ in the preceding century, is instructive: the latter was an inter-regional scholar who composed *K. al-Rawḍah* only after extended study in the Mašriq, whereas the Ibn Uḥt Ġānim produced his work without any documented eastward travel. Although this development shows that a Mağribī author could compose a work on a Set of 10+ without the direct Mašriqī exposure that had been a prerequisite for al-Ṭalamankī's generation suggests that knowledge of the Set had by then diffused much more extensively through Andalusian networks; however, neither work found a single commentator, much less a committed group of them. A minor commentarial tradition on the Set of 10+ did emerge in the output of 'Ubayd Allāh al-Ḥaḍramī al-Išbīlī (d. 559), a stationary Andalusī scholar who never traveled to the Mašriq but produced the lost *al-Ifṣāḥ*, an abridgement of a work entitled *al-Miṣbāḥ al-zāhir* by his Mašriqī counterpart and close contemporary, al-Mubārak al-Šahrazūrī (d. 550). That a stationary Mağribī scholar had access to, and in the case of 'Ubayd Allāh al-Ḥaḍramī, abridged a Mašriqī work on a Set of 10+, confirms that such texts circulated in al-Andalus without requiring their recipients to have traveled eastward, whereas the absence of any subsequent engagement with 'Ubayd Allāh's abridgement underscores the pattern established in

the preceding century: a Set of 10+ was known, transmitted, and not adopted by Mağribī scholars. The Mağribī reception of Mašriqī works will receive additional attention in the section on Inter-regional scholars, below.

The seventh century: Egypt as the consolidating center

The seventh century witnesses a concentration of activity in Egypt: eight works on the Set of 7 composed by authors who died within roughly fifteen years of one another (636–650). The majority of these works are the products of text reuse—commentaries on al-Šāṭibī’s *al-Šāṭibiyyah*, abridgements of al-Dānī’s *al-Taysīr*, or glosses on earlier compositions—suggesting less an independent tradition than a sustained act of reception and elaboration.⁶⁷ As noted by Rachel Arié, Gary Lieser, and Maribel Fierro and others, this pattern mirrors contemporaneous Egyptian institutions’ absorption of the textual heritage generated over the preceding two centuries in al-Andalus, Ifrīqiyah, and Sicily.⁶⁸

This shift toward Egypt during the seventh century finds its corollary in al-Andalus, which all but ceased as a center of production, and al-Iskandariyyah had become the largest Mağribī hub. Only two Andalusī works are attested: ‘Īsā al-Laḥmī al-Iskandarī’s (d. 629) lost *al-Ġāmi‘ al-’akbar* and Aḥmad al-Qurṭubī’s (d. 643) lost *Muḥtaṣar ‘al-Tabṣirah’*, a compression of Makkī b. Abī Ṭālib’s (d. 437) *K. al-Tabṣirah*. In Ifrīqiyah, the sole work is a lost commentary on *al-Šāṭibiyyah* by ‘Abd al-Raḥmān b. Ismā‘īl b. al-Ḥaddād (d. 640), which the author would later take with him when he settled in the Mašriq. The secondary corpus also persisted into this century: Abū Muḥammad al-Ša‘īdī al-Iskandarī (d. 650) produced both *K. al-Bayān fī ma‘rifat al-ḡam‘ bi-l-qirā’āt al-ṭamān* and a *Mufradat Ya‘qūb* (both Set of 7+1) alongside a compression of al-Laḥmī’s *al-Ġāmi‘ al-’akbar* on the Set of 7, extending the

pattern of same-author, dual-Set production across a third consecutive century and now in a new sub-region.

Contrary, then, to Nasser's portrayal of the production of Mağribī *qirā'āt* works after al-Danī, the region was not a monolith in terms of a preference for a single Set of Readings.⁶⁹ Rather, it is more accurate to describe it as a primary corpus (the Set of 7) coexisting with a secondary corpus (a Set of 7+1) and intermittent exposure to a Set of 10+, discussed in greater detail in what follows.

Inter-regional Scholars

The preceding sections have traced the internal dynamics in each of the Mašriq and Mağrib macro-regions. A third category of actors—scholars whose contributions to the development of the *qirā'āt* discipline spanned both macro-regions—requires separate treatment given their previously mentioned distinctive group profile: more mobile and more productive in terms of their textual output, which itself was far better preserved. Twenty-three such scholars are attested in our survey, but their numbers are not evenly distributed across the period surveyed, instead clustering in the fourth and fifth centuries and thinning remarkably thereafter. The most striking feature of this class is not what Set of Readings or format they wrote their works in, but rather their patterns of travel, varying from the cessation of movement entirely to mass scholarly migration.

Mašriq-to-Mağrib: The Egyptian Bridge and its Closure

Nine scholars traveled from the Mašriq to the Mağrib, most of them to Egypt, producing sixteen works: nine on the Set of 7, five on a Set of 7+1, and two on a Set of 10+. This group divides into two sharply defined clusters separated by nearly two centuries of inactivity. The first cluster, concentrated in the fourth century, comprises three scholars originating in al-Šām—Abū Ṭāhir al-Anṭākī (d. 380) and both Ibn Ġalbūns—together with the Iraqi Ibn Ḥasnūn (d. 386). Together these four produced eleven of the group's sixteen works—seven on the Set of 7 and

⁶⁹ Compare with the consideration of works which exclusively fall within the Set of 7 discussed in both Nasser, "Two-Rāwī Canon," 44–63 (al-Dānī), 64–65 (Abū al-Ṭayyib and Abū al-Ḥasan Ibn Ġalbūn), 66–69 (§§ B The Early *maghribī* Authors, Ibn Ghalbūn and Early Qayrawānī/Andalusī Authors"); and idem, "The Canonizations of the Qur'ān," 100–5.

four on the Set of 7+1 which included Ya‘qūb. All but Abū Ṭāhir al-Anṭākī, who left al-Šām for Qurṭubah in 352, settled in Egypt, creating the Šāmī émigré nexus whose significance for the westward transmission of a Set of 7+1 has been described above. Fāris al-Ḥimšī (d. 401) and al-Ṭarsūsī (d. 420), also Šāmīs, straddled the turn of the fifth century, each one also producing works on the Sets of 7+1 and 7 Readings, which they, too, took to Egypt.

The only two works on a Set of 10+ in this entire group came from non-Šāmī scholars, both of whom are also connected to Egypt: Abū ‘Alī al-Mālikī al-Bağdādī (d. 438), an Iraqi who traveled to Egypt and composed the extant *al-Rawḍah fī al-qirā’āt al-’iḥdā ‘ašr*, and Naṣr al-Šīrāzī al-Fārsī (d. 461), a native of Šīrāz who became “the chief reciter of all of Egypt” (*muqri’ al-diyār al-Miṣriyyah*) and composed *K. al-Ġāmi’ fī al-qirā’āt al-’ašr bi-’ilaliḥā*, based on Abū ‘Alī al-Mālikī’s work. Thus, and in contrast to the reception of al-Ṭalamankī’s (d. 429) *K. al-Rawḍah* in al-Andalus, we find the first evidence of a local tradition in Egypt established around a Set of 10+. This tradition extended into the next generation through al-Mu‘addil al-Miṣrī (d. ca. 500), a stationary Egyptian author who produced *K. Rawḍat al-ḥuffāz*—a work on fifteen Readings which went well beyond what Abū ‘Alī al-Mālikī produced. Yet this Egyptian micro-tradition did not outlive the century of al-Mālikī’s death: no further 10+ production is attested for the period surveyed here in Egypt after al-Mu‘addil, and the Set of 10+ remained, in this sub-region as elsewhere in the Mağrib, a pocket of limited reception rather than a lasting reorientation of local practice.⁷⁰

After Naṣr al-Fārsī (d. 461), no Mašriqī author is attested as having traveled to the Mağrib until Muntağab al-Dīn al-Hamaḍānī (d. 643)—a gap of approximately 180 years. This prolonged closure of the east-west corridor coincides with the Crusader disruption of travel networks across the Mašriq, and particularly al-Šām which served as the primary artery for scholarly travel between the two macro-regions.⁷¹ The geopolitical closure of this corridor and

⁷⁰For further reflections on the impact of Mašriqī works on disciplinary formation in the Mağrib, albeit from an earlier period, see Miquel Forcada, “Books from abroad: The evolution of science and philosophy in Umayyad al-Andalus,” *Intellectual History of the Islamicate World* 5 (2017):55–95. doi:<https://doi.org/10.1163/2212943X-00501003>.

⁷¹For the tumultuous events of this the sixth century, in particular, I rely on the narrative posed in Jonathan Phillips, *The Crusades: 1095–1204*, second ed. (New York: Routledge, 2014), 109–65. Contact between agents of the Byzantine and Fatimid empires in al-Šām during this time generated significant, if oblique, forms of exchange and emergent cultural syntheses, as documented in Teresa Shawcross, *Wisdom’s House, Heaven’s Gate: Athens and Jerusalem in the Middle Ages*, New Approaches to Byzantine History and Culture (London: Palgrave Macmillan-Springer, 2024).

the deepening divergence of the two regional corpora documented above are mutually reinforcing: the corridor shut precisely during the centuries when the two corpora diverged most sharply, and neither process can be fully explained without the other. When Muntağab al-Dīn al-Hamaḍānī (d. 643) finally made the crossing, he produced a single work—a commentary on al-Šāṭibī’s *al-Šāṭibiyyah*, a text on the Set of 7—engaging with the established Mağribī corpus rather than introducing a Mašriqī work.

Mağrib-to-Mašriq: Limited Pockets of Cross-regional Reception

Whereas Mašriqī figures’ contact with the Mağrib remained limited, especially so during the latter part the period under consideration, “Mağribīs in the Mašriq” were so common as to become a trope in later historical writing. For the discipline of *qirā’āt*, fourteen authors are recorded as having traveled from the Mağrib to the Mašriq, producing twenty-nine works: twenty-four on the Set of 7, three on a Set of 7+1, and two on a Set of 10+.

Unlike their Mašriqī counterparts, most Mağribī inter-regional scholars were visitors, not emigrants: Muḥammad b. Sufyān al-Qayrawānī (d. 415), Makkī b. Abī Ṭālib (d. 437), al-Dānī (d. 444), and al-Šāṭibī (d. 590) all returned to their homeland after periods of study in the East.⁷² Except for the last figure, their works on the Set of 7 did not circulate in the Mašriq, where the scholarly environment was moving toward a Set of 10+, although limited pockets of reception of Mağribī works did develop, as discussed below. An exception to this trend is the aforementioned, well-traveled Abū al-Qāsim al-Huḍālī (d. 465), who, although originally from Ifrīqiyah, settled permanently in the Mašriq, where he published his *K. al-Kāmil*, the work describing 50 Readings, the largest descriptive catalogue in the entire corpus and a maximalist project that would have been inconceivable within his region of origin. His permanent settlement in the East, combined with the exceptional scope of his work, sets him apart from every other Mağribī traveler in the survey.

Only two other Mağribī inter-regional scholars composed works on a Set of 10+: the aforementioned al-Ṭalamankī,

⁷²On the latter, see now in particular Zohra Azgal, “Andalus Scholars on Qur’ānic Readings in the Islamic East: The Case of Abū al-Qāsim al-Šāṭibī (538–590 H/1143–1194 CE),” in *The Maghrib in the Mashriq*, 237–56.

and Yahyā b. Ibrāhīm b. Abī Zayd al-Lawwātī al-Mursī, known as Ibn al-Bayyāz (d. 496), who also authored the aforementioned (lost) *K. al-Nabḍ al-nāmiyah fī al-qirā'āt al-ṭamāniyah* on a Set of 7+1, both only after direct contact with Mašriqī transmission networks.

Despite this overall pattern of regional independence, a few works did find limited reception across the macro-regional boundary and in the sixth and seventh centuries. The first instructive case to consider is the reception in al-Andalus of two works by the Mašriqī scholar Abū Ma'šar al-Ṭabarī (d. 478): *al-Ġāmi'*, also known as *Sawq al-'arūs*, one of the most comprehensive works on the Reading Traditions ever composed; and *K. al-Talḥīṣ fī al-qirā'āt al-ṭamān*, a work on a Set of 7+1 in the “1 Book/8 Readings” format. The *HATA* database documents seven Andalusī transmitters of the *Sawq al-'arūs* and nine of the *Talḥīṣ*, spanning nearly two centuries of circulation.⁷³ The transmitters of each work are documented in the following tables; scholars who transmitted both works are marked with an asterisk:

The *Sawq al-'arūs* transmitters:

Name	Death (AH)	Places active
ʿAlī b. Ḥalaf b. Dī al-Nūn al-Iṣbīlī*	498	Qurṭubah, Iṣbīliyyah
Ibn al-Mulawwan ʿAbd al-Ġalīl al-Qurṭubī*	526	Qurṭubah
Aḥmad b. Ḥalaf al-Saraqustī	after 540	Saraqustah
Ibn Ḡuluf al-Ġarnāṭī	541 or 543	al-Ġarnāṭah
al-Qāḍī ʿIyāḍ	544	Sabtah
Ibrāhīm b. Muḥammad al-Dānī	546	Dāniyah
ʿAlī al-Ruʿaynī al-Iṣbīlī*	666	Iṣbīliyyah

The *Talḥīṣ* transmitters:

⁷³ The remarks on the reception of these works cannot be extended to any sub-region beyond al-Andalus, since the only transmitter for either work outside this sub-region attested in *HATA* is al-Qāḍī ʿIyāḍ.

Name	Death (AH)	Places active
‘Alī b. Ḥalaf b. Dī al-Nūn al-Išbīlī*	498	Qurṭubah, Išbīliyyah
Mūsā b. Ḥamīs al-Ġināšī	~520	al-Andalus (not specified)
‘Abd al-Raḥmān al-Saraqusṭī	522	Saraqusṭah
Ibn al-Mulawwan ‘Abd al-Ġalīl al-Qurṭubī*	526	Qurṭubah
Aḥmad b. Tū‘bān al-Andalusī	after 540	al-Andalus (not specified)
al-Yasu‘ al-Ġayyānī	575	Ġayyān, Qurṭubah
Muḥammad b. Ġa‘far al-Balansī	586	Balansiyyah, al-Mursiyyah
Sulaymān al-Kalā‘ī	634	Balansiyyah, al-Ġarnāṭah
‘Alī al-Ru‘aynī al-Išbīlī*	666	Išbīliyyah

The chronological span of the *Talḥīṣ*’s Andalusian transmission—from the late fifth through the second half of the seventh century—confirms that works on a Set of 7+1 continued to circulate actively in al-Andalus well after the tradition had ceased to be productive in the Mašriq. Yet exposure to these works did not reshape Mağribī production norms. Of the ten Mağribī works on a Set of 7+1, six use the “7 + *mufradat* *Ya ‘qūb*” format, and four use “1 Book/8 Readings” configuration standard in the Mašriq. Before the *Talḥīṣ* reached al-Andalus—taking the death of its earliest documented transmitter, ‘Alī b. Ḥalaf al-Išbīlī (d. 498), as a *terminus ante quem*—four Mağribī 7+1 works had been composed, evenly split between the two formats; the six works composed after this date maintained a comparable distribution, with data for non-Andalus sub-regions is too sparse to draw a firm conclusion about the production of works in this Set of Readings. The sole Ifriqī contribution, Ibn al-Faḥḥām’s (d. 516) *Mufradat Ya ‘qūb*, employed the *mufradah* format; and of the Egyptian Abū Muḥammad ‘Abd al-Bārī‘ al-Ša‘īdī’s (d. 650) two works, one was followed the 1 Book/8 Readings format and the other was a *mufradah*. The same observation extends to the influence of *Sawq al-‘arūs* which circulated through seven documented Andalusī transmitters across nearly two

centuries, apparently without stimulating a single new sub-regional, much less Mağribī, work on a Set of 10+. The reception of Abū Ma'šar's works thus illustrates a broader phenomenon: Mašriqī texts on both a Set of 7+1 and a Set of 10+ found willing transmitters in al-Andalus, but the introduction of these works did little to stimulate new production within or alter the compositional norms of the local *qirā'āt* community.

The transmission of al-Dānī's *K. al-Taysīr* eastward offers another nuance to the narrative of limited accommodation of non-regional works. According to the documentation provided by Ibn al-Ğazarī in *ĠN*, *al-Taysīr* reached as far as Bağdād in the sixth century, where Sibṭ al-Ḥayyāt (d. 541) brought it after obtaining it in Makkah around the year 500 from al-Dānī's noted student, 'Abd al-Ḥaqq b. Abī Marwān Ibn al-Ṭalaġī (d. sixth c.).⁷⁴ Around 140 years later, the mass migration of Andalusī scholars to the Mašriq, and particularly Dimašq, proved to be a watershed in bringing the two corpora into contact, as documented by al-Ḍahabī in his *Mu'ğam al-šuyūḥ*.⁷⁵ Therein, he lists the *qirā'āt* works that he himself had collected, specifying a set of five works of Mağribī origin, with particularly robust pathways of transmission for the *al-Taysīr/al-Šāṭibiyyah* pairing:

Table 7: *Qirā'āt* works of Mağribī origin transmitted in al-Ḍahabī's *Mu'ğam al-šuyūḥ*

Al-Ḍahabī’s list of *qirā’āt* works reflects two centuries of the high Maġribī *qirā’āt* tradition, and the individuals who figure in his documented pathways of transmission include a veritable who’s-who of personalities from that region. One of the copies of *al-Taysīr* that al-Ḍahabī obtained came through Muḥyī al-Dīn Ibn al-‘Arabī (d. 638), who in turn obtained it from one most important transmitters of this work, Abū al-Ḥasan Ibn Huḍayl (d. 563).⁸¹ All of al-Ḍahabī’s other pathways for *al-Šāṭibiyyah* converge on ‘Alam al-Dīn al-Saḥāwī (d. 643), the son-in-law of al-Šāṭibī, and the leading *qirā’āt* scholar of Egypt after the former’s death; later in life he decamped to Dimašq, where he became the undisputed reciter-in-residence at a major center of learning, al-Turbah al-Šālihiyyah.⁸² In fact, a closer look at the complete pathways that al-Ḍahabī specifies in his *Mu‘ḡam al-šuyūḥ* reveals that the transmission of these works to Dimašq was accomplished within a narrowly defined period of time, perhaps a few decades between ca. 620–650. The translation of each of Ibn al-‘Arabī’s copy of *al-Taysīr*, the aforementioned works by al-Šāṭibī and al-Saḥāwī himself, as well the copy of Ibn Faḥḥām al-Siqillī’s *Tagrīd* that al-Ḍahabī received through al-Saḥāwī, was accomplished precisely during a period in which large scale immigration permanently relocated both people and thought systems from al-Andalus and other parts of the Maġrib to Dimašq.⁸³

This extensive influx of Maġribī *qirā’āt* literature at the end of the period surveyed adds considerably to the meager

⁸⁰ al-Ḍahabī, *Mu‘ḡam al-šuyūḥ*, 1.135 №131.

⁸² Consult the references in Tayyar Altıkulaç, “Sehâvî, Alemüddin,” *TDVİA*.

⁸³ See in particular a number of works on the movement of scholars and their materials to Dimašq by Louis Pouzet, including “Maghrébins à Damas au VIIe/XIIIe siècle,” *Bulletin d’études orientales* 28 (1975): 167–99; idem, “Un type d’échange culturel interméditerranéen au Moyen-Âge: Les lecteurs du Coran entre l’Andalousie et le Machreq,” in *Actas del XII Congreso de la Unión Europea de Arabistas e Islamólogos (Málaga 1984)* (Madrid: Consejo Superior de Investigaciones Científicas, 1986), 657–78; and idem, *Damas au VIIe/XIIIe siècle: vie et structures religieuses d’une métropole islamique*, Recherches A, Langue arabe et pensée islamique 15 (Beirut: Dar El-Mashreq, 1991). For a focused study of economic shifts during this period, consult Olivia Remie Constable, *Trade and traders in Muslim Spain: The commercial realignment of the Iberian peninsula, 900–1500*, Cambridge studies in medieval life and thought (Cambridge: Cambridge University Press, 1994), 209–39 (§ “Ch. 8: Continuities and changes in Iberian exports after 1212”).

evidence of the reception of such works in the Mašriq. Along with the relocation from Cairo to Dimašq of al-Saḥāwī and his retinue, the most authoritative living link to the historical memory of al-Šāṭibī, the arrival of these texts may in part help explain the immediate reuse of its material by Mašriqīs, such as Šu‘lah al-Mawṣilī (d. 653), and his relative contemporaries from that city.⁸⁴ The *Šāṭibiyyah*, al-Šāṭibī’s versification of the *Taysīr*, thus arrived into the Mašriq from Egypt not as a wholly foreign object but as the poetic form of a work that had already established a foothold in certain Mašriqī cities.⁸⁵ Through the chain al-Dānī → al-Šāṭibī → Šu‘lah, the Mağribī Set-of-7 tradition was carried from al-Andalus through Egypt deep into the Mašriq—the most consequential instance of cross-regional textual reception in the entire survey.

Summary

The inter-regional evidence traces a narrative arc that helps explain features of the development of the *qirā’āt* discipline in both the Mašriq and Mağrib across the entire period under investigation. In the fourth and fifth centuries, the dominant vector of scholarly movement ran from east to west: Šāmī scholars—the Ibn Ġalbūns, Fāris al-Ḥimṣī, al-Ṭarsūsī, and others—migrated to Egypt, carrying with them a Set of 7+1 and establishing the émigré community that proved decisive for the westward transmission of this Set; a similar micro-tradition on the Set of 10+, connected with the *K. al-Rawḍah* of Abū ‘Alī al-Mālikī, is also attested. This corridor of limited cross-regional interaction then suddenly ceased to operate as before: for roughly 180 years, from the death of Naṣr al-Fārsī (d. 461) to the arrival of Muntağab al-Dīn al-Hamaḍānī (d. 643), no Mašriqī scholar is attested as having traveled to the Mağrib, a closure coinciding with the Crusader disruption of al-Šām, by which time the two corpora had already diverged sharply. As the preceding statistical and narrative analysis demonstrates, regional norms were self-sustaining and that inter-regional contact, where it occurred, did not weaken them. Where later Mašriqī texts did reach the Mağrib—as

⁸⁴For other Mawṣilīs from whom al-Ḍahabī directly transmitted information on the discipline of *qirā’āt*, noting their specialization in the Set of 7 Readings, see al-Ḍahabī, *Mu’ğam al-šuyūḥ*, 2.189 №717 (§ Muḥammad b. Dāwūd al-Sallāmī al-Tāğir), and 2.255 №811 (§ Muḥammad b. ‘Alī Ibn al-Ḥarūf).

⁸⁵This account contradicts the narrative in Hernández Lopez, “Qur’anic studies in al-Andalus,” 80, stating that al-Dānī’s *Taysīr* “became widespread throughout the Islamic East when this [viz. al-Šāṭibī] author travelled from al-Andalus to Syria, indirectly introducing al-Dānī’s work.”

with Abū Ma‘šar al-Ṭabarī’s *Sawq al-‘arūs* (Set of 10+) and *Talhīs* (Set of 7+1)—extensive local circulation, as in al-Andalus, did not alter the composition patterns of local scholars, which remained firmly rooted in the Set of 7 + Reading of Ya‘qūb hierarchy. Transmission of materials from the Mašriq to the Mağrib or vice versa was essentially a passive exercise: Mašriqī works were valued as objects worthy of further transmission, but they did not generate new production or reshape existing formats. The late reception of Mağribī works in the Mašriq represents a reversal of this pattern: after sporadic contact with al-Dānī’s *al-Taysīr*, and none at all and its versification *al-Šāṭibiyyah*, Mašriqī scholars by the year 650 had available multiple Mağribī works thanks to the arrival of disciplinary scholars from that region, a situation which seems to have in some ways reinvigorated interest in the long-dormant Set of 7.

Bearing all of these details in mind, the preceding analysis has established that macro-regional origin is the dominant predictor of which Set of Readings a scholar chose to document. Taken together, the evidence of regional specialization in Sets of Readings, self-sustaining norms that remained unmoved by inter-regional contact, and the distinctive profile of mobile scholars—in their travel, their productivity, and the markedly better survival of their works—supports the conclusion that the regional production of *qirā’āt* works in the Mašriq and Mağrib constitute not just separate corpora, but arguably separate canons within the discipline. Scholars from each region chose, reproduced, and stabilized a distinct body of discipline-specific knowledge over the course of three and a half centuries. Neither did the processes which drove the separate development of these widely adopted canons prevent the articulation of strongly individualistic authorial programs—as is clearly the case with figures Ibn Muğāhid (d. 324) and al-Muẓaffar b. Aḥmad (d. 333), Makkī b. Abī Ṭālib (d. 437), al-Dānī (d. 444), al-Ahwāzī (d. 446), al-Hudālī (d. 465), Sibṭ al-Ḥayyāt (d. 541), and Šu‘lah al-Mawṣilī (d. 653)—but they do suggest that the regional corpora resulted from a “bottom-up” process of intra-group alignment that no one figure, whatever the source of their authority, could marshal or orchestrate for very long.

If geography did exert such a strong influence on the production of *qirā’āt* literature, it stands to reason that other aspects of the discipline, such as pedagogical norms, would reflect this influence as well. The next section addresses

this hypothesis by grounding it in the theoretical frame of a “pedagogical canon.”

5 Mašriqī and Mağribī pedagogical canons

Previously, we defined a “pedagogical canon” as “a corpus chosen and reproduced by actors and institutions within a given intellectual discipline in order to ensure the continuity and stability of domain-specific knowledge,” the following analysis employs this definition’s constituent terms—“stability,” “reproducibility,” and “actors and institutions.” This definition provides a framework for extending the analysis of the development of the “domain”-specific knowledge of the *qirā’āt*—and in particular, the identification of regionally distinctive theoretical and pragmatic strategies that informed pedagogical practice—which would accrue further credibility for the narrative of the independent development of the Mašriqī and Mağribī *qirā’āt* canons developed over the course of the preceding sections.

Mapping the concept of a “pedagogical canon” to the present research, as proposed by Sayeed and Qaouar, is an attractive but not necessarily straightforward proposition. As they rightly caution:

“Syllabi, listing required readings, are an entirely modern, and arguably Western, phenomenon. [...]

Islamic higher education occurred in a range of venues, and records were not systematically kept of what was read, and with what frequency, nor do we have lists of required courses and their readings.

Furthermore, information about the specifics of interactions in assemblies and engagement with texts remains fragments.”⁸⁶

In order to forestall these criticisms, and consistent with the empirical approach detailed above, we operationalize the aforementioned concepts by linking them with specific data connected to the teaching of *qirā’āt* in both the Mašriq and Mağrib during the period under consideration. We begin by examining patterns within the practice of

⁸⁶Sayeed and Qaouar, “Mastering Mālikī Law,” 458. More positively, they note that, “those immersed in the biographies of pre-modern Muslim scholars can often deduce legal, theological, and sectarian affiliations and even approximate geographical and chronological coordinates of authors by the compilations they mastered.”

entitling works to test whether authors from different regions articulated different concepts of what the “domain” of *qirā’āt* represented. Next, we take Ibn al-Ğazarī’s identification of particular figures and texts as either a pedagogical specialist (*ustād*) or pedagogical document (*muḍamman*), respectively, as a means to describe the qualities of prominent pedagogical actors and institutions in each region. Next, we examine two regionally defined approaches to stabilize a “canonical presentation” of the Sets of Readings, namely the production of paired works: including the Mağribī corpus of works which describe a “two-*rāwī* canon,” a topic already sensitively described by Nasser; and the Mašriqī production of descriptive catalogues and *mufradāt*. Finally, we turn to the composition of didactic poems and to works on special topics which brokered access to the materials of the *qirā’āt* for students of adjacent disciplines (law, *tafsīr*, grammar) as two means by which authors ensured the reproducibility of the contents of a Reading or Set of Readings.

It is important to caveat this approach by stating that these categories describe only a handful of the most widely adopted pedagogical conventions within the *qirā’āt* discipline. The bibliographic record contains a wealth of information about pedagogical practices, and those identified and analyzed here represent an attempt to engage with this vast body of evidence according to the parameters of Sayeed and Qaouar’s theoretical intervention, as well as other literature on pedagogical practices in Islamic societies writ large.⁸⁷ Likewise, the aspects of the “pedagogical canon” examined here should be seen as providing additional support for or refinement of the findings of the statistical models used above, rather than further exactitude: it is possible to find unambiguous evidence of substantial cross-regional convergence on pedagogical techniques, regional patterning within communities of Mašriqī or Mağribī authors, as well as high rates of internal variation in those same regional communities. However, and as a whole, the following analysis points to the operation of remarkably consistent and qualitatively differentiable Mašriqī and Mağribī “pedagogical canons,” as defined above.

⁸⁷On pedagogy in Islamic societies, consult the extensive bibliographies in Claude Gilliot, “Introduction,” in *Education and Learning in the Early Islamic World*, ed. Claude Gilliot, The Formation of the Classical Islamic World 43 (Surrey, UK and Burlington, VT: Ashgate Variorum, 2012), xiii-xc; and Sebastian Günther, ed., *Knowledge and Education in Classical Islam*, 2 vols., IHC 127/1–2 (Leiden: Brill, 2020).

The vocabulary of pedagogical practice

Not every work in the corpus under analysis, or in the *qirā’āt* as a whole, was composed for use in instruction or well-suited for it; some were encyclopedic reference works, others an homage to an illustrious patron, still others served a polemical purpose.⁸⁸ Therefore, before turning to more specific features of the hypothesized Mašriqī and Maġribī pedagogical canons, it is worth observing that the titles of the works themselves encode information about their intended pedagogical function. The patterns accessible in the convention of assigning a title to a work shed light on how differently the two regions conceived of approaching the *qirā’āt* as a domain of knowledge.

A systematic extraction of the key titular terms from the Arabic titles in the corpus, grouped by morphological root, yields four functional categories that capture the metaphorical framing of the *qirā’āt* as a domain of knowledge:

Category	Mašriq	Maġrib	Key terms
Sight/Clarity	16	9	<i>tabṣīrah</i> , <i>bayān</i> , <i>muwaḍḍih</i> , <i>miṣbāḥ</i> , <i>mustanīr</i>
Guidance/Instruction	9	11	<i>hidāyah</i> , <i>irṣād</i> , <i>taḍkirah</i> , <i>taysīr</i> , <i>taqrīb</i> , <i>mabsūṭ</i>

⁸⁸On works that were not appreciated as pedagogically useful, see the discussion of Abū ‘Alī al-Fārsī’s *K. al-Huġġah fī al-qirā’āt al-sab’* in Ihsan Abbas, “Abū ‘Alī Fāresī,” *Elr*, who notes that al-Fārsī, “wrote *al-Hoġġa* for reciters of the Koran; but Ebn Jennī [d. 396] testifies that they avoided the book, because it contains many things that were not comprehensible even by the great shaikhs among them,” citing Ibn Ġinnī, *al-Muḥtasab fī tabyīn wuġūh ṣawādd al-qirā’āt wa-l-īdāḥ* ‘*anhā*, ed. ‘Alī al-Naġdī Nāṣif, ‘Abd al-Ḥalīm al-Naġġār, and ‘Abd al-Fattāḥ al-Ṣalabī, 2 vols. (Cairo: Wizārat al-Awqāf wa-Maġlis al-A’lā li-l-Šu’ūn al-Islāmiyyah, 1386–1389/1966–1969), 1.197. However, compare with the numerous commentaries produced in the Maġrib on al-Fārsī’s work, as discussed above, in n. 62. We have already seen evidence of Ibn Ḥālawayh’s dedication of works to various rulers, as discussed above, in n. 51. Among polemical works, each of Makkī b. Abī Ṭālib Ḥammūš and al-Dānī composed a “refutation” (*radd*) of the views on *qirā’āt* apparently espoused by Ibn Masarraḥ (d. 319) of Qurṭubah. For the refutation of Makkī, see Abū al-Ḥasan ‘Alī b. Yūsuf al-Qifṭī, *Inbāḥ al-ruwāḥ ‘alā anbāḥ al-nuḥāḥ*, ed. Muḥammad Abū al-Faḍl Ibrāhīm, 4 vols., reprint (Cairo: Dār al-Fikr al-‘Arabī and Beirut: Mu’assasat al-Kutub al-Ṭaqāfiyyah, 1406/1986), 3.318. The refutation of al-Dānī is quoted in Abū al-‘Abbās Aḥmad b. Ma’add al-Uqlīšī, *al-Inbā’ fī ṣarḥ ḥaqā’iq al-ṣifāt wa-l-asmā’*, ed. Aḥmad Rajab Abū Sālim, 2 vols. with continuous pagination (Kuwait: Dār al-Ḍiyā’, 2017), 239–43, *apud* José Bellver, “The Beginnings of Rational Theology in al-Andalus: Ibn Masarra and his Refutation of al-Kindī’s *On First Philosophy*,” *Al-Qanṭara* 42, no. 2 (2020):323–71, at 335–36. Bergsträßer and Pretzl, *GdQ*, 3.214/553 erroneously suggest that another work by Makkī b. Abī Ṭālib (d. 437), “*K. al-Mūġiz* [sic],” was “intended for his private use only but [was] published against his will”; Makkī is credited with no such work in the bio-bibliographical tradition.

Category	Mašriq	Mağrib	Key terms
Comprehensiveness	16	5	<i>ḡāmi‘</i> , <i>ḡāyah</i> , <i>kifāyah</i> , <i>kāmil</i> , <i>šāmil</i>
Simplification	7	5	<i>īḡāz</i> , <i>talhīs</i> , <i>mūḡaz</i> , <i>waḡīz</i>

The semantic aspects of these root clusters cohere at the symbolic level. The “Sight/Clarity” grouping brings together *tabṣīrah* (*bṣr*, “to endow with sight”), *bayān* (*byn*, “to manifest”), *muwaḍḍih* (*wḍḥ*, “to make apparent”), *mustanīr* (*nwr*, “to illuminate”), and *miṣbāḥ* (*ṣbh*, “to be radiant”)—terms whose semantic fields converge on the act of making the entire scope of the subject matter visible. The “Guidance/Instruction” grouping includes *taysīr* (*ysr*, “to facilitate”), *hidāyah* (*hdy*, “to show the way”), *iršād* (*ršd*, “to direct”), and *taḍkirah* (*ḍkr*, “to remind”): terms oriented toward making knowledge accessible to a learner. The “Comprehensiveness” category is grounded in *ḡāmi‘* (*ḡm*, “to gather”), *ḡāyah* (*ḡyy*, “to elevate”), and *kāmil* (*kml*, “to be complete”). A handful of titles explicitly address the spectrum of competence: al-Dānī’s *Tabṣīrat al-mubtadī wa-taḍkirat al-muntahī* (“Insight for the Beginner and a Reminder for the Advanced”) and the Mašriqī *Ġāyat al-muntahī wa-nihāyat al-mubtadī* (“The Elevated Goal for the Advanced and the Milestone for the Beginner”) both name their audience in terms of the root *bd* (“to begin”). It is notable, in this instance, that the Mağribī title leads with the learner’s insight, whereas the Mašriqī title invokes the tradition’s comprehensiveness.

The regional patterning that emerges from these two layers of evidence is consistent and mutually reinforcing. Sight/Clarity and Simplification are represented at comparable levels of emphasis across both regions, suggesting a shared interest in making the Readings visible and intelligible, consistent with the previously demonstrated shared commitment to producing works in the abridgment format. The divergence concentrates, then, on the two remaining clusters. The Mağribī tradition used the titles of works to advertise their instructional function: *taysīr* (“facilitation”), *hidāyah* (“guidance”), *iršād* (“direction”). The Mašriqī Comprehensiveness works, by contrast, represent

the dominant mode of expressing disciplinary and pedagogical vocabulary across centuries in their use of terms that frame the *qirā’āt* as a field to be surveyed and documented in its entirety.

The Mağribī works that use Comprehensiveness vocabulary merit further comment, as they more often than not reflect the “maximalist” orientation of the fifth-century Mašriq. The obvious starting point is al-Huḍalī’s (d. 465) *al-Kāmil* which, with its fifty Readings, can be explained by the author’s status as the “maximalist” *par excellence*. Al-Mu‘addil’s (d. ca. 500) *Ġāmi‘ al-adā’* likewise reflects a maximalist tendency in presenting fifteen Readings. The lone stationary Mağribī author who independently pursued the Comprehensiveness impulse in the spirit of his Mašriqī counterparts, Abū al-Qāsim ‘Īsā al-Laḥmī (d. 629), composed *al-Ġāmi‘ al-akbar* which reportedly contained somewhere between four and seven thousand (!) transmission pathways, the most of any work known to Ibn al-Ġazarī; however, such an expansive treatment of the topic was apparently not appreciated by al-Laḥmī’s fellow Mağribīs.⁸⁹ This anecdote reveals the heart of the matter: the theme of Comprehensiveness headlined the practice of Mašriqī titling, but was functionally absent from the Mağribī *qirā’āt* lexicon. On this point Nasser has rightly noted that Dānī’s *Ġāmi‘ al-bayān* may reflect a more Mašriqī outlook, whereas its instructional counterpart, *K. al-Taysīr*, uses Guidance vocabulary and became much more widely available in both the Mağrib (and the Mašriq) than the work on which it was largely based.⁹⁰

This analysis of titles of *qirā’āt* works shows that they served as more than mere conventions; rather, Mašriqī and Mağribī authors used them to broadcast their disciplinary approach. Where the two regions shared an evident pedagogical concern for clarity of exposition and simplification, they differed with respect to the emphasis of the ideals of comprehensiveness and accessibility inherent in all canonical literatures.

⁸⁹Consult the references listed at Appendix A.1.26. Compare with the number of pathways identified in a work from a century earlier, *K. al-Iqnā’* of Ibn Bāḍiṣ (d. 540), set at 300 in Bergsträßer and Pretzl, *GdQ*, 3.223/561.

⁹⁰Nasser, “The Two-*Rāwī* Canon before and after ad-Dānī,” 73.

Actors and institutions

Beyond the evidence of titling practices, the concept of a pedagogical canon presupposes the further identification of region-specific actors and institutions which proved to be influential within the *qirā'āt* discipline. In the following, we study actors as embodying “personal authority,” which designates the extent to which a teacher’s individual standing sustained the transmission of a Reading or set of Readings; likewise, we study the identification of specific texts as curricular resources as representing “textual authority.” Ibn al-Ğazarī’s *ĠN* provides evidence for each of these concepts, in the application of the title *ustāḏ* to a given figure, and the association of the phrase “he recited according to its contents” (*qara’a bi-muḏamman X*) to a text, respectively. The examination of these data provides a valuable witness to the complex interplay of personal and textual authority during this period, and how these factors combined to shape the development of the *qirā'āt* discipline.

Personal authority: The *ustāḏ*

The designation *ustāḏ* in *ĠN* marks a figure whom Ibn al-Ğazarī regarded as having attained the highest degree of pedagogical authority. A preliminary survey identifies a small number of figures who receive this appellation and whose deaths fall before 653 AH, only twenty-one. The fact that some of these figures attained prominence without having written a work on a given Set of Readings, thus explaining their absence from the survey and statistical analysis presented above, sounds an important note of caution against attempting to equate naively a given figure’s importance within the discipline of *qirā'āt* with their textual output alone.

Mašriq

In the Mašriq, the *ustāḏ* designation attaches to figures who authored works primarily on the Set of 10+, especially in the major Iraqi centers. For instance, the Bağdādī Abū al-‘Izz al-Qalānisī (d. 521) is additionally provided with

the honorifics, “the authority of Iraq, the teacher of the reciters of Wāsiṭ, and the compiler of books” (*ṣayḥ al-‘Irāq wa-muqri’ al-qurrā’ bi-Wāsiṭ ṣāḥib al-taṣānīf*); this identification of him as an author not only tracks with his known output, comprising works on the Set of 10+ such as *K. al-Kifāyah al-kubrā* and *K. al-Irṣād*, but also showcases the complementary aspects of his authority, based on both active pedagogy which inspired an entire generation of the inhabitants of Wāsiṭ, as well as his production of texts. Abū al-‘Alā’ al-Hamaḍānī (d. 569) is given the triple honorific “the leading authority, retainer, and teacher” (*al-imām al-ḥāfiẓ al-ustād*) and is the author of the widely commented upon *Ġāyat al-iḥtiṣār fī al-qirā’āt al-‘aṣarāh a’immat al-amṣār*. Another *ustād* is the aforementioned Abū Yumn al-Kindī (d. 613), known to al-Ḍahabī as a *ṣayḥ* in each of the fields of Ḥanafī law, Arabic language (*al-‘arabiyyah*), and *qirā’āt*. He goes on to describe al-Kindī as a prodigy who, in his youth in Baḡdād, had memorized the Ten Readings in their various transmissions (*riwāyāt*) by the age of 10 to the satisfaction of his illustrious teacher, Sibṭ al-Ḥayyāt (d. 541); he then traveled as a merchant as an adult, eventually settling in Dimašq where he in turn transmitted his teacher’s œuvre, and retained throughout his long life the ability to recall the text of Sībawayh’s (d. ca. 180) *al-Kitāb*.⁹¹

Other outstanding examples of Mašriqī *ustād* authority, however, do not evince strong associations with the production of texts. Notable among them is Ġulām al-Harrās (d. 468), who was known as “the authority of Iraq and the rambler of the horizons” (*ṣayḥ al-‘Irāq wa-l-ḡawwāl fī al-āfāq*). Ġulām al-Harrās’s reputation as a pedagogue rested on a basis that was exquisitely difficult to reproduce: direct transmission of the 10+ Readings from over 400 of the authorities of Iraq (*ṣuyūḥ al-‘Irāq*).⁹²

Mağrib

In the Mağrib, the title *ustād* is conferred upon several figures who also appear as authors of major works: Makkī b. Abī Ṭālib (d. 437), described as “the authority of the reciters and those who strive to make their recitation beautiful”

⁹¹ al-Ḍahabī, *ŠAN*, 22.34–41 №28.

⁹² al-Ḍahabī, *MQK*, 2.813–15 №528; and Ibn al-Ġazarī, *ĠN*, 1.228–29 №1040.

(*ustāḍ al-qurrā’ wa-l-muğawwidīn*); Abū al-‘Abbās al-Mahdawī (d. ca. 440), a “famous” (*mašhūr*) *ustāḍ*; Abū Ġa’far Ibn al-Bādiš al-Ġarnāfi (d. 540), “a great authority and precise lead reciter of prayers” (*ustāḍ kabīr wa-imām muḥaqqiq*); and Abū al-Qāsim al-Ṣafrāwī (d. 636), author of a work on the Set of 7 as well as an important work on individual “stray” (*šādḍ*) variant readings of the Qur’ān, who was an *ustāḍ* noted for his dedication to teaching (*al-muqri’ al-mukṭir*) whose students’ deaths extended past the year 720.⁹³

As in the Mašriq, some prominent Mağribī *ustāḍ* figures did not compose works within the discipline. One example is ‘Umar b. Muḥammad b. ‘Irāk al-Ḥaḍramī (d. 388), an acknowledged authority (*al-imām ustāḍ*) on the Reading of Nāfi’ (d. 169 or 170) according to Warš (d. 197). Although he left no known written work, his authority in transmitting the Reading of Nāfi’ is explicitly attested.⁹⁴

Inter-regional

For a small number of *asātīḍ*, authority appears to have been portable across the regional boundary. Muḥammad b. Ḥasan al-Fāsī (d. 656), whom Ibn al-Ġazarī further specifies as “a great, complete, erudite prayer leader” (*imām kabīr kāmīl ‘allāmah*), was born in Fās but settled in Ḥalab. A mirror case is the previously mentioned Naṣr al-Fārsī (d. 461), to whom the label *ustāḍ* is not applied; rather, he is described as “an authority noted for his precision, reliability and judiciousness, a prayer leader, and linchpin of transmission” (*šayḥ muḥaqqiq imām musnid ṭiqah ‘adl*) and became “the chief reciter of all of Egypt” (*muqri’ al-diyār al-Miṣriyyah*). Naṣr al-Fārsī represents a Mašriqī

⁹³For the work on *šādḍ*, see the partial edition in Aḥsan Saḥā’ b. Muḥammad Ašraf al-Dīn, “*al-Taqrīb wa-l-bayān fī ma’rifat šawāḍḍ al-Qur’ān*: Min awwal al-kitāb ilā nihāyat Sūrah al-Naml [Q 27],” Ph.D. Dissertation supervised by Muḥammad Sālim Muḥaysin (Medina: al-Ġāmi‘ah al-Islāmiyyah - Qism al-Dirāsāt al-‘Ulyā, al-Šarī‘ah wa-l-Tafsīr wa-‘Ulūm al-Qur’ān, 1411/1990).

⁹⁴For Ibn ‘Irāk, consult the references in Ḍahabī, *TI*, 8.636 №307 = *MQK* 676–77 №393; and Ibn al-Ġazarī, *ĠN*, 1.597 №2431. One work, entitled *Ḥikāyāt Bunān al-Ḥammāl al-zāhid al-Miṣrī*, is attributed to him in Abū Ṭāhir al-Silafī, *Mašyaḥat al-šayḥ al-ağall Abī ‘Abd Allāh Muḥammad al-Rāzī wa-bi-ḍayli-hī ṭalāt ḥikāyāt ġarībah*, ed. al-Šarīf Ḥatīm b. ‘Ārif al-‘Awnī (Riyadh: Dār al-Ḥağarah, 1415/1994), 245–46 (§ al-šayḥ al-ḥādī wa-l- ṭalātūn – Abū Ṭālib ‘Alī b. ‘Abd al-Samī’ b. ‘Umar al-Šarīf al-Ḥašimī); the title refers to a famous mystic of Wāsiṭ (d. 316) who relocated to Egypt, for whom consult the references in Irfan Gündüz, “Bünān b. Muhammed,” *TDVİA*.

The intersection of mysticism and Qur’ānic recitation, touched upon briefly in connection with the refutations of Ibn Masarraḥ by Makkī b. Abī Ṭālib and al-Dānī, as discussed above, in n. 88, requires much further research. For an initial exploration see Martin Nguyen, “Exegesis of the *ḥurūf al-muqaṭṭa’*: Polyvalency in Sunnī Traditions of Qur’ānic Interpretation,” *Journal of Qur’anic Studies* 14, no. 2 (2012):1–28, especially 13–15; and Alexander Knysh, “Sūfism and the Qur’ān,” *EQ*, 5.137–59, especially 141–43 (§ The centrality of the Qur’ān to Sūfī piety), focusing particularly on an exegetical method translated as “extraction” (*istinbāt*) and the production of works of *tafsīr*, an approach that, like Nguyen’s, reflects the tendency within the discipline of Sufism Studies to conflate Sufis’ engagement with the Qur’ān with exegetical activity.

author who transplanted the textual practice of his region of origin—embodied in his *K. al-Ġāmi‘ fī al-qirā’āt al-‘ašr bi-‘ilalihā*, a work on the Set of 10+ composed in Egypt in distinction from the previous Mašriqī 10+ works of this type that had arrived in Egypt with their authors—into a Mağribī pedagogical environment.

These two cases indicate that personal authority could, in exceptional circumstances, transcend the canonical boundaries that otherwise delimited the two regions. Al-Fāsī’s recognition as an *ustāḍ* in the Mašriq—an environment still saturated in the Set of 10+ as was seen to be the case with his contemporary Abū al-Yumn al-Kindī in Dimašq—lends further credence to the narrative posed above, where the arrival of Mağribī authors in al-Šām prefaced a resurgence of interest in the Set of 7. The introduction of such novel texts perhaps required forms of expertise not immediately available to many Mašriqī students, whether in Ḥalab or elsewhere, and is a question that deserves additional research.⁹⁵

Textual authority: the *muḍamman*

If the *ustāḍ* designation reveals important aspects of how personal authority could be expressed within the regional *qirā’āt* communities, the identification of a specific titles within the pedagogical environment illustrates its complement: the role of named written texts as curricular anchors. The evidence of a curricular text, i.e. a work which Ibn al-Ġazarī identifies as having governed the instruction of a given student’s recitation (*qara’a bi-muḍamman*), by contrast, documents those instances in which authority was vested in a specific written work in the *qirā’āt* discipline. A systematic extraction of the *Ġāyat al-nihāyah* yields 75 instances in which a specific work is identified as the textual basis of instruction.

⁹⁵For the contemporary situation in Ḥalab in the discipline of *ḥadīṭ*, see now Koen Jannsen, “Traveling Scholars and their Audition Certificates: An Interpretation of the Status of Late Ayyubid Aleppo (624–658/1227–1260) as a Center of Knowledge,” *The Arabist: Budapest Studies in Arabic* 48 (2025):23–62.

Mašriq

The *muḍamman* evidence, like that of the *ustād* considered above, points to hub texts that are overwhelmingly works on 10+ Readings: *K. al-Miṣbāḥ* of Abū al-Karam al-Šāhrazūrī (d. 550, 4 attestations), *K. al-Ġāyah* of Abū al-‘Alā’ al-Hamaḍānī (d. 569, 3 attestations), *al-Kāmil* of Abū al-Qāsim al-Huḍalī (d. 465, 3 attestations), alongside Sibṭ al-Ḥayyāt’s (d. 541) *K. al-Mubhiğ*, Abū al-Qāsim Maṣṣūr b. al-Sindī’s (d. 386) lost *K. al-Iršād*, and Abū Ṭāhir Ibn Siwār’s (d. 496) *K. al-Mustanīr*.⁹⁶ All cluster within the Bağdād–Wāsiṭ–Hamaḍān triangle. Outside of this circuit, the most prolific hub text for the Mašriqī commentarial tradition remained Ibn Mihrān’s (d. 381) *K. al-Ġāyah fī al-qirā’āt al-‘ašr*, which generated seven derivative works—four commentaries, an abridgement, an expanded catalogue, and a treatise on textual difficulties (*‘ilal*)—spanning from Abū al-Ḥasan al-Fārsī (d. ca. 390) through Muḥammad b. Maḥmūd al-Ṭūsī (d. ca. 620), a remarkably stable 230-year span of sustained pedagogical engagement with a single text.

Mağrib

The Mağrib *qirā’āt* community evinces an even more robust and stable roster of curricular texts, a development which may be dated to around the same time as the apparent Mašriqī convergence on a set of works on the Set of 10+ in the sixth century. The single most frequently attested *muḍamman* text is al-Dānī’s *K. al-Taysīr* (11 attestations), followed by al-Šāṭibī’s *al-Šāṭibiyyah* (10), Abū Ṭāhir Ismā’īl b. Ḥalaf’s (d. 455) *K. al-‘Unwān* (7), Abū al-Qāsim al-Šafrāwī’s (d. 636) *K. al-I’lān* (6), and Abū ‘Abd Allāh Muḥammad b. Šurayḥ al-Ru‘aynī’s (d. 476) *K. al-Kāfī* (5), all of which are dedicated to the Set of 7 Readings. Their presence as *muḍamman* texts extends from al-Andalus, through Ifrīqiyyah and Egypt, and as far the Ḥiğāz, as in Sibṭ al-Ḥayyāt’s aforementioned transmission of *al-Taysīr*. This latter work, paired with al-Dānī’s *Ġāmi‘ al-bayān*, became a notable feature of Andalusī *qirā’āt* pedagogy

⁹⁶Compare with the comments of Bergsträßer and Pretzl, *GdQ*, 3.225/563, who identify Ibn Siwār’s *al-Mustanīr* as having “probably [...] the greatest dissemination after the [K.] *Iršād al-mubtadī* [of Abū al-‘Izz al-Qalānisi; cf. Appendix B.3.32.],” citing Ibn al-Ġazarī, *ĠN*, 2.128, who sates, concerning al-Qalānisi: *wa-allāfa ‘Kitāb al-Iršād’ fī l-‘ašri wa-huwa muḥtaṣarun kāna ‘inda l-‘Irāqīyyīna ka-‘al-Taysīr’ ‘indanā*.

from the mid-5th through the 7th century. Al-Šāṭibī’s *al-Šāṭibiyyah*, itself a versification of the *Taysīr*, became the subject of numerous commentaries by the early seventh century. However, the well-documented prominence of this pairing of al-Dānī’s works, or of al-Dānī’s and al-Šāṭibī’s works, should not overshadow the live engagement of Mağribī *qirā’āt* scholars with other presentations of the Set of 7 Readings; a notable example is Abū Muḥammad Ibn Našwān al-Miṣrī’s (d. 649) *Šarḥ* ‘K. al-‘Unwān fī al-qirā’āt al-sab‘’, which reflects the aforementioned seventh-century translation to Egypt of Abū Ṭāhir Ismā‘īl b. Ḥalaf’s earlier Andalusī title.

Synthesis

The *ustāḍ* and *muḍamman* evidence reveals crucial information concerning how actors and institutions in the regions sustained their respective canons. Both regions maintained pedagogical authority through named teachers and named texts; the *muḍamman* attestations, in particular, confirm that instruction was organized around a defined set of texts the Mašriq and the Mağrib by no later than the end of the sixth century, and the association of named *asātīd* with precisely these titles provides additional support for this conclusion. In limited cases, an *ustāḍ* could reach prominence without having authored a work or was able to transfer his authority across the regional boundary, but this circumstance remained comparatively rare for the period surveyed here.

The regional patterns in Ibn al-Ğazarī’s identification of prominent actors and institutions sheds light on the development of regionally-identifiable curricula: with Mašriqī authors overwhelmingly concentrating on works in a Set of 10+, Mağribī authors equally focused on producing works on the Set of 7, providing confirmation of the bibliographic divergence documented in the statistical analysis. Mağribī engagement with specific curricular texts and text reuse was concentrated around a small number of highly connected hub texts, the situation with pedagogical texts in the Mašriq remained fragmented in the form regional sub-traditions, where no single work achieved such widespread support as the coupling of *al-Taysīr/al-Šāṭibiyyah*. Commentarial traditions around specific texts, particularly the *al-Taysīr/al-Šāṭibiyyah* pair, ensured that the continued textual authority of the canon was maintained. The success of each region’s pedagogical approach is evident in the generations of authors who were able to sustain

the transmission of key curricular texts without the need for exceptional individual figures to enforce their continued relevance.

Stability: Canonical formats of presentation

The identification of actors and institutions establishes who taught what, and where; the question that follows is how authors shaped these materials so as to be robust to the hazards of transmission. Nasser suggests that successive phases of stabilizing the oral recitation of the Qur’ān involved a process in which “various corpuses of variant readings and recitational techniques were filtered and selected from a wider pool of variants to constitute what later became the standard, canonical rendition of the Qur’ān.”⁹⁷ Two dimensions of this process of stabilization can be observed in the *qirā’āt* discipline: first, the adoption of canonical formats of presentation—most notably the two-*rāwī* schema—and second, the practice of pairing major works with companion texts.

The two-*rāwī* schema

What Nasser calls the “two-*rāwī* canon”—works that restrict themselves to two transmitters per Reader, as opposed to works that present all known transmitters—provides a window onto the process of selectivity by which pedagogical canons were formed. The adoption or rejection of this format is one of the clearest regional markers in the corpus.

Mašriq

The two-*rāwī* format first appears in al-Šām with Abū al-Ṭayyib Ibn Ġalbūn’s (d. 389) *K. al-Iršād*—the first work to consistently adopt two *rāwīs* per reader—and his son Abū al-Ḥasan’s (d. 399) *K. al-Istikmāl*. The format was also

⁹⁷Shady Nasser, “Variations on a Theme by Muḥammad: Did Literacy Supersede the Orality of the Qur’ān?” *Dead Sea Discoveries* 29 (2022):388–409, at 389–90. On the two-*rāwī* canon specifically, consult idem, “The Two-Rāwī Canon before and after al-Dānī (d. 444/1052–3): The Role of Abū al-Ṭayyib Ibn Ġalbūn (d. 389/998) and the Qayrawān-Andalus School in Creating the Two-Rāwī Canon,” *Oriens* 41 (2013):41–75.

adopted by Abū ‘Alī al-Ahwāzī (d. 446), possibly earlier by Abū al-Qāsim al-Ṭarsūsī (d. 420) in his *al-Muğtabā*.⁹⁸

The two-*rāwī* schema was not, however, an ironclad rule of production even in al-Šām: Ibn Ḥālawayh’s (d. 370) *K. al-Badī‘*, a work on a Set of 7+1, presents each Reader according to only one transmission pathway, demonstrating that alternative selective methods of transmission coexisted with the two-*rāwī* format in the same sub-region.

Otherwise, works by Mašriqī authors show little attraction to selective methods of transmission, but rather reflect a deep concern with presenting the maximum number of transmitters associated with a given Reading Tradition. Ibn Muğāhid’s *K. al-Sab‘ah* presents variable *rāwī* counts, ranging from 1 to 15 per reader, with no consistent two-*rāwī* structure. Ibn Mihrān’s *al-Mabsūṭ* likewise presents 2–6 *rāwīs* per reader. Even Mašriqī authors who did adopt two *rāwīs* per reader—such as al-Ahwāzī and Abū Ma‘šār al-Ṭabarī—differed from the Mağribī colleagues in their judgment of which “two-*rāwī* canon” best represented each Reader.⁹⁹ Among the major Mašriqī 10+ authors, al-Qalānisī, Sibṭ al-Ḥayyāt, and al-Šahrazūrī maintained relatively high *rāwī* counts, and “maximalist” works like Abū Ma‘šār al-Ṭabarī’s *Sawq al-‘arūs* and al-Rūḍbārī’s *al-Ġāmi‘* document scores of pathways for major Readers. The Mašriqī tradition thus remained characterized by variability in both the number and the identity of *ruwāh* presented. This last observation is, however, inapt for the case of the fourth-century Šāmī model, embodied in the two-*rāwī* canon and adherence to a Set of 7+1, which was eventually eclipsed entirely in its home region. Thus, and despite its origin in al-Šām, the two-*rāwī* format could find no purchase in the region of its inception, but was ultimately destined for a warmer reception on foreign soil.

Mağrib

As already described by Nasser, the two-*rāwī* canon arrived in the Mağrib with the relocation of the Ibn Ġalbūn family to Cairo. From there, it was adopted by their Ifriqī students: Ibn Sufyān al-Qayrawānī (d. 415) in *K. al-Hādī*,

⁹⁸The adherence to the two-*rāwī* canon in al-Ṭarsūsī’s *K. al-Muğtabā* remains difficult to prove, as quotations from this work are known primarily from their reuse by quite late authors, such as al-Šafrāwī (d. 636). A recent partial reconstruction of this work shows that most but not all Readers are described with two *rāwīs*; see Dāḥil b. ‘Alī al-Ġud‘ānī, “‘Abd al-Ġabbār al-Ṭarsūsī (tuwuffīya 420 hiğrī): al-Riwāyāt wa-l-ṭuruq al-wāridah ‘anhu ġam‘an wa-dirāsatan min awwal Sūrah al-Isrā’ [Q 17] ḥattā nihāyat Sūrah al-Nās [Q 114],” *al-Mağallāh al-‘Ilmiyyah li-Kulliyat Uṣūl al-Dīn wa-l-Da‘wah bi-l-Zaqāqīq* (Egypt) 34, no. 1 (2022):13–56.

⁹⁹al-Ḍahabī, *MQK*, 2.876 №587; and Ibn al-Ġazarī, *ĠN*, 1.548–49 №2243.

al-Mahdawī (d. ca. 440) in *K. al-Hidāyah*, and Makkī (d. 437) in *K. al-Tabṣīrah* all adopted two *rāwīs* per reader.¹⁰⁰ Al-Dānī solidified this canonical presentation of the Set of 7 Readings in his “student manual” *K. al-Taysīr*, while preserving richer transmission data in the comprehensive *Ġāmi‘ al-bayān*. After al-Dānī, a significant number of Mağribī authors—including Abū Ṭāhir Ismā‘īl b. Ḥalaf (d. 455), Muḥammad b. Šurayḥ (d. 476), Ibn al-Bāqīš (d. 540), and others—adhered to the two-*rāwī* format in their paired works without exception. The reinterpretation of the two-*rāwī* canon in the format of a didactic poem is at least as old as *al-Šātibīyyah*, which itself became one of the most popular pedagogical works in the history of Arabic literature.

Synthesis

The two-*rāwī* schema, adopted universally in the Mağrib but never in the strongholds of Mašriqī scholarship, represents the format-level expression of regional divergence: Mağribī authors selected and compressed, Mašriqī authors documented comprehensively. The conceptual dimension of this divergence is further illuminated in a recent article by Marijn van Putten, who demonstrates that al-Dānī in *al-Taysīr* portrays the transmission of the Reading of Abū ‘Amr (d. 154) in terms of communal identity, specifically his identification of the transmissions of *ahl al-‘Iraq* and *ahl al-Raqqah*, rather than strictly linear transmission found in the Mašriq.¹⁰¹ This finding underscores the structural difference between the Mašriqī preference for robust transmission lines and the Mağribī drive toward a pedagogically adapted two-*rāwī* format.

The pairing of major works: *Mufradāt* and “auto-compressions”

A second form of regionally-significant configurations for ensuring the reliability of the contents of the Reading Traditions is the practice of pairing a major work with a companion text that serves a complementary pedagogical

¹⁰⁰ Ibn al-Ġazarī, *ĠN*, 1.146 №680.

¹⁰¹ Marijn van Putten, “Finding Dūrī: Communal Transmission of Abū ‘Amr among the People of ‘Irāq,” *Al-Qanṭara* 46, no. 2 (2025):1–14. doi:<https://doi.org/10.3989/alqantara.2025.887>.

function. Both regions engaged in this practice, but the nature of the companion text differs sharply, revealing contrasting conceptions of what it means to create the stability necessary for defining a curriculum.

Mašriq: Catalogue and *mufradāt*

In the Mašriq, the dominant pairing pattern joins a comprehensive descriptive catalogue with *mufradāt*, monographs devoted to individual Readers. The intertextual relationship of these Mašriqī works is clear: whereas the *mufradāt* provide the constituent data of the entire Set of Readings, the descriptive catalogue provides a complex synthesis that represents more than the sum of its parts.

The accomplishment of this pairing was achieved co-terminously with the earliest compositional activity for each Set of Readings: Ibn Muğāhid (d. 324) produced five catalogues alongside a now-lost *mufradāh* for each of his 7 Readers. Likewise, Ibn Mihrān (d. 381) paired his three catalogues on a Set of 10+ (*al-Ġāyah*, *al-Mabsūt*, *al-Šāmil*) with a *Mufradāt al-qurrā'*, at least one of which, dedicated to the Reading of Ḥalaf al-Bazzār (d. 229), appears to have circulated independently under the title *K. Iḥtiyār Ḥalaf* (lost). Al-Ahwāzī (d. 446) carried this approach to its fullest expression: three comprehensive catalogues alongside *mufradāt* mirroring his extensive vision of a Set of 10+, such as works dedicated to the Readings of al-Ḥasan al-Baṣrī (d. ca. 110) and Ibn Muḥayṣin (d. ca. 123), and another (lost) *mufradah* dedicated to the Reading of the Šī'ī Imām, Zayd b. 'Alī (d. 122). In the sixth century, Abū al-'Alā' al-Ḥasan b. Aḥmad al-'Aṭṭār al-Hamaḍānī (d. 569) produced a similar pairing, again for a Set of 10+, namely his *K. Ġāyat al-iḥtiṣār fī al-qirā'āt al-'ašr* alongside a compilation of *mufradāt* (mostly lost), variously referred to in the bio-bibliographic sources as *Mufradāt al-a'immaḥ* or *Mufradāt al-qurrā' al-'ašr*.

The choice of Reading which serves as the basis of comparison for each *mufradah* also displays clear regional patterning: all of the *mufradāt* composed by al-Ahwāzī, for instance, assume the reader's knowledge of the Reading of Abū 'Amr b. al-'Alā' (d. ca. 154), whereas the *mufradāt* associated with al-Dānī and the Mağribī tradition assume the reader's knowledge of the Reading of Qālūn (d. ca. 220) 'an Nāfi'.

In total, 27 *mufradāt*—roughly a fifth of total Mašriqī output—are attributable to Mašriqī authors, who spread their monographic energy across the full range of individual Readers within the Set of 10+. Production peaked in the later sixth century, with more than a third of all Mašriqī *mufradāt* composed after 540 AH, tracking the broader arc of Mašriqī 10+ production.

Mağrib: Catalogue and student manual

In the Mağrib, the dominant pairing pattern joins a comprehensive work with what Nasser describes as a “student manual,” and what has been referred to in this study more formally as an “auto-compression.”¹⁰² The pattern is exemplified by the output of Ibn Sufyān al-Qayrawānī (d. 415), whose *K. al-Hādī* was accompanied by his own commentary; by al-Mahdawī (d. ca. 440), who wrote both *K. al-Hidāyah* and its *ṣarḥ*; by al-Dānī (d. 444), who paired *Ġāmi‘ al-bayān* with *K. al-Taysīr*; and by Ismā‘īl b. Ḥalaf (d. 455), who composed both *K. al-Iktifā’*, abridged as *K. al-Unwān*. Every one of these paired works transmits the Set of 7. The Mağribī companion text thus compresses the system for instructional use—creating a hierarchy of texts suited to different levels of competence, strengthening the preceding analysis of Mağribī conventions of titling works.

Mağribī authors produced 11 *mufradāt*—about one-sixth of their total output, a proportion that appears comparable on the surface. However, not quite half are reserved for a single Reading Tradition, that of Ya‘qūb, reinforcing the identification of a secondary canon of the Set of 7+1 discussed in the preceding section. No Mağribī *mufradah* in our survey was documented for a Reader outside the Set of 7, the transmission of which formed the preserve of the comprehensive catalogues and auto-compressions.

Synthesis

Both regions exhibit a shared, non-trivial practice of pairing *qirā’āt* works; yet the nature of the companion text

¹⁰² Compare with Bergsträßer and Pretzl, *GdQ*, 3.214/553, note that both Makkī b. Abī Ṭālib (d. 437) and al-Dānī (d. 444) “composed two works each on the Seven, a brief one, containing nothing but the facts (including the most important *isnāds*), and another, comprehensive one, which offers apart from extensive *isnāds* also the *ta’līl*.”

reveals fundamentally different pedagogical logics. In the Mašriq, the dominant pairing joins a comprehensive catalogue with *mufradāt*—monographs on individual Readers that decompose the Set into its constituent parts, providing granular documentation alongside the synthetic whole. In the Mağrib, the dominant pairing joins a comprehensive catalogue with a student manual or auto-compression that scaffolds the same material at a more accessible level of difficulty, creating a hierarchy of texts suited to different stages of competence. The Mašriqī logic is one of decomposability: the pair documents the whole and each of its parts separately. The Mağribī logic is one of scaffolding: the pair of texts equips the learner with a reference work and a curricular instrument through which to approach it. This Mağribī scaffolding pattern is, in turn, the mechanism by which a hierarchical primary-and-secondary canon structure was established and maintained—the same authors who produced the reference also produced the tool through which it was taught, ensuring that selectivity and accessibility governed the transmission of the *qirā'āt* from one generation to the next.

Reproducibility: Ensuring consistent transmission

The formats examined above address how authors structured canonical materials; the question that remains is how they ensured those materials reached their intended audiences. The *qirā'āt* discipline served at least two distinct constituencies: novices who needed accessible introductions to the canonical Readings, and advanced students or practitioners of adjacent disciplines who required specialized treatments of specific topics. The two regions addressed these audiences in characteristically different ways. We examine them in turn: introductory subjects—described not only in the two-*rāwī* pedagogical manuals described above, but also didactic poetry—and those special topics connecting the contents of the regional *qirā'āt* canons with the adjacent disciplines of law, *tafsīr*, and grammar.

Introductory subjects

Both regions developed techniques to ensure the faithful transmission of the basics of the Reading Traditions, particularly the rich historical tradition of Arabic didactic poetry.¹⁰³ Although the earliest known *qirā’āt* poem—Abū Muzāḥim al-Ḥāqānī’s (d. 325) *al-Qaṣīdah al-Ḥāqāniyyah*—was written by a Mašriqī, the production of didactic poetry devoted to a specific Readings or Set of Readings would become a signal Mağribī enterprise long before the composition of *al-Šāṭibiyyah*.¹⁰⁴

Mašriq

The Mašriq initiated the production of didactic poetry on the principles of *tağwīd*, an elementary subject relevant to any beginner in the discipline of *qirā’āt*. Omar Hamdan has published these seminal works, outlining the development of the tradition which developed around the “emulation” (*mu’araḍah*) of al-Ḥāqānī’s groundbreaking *qaṣīdah*, which includes further works by Abū al-Ḥusayn al-Malaṭī (d. 377), Abū ‘Abd Allāh al-Lālakā’ī (d. after 392), and Abū ‘Abd Allāh Muḥammad b. Yūsuf al-Ḥurāsānī (d. ca. 400).¹⁰⁵ For the purposes of this study, however, the production of these works is less consequential, as none of them identifies a set of principles that apply to a specified Set of Readings.

¹⁰³ G.J.H. van Gelder, “Didactic poetry, Arabic,” *EI3*; and Ṣafā’ Khulūṣī, “Didactic Poetry,” in *The Cambridge History of Arabic Literature: Religion, learning and science in the ‘Abbasid period*, edited by M.J.L. Young, John D. Latham, and Robert B. Serjeant (Cambridge: Cambridge University Press, 1990), 498–509. Major portions of the didactic poetry tradition are covered in Florian Sobieroj, *Variance in Arabic Manuscripts: Arabic Didactic Poems from the Eleventh to the Seventeenth Centuries—Analysis of Textual Variance and Its Control in the Manuscripts*, Studies in Manuscript Cultures 5 (Berlin: Walter de Gruyter, 2016), which mistakes (ibid, 75) a poem on the Reading of *Warṣ ‘an Nāfi’* as a work on the “discipline of *qirā’āt* (according to the readings of Warsh, ‘as transmitted by Nāfi’).”

An analogue may be drawn with the pedagogical situation in the closely related discipline of grammar, which has attracted a number of recent studies, including Ramzi Baalbaki, “Theoretical coherency versus pedagogical attainability: The conscious bias of Arab grammarians,” in *Alltagsleben und materielle Kultur in der arabischen Sprache und Literatur: Festschrift für Heinz Grotzfeld zum 70. Geburtstag*, ed. Thomas Bauer and Ulrike Stehli-Werbeck (Weisbaden: O. Harrassowitz, 2005), 39–68; Michael Carter, “The Use of Verse as a Pedagogical Medium, Principally in the Teaching of Grammar,” in *Knowledge and Education in Classical Islam*, 1.449–74; Almog Kashner, “Early pedagogical grammars of Arabic,” in *The Foundations of Arabic Linguistics III: The Development of a tradition: Continuity and change*, ed. Georgine Ayoub and Kees Versteegh, Studies in Semitic Languages and Linguistics 94 (Leiden: Brill, 2020), 146–66; idem, *A Pedagogical grammar of Arabic by al-Qazwīnī al-Nağğār. Edition and Study*, Abhandlungen für die Kunde des Morgenlandes 143 (Wiesbaden: Otto Harrassowitz, 2025); and Kees Versteegh, “Learning Arabic in the Islamic world,” in *The Foundations of Arabic Linguistics III*, 245–67.

¹⁰⁴ On al-Ḥāqānī’s poem and its near-contemporaneity with Ibn Muğāhid’s codification of the Set of 7, see Lauren E. Osborne, “Sound-History of the Quran: A Study of Mūsā ibn ‘Ubayd Allāh ibn Ḥāqān (or al-Ḥāqānī)’s (d. 325/937) *Qaṣīda fī al-tağwīd*,” *Mélanges de l’Institut dominicain d’études orientales* 37 (2022): 87–114, at ¶13, and as discussed above, in n. 45.

¹⁰⁵ Consult the references in Hamdan, *MM*, 111n4 (§ al-Malaṭī), 119n1 (§ al-Lālakā’ī), and 122n1 (§ al-Ḥurāsānī).

Otherwise, Mašriqī didactic poetry on the Set of 7 is confined to two works, both by Bağdādī authors and separated by more than a century. The earlier is the aforementioned *qaṣīdah* of al-Ḥusayn b. ‘Uṭmān al-Bağdādī (d. 378), whom Ibn al-Ğazarī credits with having been the first to compose a *manzūmah* of this type (*awwal man nazzamahā*); the later is *al-Qaṣīdah al-mus‘idah li-qirā‘at al-sab‘ah qurrā’ al-amṣār* of Abū al-Ḥaṭṭāb ‘Alī b. ‘Abd al-Raḥmān b. Hārūn b. al-Ğarrāḥ al-Bağdādī (d. 497), a lost work whose title is preserved, like that of its fourth-century predecessor, in the *Mašyaḥah* of Sirāğ al-Dīn al-Qazwīnī.¹⁰⁶ The Mašriq as a whole only produced similar works in a sporadic fashion. Didactic poetry on 10+ Readings centered in the Iraqi cities of Wāsiṭ and Bağdād: Sibṭ al-Ḥayyāt’s (d. 541) *Irādat al-ṭālib fī ‘ulūm al-qirā‘āt al-‘ašr*, a versified commentary on his own earlier work *al-Iḥtiyār*, and his *al-Qaṣīdah al-munğidah fī al-qirā‘āt*, itself an appendix to the aforementioned *Irādat al-ṭālib*, represent the only sustained sequence of didactic poems on 10+ Readings in the corpus. The tradition continued through Ibn Zurayq al-Ḥaddād al-Wāsiṭī (d. 596) and Ibn Dillāh al-Wāsiṭī (d. 653). The arrival of al-Šāṭibī’s *al-Šāṭibiyyah* in the Mašriq prompted two in-range commentaries: Muntağab al-Dīn al-Hamaḍānī’s (d. 643) *al-Durrah al-farīdah* and Šu‘lah al-Mawṣilī’s (d. 653) *Kanz al-ma‘ānī*, both expansions of a Mağribī didactic poem that had no Mašriqī peer.¹⁰⁷

Mağrib

With respect to the didactic poetry dedicated to a Set of Readings, the Mağribī tradition offers a wealth of information that predates the efforts of al-Šāṭibī by more than a century. Similar to the case of the Mašriq, didactic poetry related to the discipline of *qirā‘āt* was not strictly limited to a Set of Readings. Perhaps the most famous such case the so-called *al-Qaṣīdah al-Ḥuṣriyyah*, a *rā‘iyyah* composed in emulation of *al-qaṣīdah al-Ḥāqāniyyah*, by Abū al-Ḥasan ‘Alī b. ‘Abd al-Ğanī al-Fihri al-Ḥuṣrī (d. 488), a blind (*ḍarīr*, *kaṭīf*, *makfūf*) Qur’ān reciter and poet who resettled

For Ibn al-Ğazarī’s claim that al-Ḥusayn b. ‘Uṭmān al-Bağdādī was the first to versify the Set of 7, see Ibn al-Ğazarī, *ĞN*, 1.243, and the references listed at Appendix B.1.15.

¹⁰⁷ For an analysis of the geographic patterns of producing commentaries on *al-Šāṭibiyyah*, see now Ismā‘īl b. ‘Ammār, “Iḥtilāf šarrāḥ ‘al-Šāṭibiyyah’ wa-aṭruḥā ‘alā al-madāris al-Qur’āniyyah bayna al-madrasah al-Mašriqiyyah wa-l-madrasah al-Mağribiyyah,” Ph.D. Dissertation supervised by Ḥalīl Qādī (Algiers: Ğāmi‘at al-Ğazā’ir 1 [Benyoucef Benkhedda]—Qism al-‘Aqā’id wa-l-Adyān, 2024).

in al-Andalus after the Hilalian sack of Qayrawān in 450, mentioned above.¹⁰⁸ His *qaṣīdah* was dedicated solely to the Reading of Nāfi‘ which dominated Mağribī recitational praxis, and generated at least five commentaries by Andalusī authors across the fifth and sixth centuries, the only extant one being Ibn ‘Azīmah al-Iṣbīlī’s (d. 543) *al-Manḥ al-farīdah fī šarḥ ‘al-Qaṣīdah al-Ḥuṣriyyah’*.¹⁰⁹

For works devoted to a Set of Readings, the roots of this tradition unsurprisingly begin with al-Dānī, who wrote both *al-Urgūzah al-munabbihah* and the lost *K. al-Iqtīṣād fī al-qirā’āt al-sab‘*. Al-Dānī’s choice of the *urgūzah*—composed in the *rağaz* meter, the standard vehicle for didactic verse at that time—inaugurated a tradition that passed through Sulaymān b. al-Nağāḥ (d. 496) and his *Urgūzah ‘al-I’timād*, to Ibn ‘Azīmah al-Iṣbīlī (d. 543)—also the author of a commentary on *al-qaṣīdah al-Ḥuṣriyyah*—and Ibn Ġazwān al-Yāburī (d. 553). This century-long tradition of *urgūzah* composition, sustained by authors associated with Andalusian cities from Qurṭubah to Šāṭibah and Balansiyyah, culminated in a formal innovation: al-Šāṭibī’s (d. 590) *al-Šāṭibiyyah*, an abridgement of al-Dānī’s *Taysīr*, which adopted the *ṭawīl* meter, thus transforming the work from the less formal rhyme and meter requirements of the *rağaz* to the prestige form classical *qaṣīdah*.¹¹⁰

The transition from *rağaz* to *ṭawīl* encapsulates the trade-off at the heart of the issue of reproducibility. Whereas the more demanding conventions of metrical form of *ṭawīl* place significant constraints on the composer, the resulting text is not only easier to memorize but also allowed for visual paratextual markers to compress often-repeated information into a denser format.¹¹¹ When paired with its source prose handbook, al-Dānī’s *al-Taysīr*, *al-Šāṭibiyyah*

¹⁰⁸For the author, consult the references in Ahmad Damaj, “al-Ḥuṣrī, Abū I-Ḥasan,” *BA*, 1.464–66; Chedly Bouyahia, “al-Ḥuṣrī, II) Abu l’-Ḥasan [sic] ‘Alī b. ‘Abd al-Ghanī al-Fihri,” *EI2*; Andreas Herdt, “al-Ḥuṣrī al-Ḍarīr,” *EI3*; and İsmail Durmuş, “Husri, Ali b. Abdülganî,” *TDVİA*. No critical edition accounting for the manuscript witness at the Bibliothèque Nationale of Tunis (shelfmark A-MSS-19138-01) exists, but text has been published twice: once with no editor listed in Cairo: Maṭba‘at al-Manār, 1338/1919; and as *Ra’iyyah fī qirā’at al-imām Nāfi‘ mu‘araḍatan li-l-rā’iyyah al-Ḥāqāniyyah* (= *al-Qaṣīdah al-Ḥuṣriyyah*), ed. Tawfiq b. Aḥmad al-‘Abqarī (Cairo: Maktabat Awlād al-Šayḥ, 1423/2002).

¹⁰⁹For an edition of this work, see Ibn ‘Azīmah al-Iṣbīlī, *Manḥ al-farīdah al-Ḥimṣiyyah fī šarḥ ‘al-Qaṣīdah al-Ḥuṣriyyah’*, ed. Tawfiq al-‘Abqarī (Casablanca: Manšūrāt Wizārat al-Awqāf wa-l-Šu‘ūn al-Islāmiyyah, 1429/2008). On the other *šurūḥ*, see Fierro (ed.), *HATA*, id953 (al-Qurṭubī al-Anṣārī), id964 (Šāf b. Ḥalāf), id1673 (al-Aṣīrī), and id2208 (§ Murağğā b. Yūnus).

¹¹⁰On the conception of the *rağaz* and *ṭawīl* meters as suited for entirely different types of discourse, “shortest” and “longest,” respectively, see G.J.H. van Gelder, *Sound and Sense in Classical Arabic Poetry*, Arabische Studien 10 (Wiesbaden: Otto Harrassowitz, 2012), 6, 17–18, 32–33, 47–69, 75–80.

¹¹¹On the use of sigla, mnemonic devices, and other visual cues to mark the text of *al-Šāṭibiyyah*, see now Azgal, “Andalusi Scholars on Qur’ānic Readings in the Islamic East,” 250–53; and Nasser, “Variations on a Theme by Muḥammad,” 402–6; and Hassan Chahdi and Patricia Roger-Puyo, “Étude d’un *muṣḥaf* maghrébin atypique du XVIIe siècle: analyse conjointe des *qirā’āt* et des encre,” *Journal of Qur’anic Studies* 19, no. 3 (2017):144–63, at 150–57 (§ 4 – Systèmes de lettres symboliques pour les lectures)

constituted the logical conclusion of Mağribī pedagogical practice: a set of texts that made organized materials to allow ordinary *qirā'āt* students to memorize their contents, and which could also serve as the basis for further production, in the form of commentaries or other forms of text reuse, by experts.

Special topics

Beyond the cultivation of didactic poetry as a vehicle for shared canonical reproduction, *qirā'āt* scholarship also developed distinctive techniques for producing works on specialized topics for more advanced learners. Two aspects of that development are particularly well-attested. The first is methodological: a programmatic procedure by which special-topic monographs could be generated from general-scope reference works, fitting directly with the computational logic Maxim Romanov has identified in the composition of al-Ḍahabī's (d. 748) *Ta'rīḥ al-Islām*.¹¹² The second is substantive: the production of works on special topics relevant to students of the three adjacent disciplines of law (*fiqh*), exegesis (*tafsīr*), and grammar (*al-naḥw*).

Programmatic composition

Maxim Romanov has shown how al-Ḍahabī composed *Ta'rīḥ al-Islām* and other related works, such as *MQK*, by storing biographical records on “movable media” (unbound sheets kept in a codex) that could be sorted and retrieved by project, grouping them into decadal cohorts, and systematically sub-selecting his sources.¹¹³ Romanov's key observation is that al-Ḍahabī's method is programmatic: a stable sequence of operations—select, extract, represent—applied to an ordered reference corpus in order to generate a specific derivative artifact. The operational analogue in modern terms is a database query: an ordered store of records, a selection criterion (decade, region, field), and a derived output.

¹¹²Maxim Romanov, “Observations of a Medieval Quantitative Historian?” *Der Islam* 94, no. 2 (2017):463–502.

¹¹³Romanov, “Observations of a Medieval Quantitative Historian?,” 15–22 (§ 5 - In search of al-Ḍahabī's method), observing (*ibid*, 19), the applicability of this method to the composition of *MQK*.

The same kind of operation is in evidence in the *qirā’āt* corpus more than three centuries earlier, in the pairing of Abū al-Ḥasan Ibn Ḡalbūn’s (d. 399) *K. al-Istikmāl fī maḡāhib al-qurrā’ al-sab’ah fī al-imālah* with one of the works of his father, Abū al-Ṭayyib, on the Set of 7 Readings, probably the *K. al-Irṣād*.¹¹⁴ This latter work by Abū al-Ṭayyib exhaustively documents features of the Readings in *surah-by-surah* order, including instances of “inclination” (*imālah*) in the pronunciation of *alif* under certain conditioning environments.¹¹⁵ In the *Istikmāl*, Ibn Ḡalbūn proceeds differently: he first formulates a rule governing a specific instance of *imālah*, then elaborates on the application of that rule to specific morphological patterns (*awzān*, sg. *wazn*), noting the exceptions, and finally provides an exhaustive list for every single articulable instance of *imālah* for each of the Seven Readers in *surah-by-surah* order. The *Istikmāl* is thus the product of a programmatic re-extraction of *imālah* material documented throughout a source text, now reorganized by rule and *wazn*, and then indexed for reference; such a presentation of the relevant data is obviously targeted for an audience of advanced students. What Romanov identifies as the development of a programmatic technique for information retrieval from a reference corpus in order to meet the specialized needs of advanced learners can thus be shown to have been in effect already by the late fourth century in the discipline of *qirā’āt*.

Law

The nature of *qirā’āt* variants carried legal consequences before and throughout the period surveyed here, a dimension of the discipline most helpfully mapped in a number of recent studies. Ramon Harvey has traced how the Readings of Ibn Mas’ūd functioned in the earliest Kūfān-Ḥanafī juristic tradition not as mere variants but as an alternative canon—“the very basis for the articulation of law”—whose legal implications for specific Qur’ānic verses (Q al-Baqarah 2:233, Q al-Mā’idah 5:38, Q al-Mā’idah 5:89, Q al-Ṭalāq 65:6) shaped the development of

¹¹⁴The works of Abū al-Ṭayyib Ibn Ḡalbūn (d. 389), specifically his *K. al-Irṣād* and a lost work on the variants specific to each Reader, entitled *Infirād al-qurrā’*, are the only two titles mentioned in the text; cf. *K. al-Istikmāl*, ed. Buḡayrī, 673 (§ Fihris asmā’ al-kutub). In any case, there is minimal difference between the contents of Abū al-Ṭayyib’s and Abū al-Ḥasan’s works. The titular pairing of the father’s and son’s works, the first emphasizing the aforementioned theme of Guidance and the other emphasizing Comprehensiveness, offers insight into the evolution of the *qirā’āt* discipline at a micro scale, and is deserving of additional analysis.

¹¹⁵For a discussion of this linguistic feature of the Set of 7 Readings, see Marijn van Putten, *Al-Dānī’s al-Taysīr fī al-Qirā’āt al-Sab’*: A Translation with Linguistic Commentary (Cambridge: Open Book Publishers, 2026), 29–32 (§ 1.5.2). Ibn Ḡalbūn’s book also discusses the related but separate concept of *tafḥīm*, for which see *ibid*, 26 (§ Glossary).

Ḥanafī jurisprudence (*uṣūl al-fiqh*) across the formative period.¹¹⁶ Shady Nasser and Suheil Laher have also drawn attention to the extensive engagement by authors of works on *uṣūl al-fiqh* with the materials of the *qirā'āt* discipline in order to help define and resolve the issue of whether the epistemological value entailed by mass-transmission (*tawātur*) attached to the *qirā'āt*.¹¹⁷ Although earlier works, especially descriptive catalogues, provide only passing references to legal topics, by the end of period surveyed here, the legal dimension had been integrated directly into the format of *qirā'āt* works. One such example is 'Alam al-Dīn al-Saḥāwī's (d. 643) *Ġamāl al-qurrā' wa-kamāl al-qurrā'*, which explicitly expands the scope of the traditional *qirā'āt* formats so as to include legal topics, such as abrogated verses (*al-nāsiḥ wa-l-mansūḥ*), and others, registering the discipline's own engagement with a broad range of topics.¹¹⁸

Tafsīr

Exegetical reasoning enters the *qirā'āt* corpus under the rubric of works on lexical derivations (*tawğīḥ*) and probative statements (*ḥuğḡah*) on the correctness or specific variants; these works encode the grammar and justification of the variation (*iḥtilāfāt*) of the *qirā'āt*. The flagship example is Makkī b. Abī Ṭālib Ḥammūs's (d. 437) *al-Kaṣf 'an wuğūḥ al-qirā'āt al-sab' wa-'ilaliḥ wa-ḥuḡaḡihā*, in some ways a lesser-known companion to his massive and influential *tafsīr* entitled *al-Hidāyah ilā bulūḡ al-nihāyah*.¹¹⁹ In a series of studies on the œuvre of Makkī b. Abī Ṭālib, Aḥmad Ḥasan Farahāt has argued that Makkī's work evinces a deep engagement with the aforementioned *tafsīr* of the Egyptian al-Udfuwī (d. 388).¹²⁰ This interest extended further to Makkī's production on a title dedicated

'Alī Ḥusayn al-Bawwāb (Riyadh: Maktabat al-Ma'ārif, 1405/1986) = *Tafsīr al-Muškīl min ḡarīb al-Qur'ān al-'Azīm 'alā al-iḡāz wa-l-iḥtišār*, ed. Hudā al-Ṭawīl al-Mar'ašlī (Beirut: Dār al-Nūr al-Islāmī,

to the so-called “strange words” in the Qur’ān (*ġarīb al-Qur’ān*), which had long been probed for their exegetical value.¹²¹

Grammar

The grammatical orientation of *qirā’āt* scholarship is the subject of recent treatment by Christopher Melchert, who notes the centrality of grammatical justification (*i’rāb*, *‘ilal*) to the discipline’s self-understanding from the fourth century onward.¹²² The bibliographic record bears this out at the level of titling. *Qirā’āt* works that name themselves with the root *‘ilal*—the technical grammatical vocabulary of the *iḥtilāfāt*—appear repeatedly in the corpus, beginning already in the fourth century with Abū Bakr al-Naqqāš’s (d. 351) lost *K. al-Sab‘ bi-‘ilalihā al-kabīr* and Abū ‘Abd Allāh Ibn Ḥālawayh’s (d. 370) lost *I’rāb al-qirā’āt al-sab‘ bi-‘ilalihā*, and continuing through Abū ‘Alī al-Fārsī’s (d. 377) extant *K. al-Ḥuḡḡah fī ‘ilal al-qirā’āt al-sab‘*, Abū al-Ḥasan al-Sa’idī al-Ḥaddā’s (d. 410) lost *Šarḥ* of Ibn Mihrān’s *al-Ġāyah* with its accompanying *‘ilal*, and Abū al-Ḥusayn Naṣr al-Širāzī’s (d. 461) extant *K. al-Ġāmi‘ fī al-qirā’āt al-‘ašr bi-‘ilalihā*; two independent works entitled *Maḡārīd al-‘ašarah bi-‘ilalihā* are attributed to Abū ‘Alī al-Ahwāzī (d. 446) and Abū ‘Alī Sahl al-Iṣbahānī (d. 543), both lost. Of these, only one is of Mağribī origin—Abū Ṭāhir Ismā‘īl b. Ḥalaf al-Naḥwī’s (d. 455) extant *Muḥtaṣar* of al-Fārsī’s *K. al-Ḥuḡḡah*—and another Mağribī work uses the cognate of *‘illah* (*tawḡīḥ*) in its title: Abū al-Ḥasan Šurayḥ b. Muḥammad al-Ru‘aynī’s (d. 539) extant *al-Ġam‘ wa-l-tawḡīḥ li-mā infarada bihī Ya‘qūb b. Iṣḥāq*. The grammatical focus of *‘ilal* works was thus a Mašriqī disciplinary signature: just as Mağribī authors invested in versified curricular instruments, Mašriqī authors invested in works that wove *qirā’āt* into the explanatory apparatus of grammar.

1408/1988). Consult further the references in Appendix A.2.14, adding to these Farahāt, “‘Kitāb al-‘Umdah fī ġarīb al-Qur’ān’ wa-taṣṭīḥ nisbatuhū ilā Makkī b. Abī Ṭālib al-Qaysī,” *Mağallat al-Šarī‘ah wa-l-Dirāsāt al-Islāmiyyah* (Kuwait) 1, no. 1 (1404/1984):55–69, *apud* Tayyar Altıkulaç, “Mekkī b. Ebū Ṭālib,” *TDVİA*; and much needed additional documentation in Conor Dube, “Interpreting the Qur’ān in the Islamic West (7th–11th c.): Tradition and Transformation in *Tafsīr*,” Ph.D. Dissertation supervised by Shady Hekmat Nasser (Cambridge, MA: Harvard University, 2025), 419–28, 441–46, and 475–81.

¹²¹ On the lexicographical efforts in these area that predate Makkī, see Ramzi Baalbaki, “The notion of *gharīb* in Arabic lexica,” *Journal of Abbasid Studies* 6, no. 2 (2019):185–208, at 198–203. Synthesis

Authors from both regions addressed the same fundamental problem: ensuring that the Reading Traditions were properly conceptualized and stabilized under the control of appropriate authorities so that they could be transmitted consistently across generations; they once again arrived at characteristically different solutions. In the interest of reproducibility, Mağribī authors invested in didactic poetry, propounding a continuous tradition that exhibits two distinct metrical tracks of development: the *urğūzah* adopted by al-Dānī and perpetuated by his line of students and their students; and the adoption of *ṭawīl*, as appears to have been conventional for elementary works related to the *qirā’āt* since the time of al-Ḥāqānī’s verse on *tağwīd*, and implemented for the reading of Nāfi‘ by al-Ḥuṣrī, and extended to the Set of 7 Readings by al-Šāṭibī. By contrast, Mašriqī authors engaged with versification only sporadically and instead engaged more diligently with grammatical theory.¹²³ This interdisciplinary convergence is a hallmark of both regions, where authors produced specialized literature that activates the materials of the *qirā’āt* for non-disciplinary experts and advanced learners alike. The connections surveyed above—to law, exegesis, and grammar—attest to a discipline that was intensively engaged with adjacent fields throughout the period, and the programmatic procedure exemplified in Ibn Ġalbūn’s *K. al-Istikmāl* demonstrates the sophisticated pedagogical capacity to extract and reuse specialized content with incredible accuracy as early as the fourth century.

6 Conclusion

The question of which Set of Readings served as the “canon” of the *qirā’āt* discipline of the 4th–7th centuries AH is complex, but solvable when understood as two independent, geographically delimited Mašriqī and Mağribī “pedagogical canons,” rather than a series of interventions by vastly influential individuals. Support for this argument accrues from a variety of evidence, including statistical analyses of bio-bibliographic data of the *qirā’āt* discipline, a chronological account of disciplinary developments in each of the Mašriq and Mağrib, and a correlation of the

¹²³This is not to suggest that Mağribī authors were strangers to grammar, either, as evidenced in their production of commentaries on grammatical works and the inclusion of grammatical principles of identifying *tawğīh* and *’ilal* in their own works.

results of this analysis with evidence of pedagogical practices in each of these regions across the period covered by this survey. The picture that emerges is not of a single canonical equilibrium of 7 Readings suddenly punctuated by the forceful introduction of 3 more, but of two regional canons that aligned in certain ways—including the near simultaneous expression of a preference for a Set of 7 Readings by both Ibn Muğāhid (d. 324) in Bağdād and al-Muẓaffar b. Aḥmad (d. 333) in Egypt—but which over time came to differ in real, measurable terms.

The differences that we have been able to identify between the Mašriq and Mağrib regions are stark. The statistical analysis conducted in § 2 identifies a Mašriqī work as between 18 and 19 times more likely than a Mağribī work to transmit a Set of 10+ (median OR = 18.8), with the 99% credible interval on the regional effect excluding zero in every specification tested—including when sub-region is entered as a varying intercept, the most demanding control available, since sub-region is nested within region and competes with it for the same signal (+1.36 to +4.67). The narrative reconstruction in § 3 locates the sources of this divergence in regionally distinct trajectories: Mašriqī authors moved from a multi-polar 4th century, in which Iraq, al-Šām, and Ḥurāsān each favored a different Set, to a fifth-century consolidation on a Set of 10+ that became the default orientation of new Iraqī composition for the remainder of the survey save for a sudden resurgence of interest in the Set of 7 at the tail end through contact with Mağribī literature. Mağribī authors, by contrast, established a hierarchical primary-and-secondary canon—a Set of 7 maintained alongside the *mufradah* of Ya'qūb—that persisted throughout the period surveyed. The analysis of pedagogical factors in § 4 shows this regional divergence was reproduced at every level of pedagogical activity observed: in titular vocabulary (Mašriqī Comprehensiveness vs. Mağribī Guidance), in the mechanics of paired works (Mašriqī catalogue–*mufradāt* vs. Mağribī catalogue–student-manual), and in the Mağrib marked by outstanding production in didactic poetry, and both regions engaged in specialized literature designed to engage in broader interdisciplinary discourse.

None of these findings could have been reached by traditional scholarly methods on their own, nor by a computational-statistical method, however sophisticated. The statistical analysis supplies the regional signal with credible-interval quantification and renders the Mašriq–Mağrib divergence legible as a structural feature of

the bibliographic record rather than an ad hoc impression; the Bayesian multinomial analysis identifies regional origin as the dominant predictor of Set preference even when mobility and work format are controlled for, and the Jensen-Shannon divergence measure provides a realistic boundary about our confidence in the degree of divergence. But these tools, despite their explanatory power, offer only limited insight as to *why* and *how* the divergence arose; in most cases, the answers to such questions cannot be found in the bio-bibliographic data alone, but must be contextualized with documentation from other methods or disciplines. In these cases, we find a striking congruence between the timeline of events within which shaped the *qirā'āt* discipline suggested by the Bayesian model and that which can be derived only from the record of non-disciplinary intellectual and geopolitical developments. As examples of this complementarity, we have cited the alignment of the narrative of the dramatic developments in the fifth century with the non-parametric JSD estimation; shown that the Šāmī corridor that carried the Set of 7+1 westward in the 4th–5th centuries ended in conjunction with the Crusader-era disruption of Eastern Mediterranean scholarly networks; and demonstrated that the literal sea change of Mağrib-to-Mašriq textual reception accompanied Andalusī migration to Dimašq in the 7th century. In such cases, the narrative reconstruction fills in the silences or uncertainties of our data, providing strong corroboration of the statistical model's predictions. In joining these traditional and computational approaches to our material, we follow the example of *K. al-Istikmāl* by Ibn Ġalbūn: the “select, extract, re-present” procedure that underwrites purpose of the database that underlies this study is itself demonstrated to have been the technique that Abū al-Ḥasan Ibn Ġalbūn (d. 399) himself applied in that same work. The consilience¹²⁴ of the two modes of research utilized in this paper converges on a narrative of the development of the *qirā'āt* discipline no less coherent than those posed in previous scholarship, with the additional benefit of providing a better fit to the available data. It is hoped that we have provided an example to follow for other authors working within and outside the modern discipline of Qur'anic Studies so as to approach the complex historical processes related to the large-scale transmission of vital cultural information.¹²⁵

¹²⁴On the implications of the consilience of evidence from difference classes of data as an indicator of the strength of a generalized conclusion, see E.O. Wilson, *Consilience: The Unity of Knowledge* (New York: Random House, 1998).

¹²⁵On the theoretical underpinnings of large-scale transmission of cultural information through social learning, see in particular Alex Mesoudi,

In light of the present results, several directions for further research emerge from this study. Within the sub-discipline of *qirā'āt* studies there is an obvious need to reassess the situation of the second and third centuries, an era characterized by an even more extensive, if now better catalogued, “shadow corpus” of lost works than was available to Bergsträßer and Pretzl in their seminal and arguably still “canonical” account of the development of the *qirā'āt* during this time period. More detailed bio-bibliographical studies of sub-regions, particularly Egypt and the Ḥiğāz, would also likely produce important results.¹²⁶ In the opposite temporal direction, the finding of a trend toward more extensive contact between Mašriqī and Mağribī *qirā'āt* authors by the end of the surveyed period, especially the concomitant increase in attraction to the Set of 7 Readings in the Mašriq, warrants further inquiry. Specific scrutiny should be applied to the claim, voiced by numerous modern scholars, that credit for “canonizing” the Set of 10+ belongs with Ibn al-Ğazarī, and more attention given to how authors in the *qirā'āt* discipline in both the Mašriq and Mağrib active from ca. 650 through the career of Ibn al-Ğazarī and beyond adapted their pedagogical practices around the introduction of previously unfamiliar disciplinary knowledge. Finally, the adaptation of the concept of a pedagogical canon proposed by Sayeed and Qaouar might also be profitably applied to other disciplines—such as law, *ḥadīth*, or Sufism (*taṣawwuf*)—using comparable bibliometric methods, both in order to refine the framework itself and better describe the exceptionally rich pedagogical networks encoded in Arabic literature.

7 Appendices

The tables provide a survey of bio-bibliographic data for the scholars active in the discipline of *qirā'āt* and their works for the period covered by the present investigation. In order to avoid encumbering the footnotes, those works which are referenced multiple times in the following appendices are cited in an abbreviated format. Where more than one edition of a reference work is cited in these appendices, the order of the citations is given under the Abbreviation:

Cultural Evolution: How Darwinian Theory Can Explain Human Culture and Synthesize the Social Sciences (Chicago: University of Chicago Press, 2011); and Oliver Morin, *How Traditions Live and Die*, Foundations of Human Interaction (Oxford: Oxford University Press, 2016).

¹²⁶The sparseness of the data examined here should strictly not be interpreted to mean that Egypt was devoid of literary production in the *qirā'āt* in early periods. To the contrary, this sub-region was highly active in the production of texts on the Readings of Warṣ 'an Nāfi' already in the third century, for which see Hamdan, *MM*, 48nn3–5 (§ Abū al-Azhar al-'Utaqī), 52nn56 (§ al-Azraq Abū Ya'qūb), 56nn3–4 (§ Ibn al-Ṭabarī Abū Ğa'far), 63nn1–2 (§ al-Riṣḍīnī Abū al-Rabī'), 65nn304 (§ Yūnus b. 'Abd al-A'lā), and 68n5–69n2 (§ al-Naḥḥās Abū al-Ḥasan al-Tuğībī).

Appendix A

Table 10: Table A.1: Mašriqī *qirā'āt* authors (Total: 66)

№	Name	Dates (AH/AD)	Origin
1	Abū Bakr Aḥmad b. Mūsā Ibn Muğāhid ¹²⁷	245–324/859–936	Iraq
2	Abū Bakr Muḥammad b. Aḥmad al-Dāğūnī al-Kabīr ¹²⁸	Dies 324/936	Šām
3	Abū al-Ḥusayn Aḥmad b. Ğa'far Ibn al-Munādī ¹²⁹	256–336/870–947	Iraq
4	Abū Ishāq Ibrāhīm b. 'Abd al-Razzāq al-Anṭākī ¹³⁰	Dies 338/949?	Šām
5	Abū al-Ṭayyib Aḥmad b. Ya'qūb al-Tā'ib al-Anṭākī ¹³¹	Dies 340/951?	Šām
6	Abū Ṭāhir 'Abd al-Wāḥid b. 'Umar Ibn Abī Hāšim ¹³²	Dies 349/960	Iraq
7	Abū Bakr Muḥammad b. al-Ḥasan al-Naqqāš ¹³³	266–351/880–962	Iraq
8	Abū al-Ḥasan Aḥmad b. al-Šaqr b. Ṭābit al-Manbiğī ¹³⁴	Dies before 366/976	Iraq
9	Abū 'Abd Allāh al-Ḥusayn b. Aḥmad Ibn Ḥālawayh ¹³⁵	Dies 370/980	Iraq
10	Abū 'Alī al-Ḥasan b. Aḥmad b. 'Abd al-Ğaffār al-Fārisī ¹³⁶	288–377/900–87	Fārs

¹²⁷ al-Ḍahabī, *MQK*, 2.533–38 №266; and Ibn al-Ğazarī, *ĠN*, 1.44 №183. Consult further the references in Aḥmad Pākatī, “Ibn Muğāhid,” *DMBI*; James Robson, “Ibn Muğāhid,” *EI2*; Shady H. Nasser, “Ibn Muğāhid,” *EI3*; Ḥamdān, *Adab*, 287 = *MM*, 86n3; Aḥmad b. Sa'd b. Ḥusayn al-Muṭayr, *Kitāb al-Sab'ah li-Ibn Muğāhid 'arḍan wa-dirāsatan* (Riyadh: Ğāmi'at al-Malik Sa'ud – Kursī al-Qur'ān al-Karīm wa-'Ulūmih, 1436/2014); Sālim, *Mu'ğam ḥuffāz*, 1.120–23; Sezgin, *GAS*, 14 №16; Tayyar Altıkulaç, “Ibn Mucāhid,” *TDVİA*; and Walad Ubbāh, *Tārīḥ al-qirā'āt*, 121–39.

¹²⁸ al-Ḍahabī, *MQK*, 2.539–40 №278; and Ibn al-Ğazarī, *ĠN*, 2.77 №2765. Consult further the references in Ḥamdān, *Adab*, 317 = *MM*, 91n4; and Sālim, *Mu'ğam ḥuffāz*, 1.102–3.

¹²⁹ Ibn al-Ğawzī, *al-Muntaẓam fī ta'rīḥ al-mulūk wa-l-umam*, ed. Muḥammad 'Abd al-Qādir 'Aṭā and Muṣṭafā 'Abd al-Qādir 'Aṭā, 18 vols. + Index by Ibrāhīm Šams al-Dīn (Beirut: Dār al-Kutub al-'Ilmiyyah, 1412/1992), 14.65–66 №2493, noting that he is supposed to have written more than 400 works on the Qur'ānic disciplines, twenty-one of which were known to the Mu'tazilī Abū Yūsuf al-Qazwīnī (d. 488/1095); al-Ḍahabī, *MQK*, 2.563–64 №286; and Ibn al-Ğazarī, *ĠN*, 1.44 №183. Consult further the references in David Cook, “Apocalypse and Identity: Ibn al-Munadi and Tenth Century [sic] Baghdad,” *ARC: The Journal of the Faculty of Religious Study, McGill University* 38 (2011):15–36; Ḥamdān, *Adab*, 327 = *MM*, 95n3; Sālim, *Mu'ğam ḥuffāz*, 1.206–9; Sezgin, *GAS*, 44 №24; and Tayyar Altıkulaç, “Ibnū'l-Munādī,” *TDVİA*.

¹³⁰ al-Ḍahabī, *MQK*, 2.566–68 №290; and Ibn al-Ğazarī, *ĠN* 1.16 №64. Consult further the references in Ḥamdān, *Adab*, 333 = *MM*, 97n4; and Sālim, *Mu'ğam ḥuffāz*, 1.45–46.

¹³¹ al-Ḍahabī, *MQK*, 2.559–60 №281; and Ibn al-Ğazarī, *ĠN*, 1.151 №700. Consult further the references in Ḥamdān, *Adab*, ## = *MM*, 98n3; and Sālim, *Mu'ğam ḥuffāz*, 1.326–27.

¹³² al-Ḍahabī, *MQK*, 2.603–5 №323; and Ibn al-Ğazarī, *ĠN*, 1.475 №1983. Consult further the references in Ḥamdān, *Adab*, 338 = *MM*, 99n4; and Sālim, *Mu'ğam ḥuffāz*, 1.317–19.

¹³³ al-Ḍahabī, *MQK*, 2.578–83 №299; and Ibn al-Ğazarī, *ĠN*, 2.119 №2938. Consult further the references in Ḥamdān, *Adab*, 359 = *MM*, 101n3; Sālim, *Mu'ğam ḥuffāz*, 1.129–32; Sezgin, *GAS*, 44 №25; and Abdulhamit Birişik, “Nakkāš, Muhammed b. Hasan,” *TDVİA*.

¹³⁴ Ibn 'Asākir, *TMD*, 71.193 №9657; al-Ḍahabī, *MQK*, 2.643 №362; and Ibn al-Ğazarī, *ĠN*, 1.63 №271. Consult further the references in Ḥamdān, *Adab*, 379 = *MM*, 102n3.

¹³⁵ Ibn al-Ğazarī, *ĠN*, 1.237 №1083. Consult further the references in Sayyid Muḥammad Sayyidī, “Ibn Ḥālawayhi,” *DMBI*; Anton Spitaler, “Ibn Khālawayh,” *EI2*; Monique Bernards, “Ibn Khālawayh,” *EI3*; Michael G. Carter, “Ebn Kālawayh, Abū 'Abd-Allāh Ḥosayn,” *Elr*; Ḥamdān, *Adab* 383 = *MM*, 109n1; Maḥmūd Ğāsim Muḥammad, *Ibn Ḥālawayh wa-ğuhūduhū fī al-luğah ma'a taḥqīq kitābihī* ‘Šarḥ Maqṣūrat Ibn Durayd’ (Beirut: Mu'assasat al-Risālah, 1407/1987), 13–38 (§ Editor's Introduction); and Hüseyin Tural, “İbn Hāleveyh,” *TDVİA*.

¹³⁶ Ibn al-Ğazarī, *ĠN*, 1.206 №951. Consult further the references in 'Ināyat Allāh Fātiḥī Naẓād, “Abū 'Alī Fārisī,” *DMBI*; Chaim Rabin, “al-Fārisī,” *EI2*; Reinhard Weipert, “Abū 'Alī al-Fārisī,” *EI3*; Ihsan Abbas, “Abū 'Alī Fārisī,” *Elr*; Ḥamdān, *Adab*, 396 = *MM*, 110n4; and Mehmet Reşit Özbalkıç, “Ebū Ali el-Fārisī,” *TDVİA*.

№	Name	Dates (AH/AD)	Origin
11	Abū 'Abd Allāh al-Ḥusayn b. 'Uṣmān ('Alī) b. Tābit al-Ḍarīr ¹³⁷	Dies 378/988?	Šām
12	Abū Tāhir Muḥammad b. al-Ḥasan al-Anṭākī ¹³⁸	Dies before 380/990	Šām
13	Abū Bakr Aḥmad b. al-Ḥusayn Ibn Mihrān ¹³⁹	295–381/908?–92	Fārs
14	Abū Aḥmad 'Abd Allāh b. al-Ḥusayn Ibn Ḥasnūn ¹⁴⁰	295–386/908?–96	Iraq
15	Abū al-Qāsim Maṣṣūr [Ibn] al-Sindī al-Warrāq ¹⁴¹	Dies 386/996	Fārs
16	Abū al-Ṭayyib 'Abd al-Mun'im b. 'Ubayd Allāh Ibn Ġalbūn ¹⁴²	309–389/921?–99	Šām
17	Abū Muḥammad 'Abd Allāh b. Aḥmad al-Ḍabbī al-Ġāwili ¹⁴³	Dies after 395/1004	Ġibāl
18	Abū al-Ḥasan Tāhir b. 'Abd al-Mun'im Ibn Ġalbūn ¹⁴⁴	Dies 399/1009	Šām
19	Abū al-Ḥasan 'Alī b. 'Abd Allāh al-Fārsī ¹⁴⁵	Dies 4th/10th c.?	Fārs
20	Abū al-Ḥasan 'Alī b. Muḥammad al-Fārsī ¹⁴⁶	Dies 4th/10th c?	Fārs
21	Abū Bakr Aḥmad b. 'Ubayd Allāh b. Idrīs ¹⁴⁷	Dies before 400/1009	Iraq
22	Abū Naṣr Aḥmad b. Muḥammad al-Ḥaddādī ¹⁴⁸	Dies after 400/1009	Ḥurāsān

¹³⁷al-Ḍahabī, *MQK*, 2.678 №404; and Ibn al-Ġazarī, *ĠN*, 2.67 №2739. Consult further the references in Ḥamdān, *Adab*, 396 = *MM*, 112n1.

¹³⁸al-Ḍahabī, *MQK*, 2.660 №384; and Ibn al-Ġazarī, *ĠN*, 2.118 №2932. Consult further the references in Ḥamdān, *MM*, 112n3; and Sālim, *Mu'ḡam ḥuffāz*, 1.312–13.

¹³⁹al-Ḍahabī, *MQK*, 2.662–64 №387; and Ibn al-Ġazarī, *ĠN*, 1.49 №208. Consult further the references in Aḥmad Pākātčī, “Ibn Mihrān,” *DMBI*; Ḥamdān, *Adab*, 398 = *MM*, 113n3; Sālim, *Mu'ḡam ḥuffāz*, 1.575–76; Sezgin, *GAS*, 15 №19; Ali Eroğlu, “Ibn Mihrān en-Nisābūrī,” *TDVİA*; and Walad Ubbāh, *Tārīḥ al-qirā'āt*, 141–53. Eroğlu (*TDVİA*) wrongfully ascribes two works to Ibn Mihrān. The first is a work entitled “*K. fī al-qirā'āt al-sab'*”, for which see Valdimir Ivanov (Wladimir Ivanow) and Muḥammad Hidāyat Ḥusayn, *Catalogue of the Arabic manuscripts in the collection of the Royal Asiatic Society Bengal*, 2 vols., Biblioteca Indica 250 (Calcutta: Royal Asiatic Society of Bengal, 1939), 1.45. Otherwise, Eroğlu erroneously identifies as Ibn Mihrān's lost *K. al-Šāmil* (Table B.3.4) a work by 'Umar b. Muḥammad b. 'Abd al-Kāfī (d. ca. 400/1009) on “*add suwar al-Qur'ān*”, shelfmarked at Leiden University Library, Ar. 674, now published as 'Umar b. Muḥammad b. 'Abd al-Kāfī, *Adad suwar al-Qur'ān wa-āyātihī wa-kalimātihī wa-ḥurūfihī wa-talḥiṣ Makkīhī min Madadnih*, ed. Ḥālid Ḥasan Abū al-Ġūd (Cairo: Maktabat al-Imām al-Buḥārī, 1431/2010). I am grateful to the staff of the Rare Book and Manuscript Reading Room at the University of Leiden Library as well as Conon Dube for their assistance in clarifying these misattributions.

¹⁴⁰al-Ḍahabī, *MQK*, 2.634 №358; and Ibn al-Ġazarī, *ĠN*, 1.415–17 №1761.

¹⁴¹Abū Nu'aym al-Iṣbahānī, *K. Tārīḥ Iṣbahān* (= *Ḍikr aḥbār Iṣbahān*), ed. Sven Dederling, 2 vols. (Leiden: Brill, 1934), 2.321 (§ Maṣṣūr b. Muḥammad al-Sindī [*sic*]); and al-Ḍahabī, *SAN*, 16.145 (§ al-Šamšāfī al-Ḥaṭīb al-Muqrī'), placing him in Wāsiṭ in 358/968?. Consult further the references in Ḥamdān, *Adab*, 412.

¹⁴²al-Ḍahabī, *MQK*, 2.677–78 №394; and Ibn al-Ġazarī, *ĠN*, 1.470 №1967. Consult further the references in Muḥammad Šādiq Šarī'at, “Ibn Ġalbūn, Abū al-Ṭayyib,” *DMBI*; Ḥamdān, *Adab*, 422 = *MM*, 117n3; Sālim, *Mu'ḡam ḥuffāz*, 1.402–4, 2.210–12; Sezgin, *GAS*, 15 №20; and Nasuhi Ünal Karaarslan, “Ibn Ġalbūn, Ebū'l-Ṭayyib,” *TDVİA*. Al-Dānī recorded a meeting between him and Sa'īd b. Muḥammad b. 'Abd al-Barr al-Andalusī (d. 404/413?), a native of Zaragoza, in Egypt in 352/963, when Abū al-Ṭayyib was still “young” (*šābb*); see Ḥamīdū, *Mu'ḡam šuyūḥ al-Dānī*, 72 №29.

¹⁴³Ibn al-Ġazarī, *ĠN*, 1.408–9 №1739. Consult further the references in Ḥamdān, *Adab*, 453.

¹⁴⁴al-Ḍahabī, *MQK*, 2.698–99 №416; and Ibn al-Ġazarī, *ĠN*, 1.339 №1475. Consult further the references in Editors (Baḥš-i Fiqh), “Ibn Ġalbūn, Abū al-Ḥasan,” *DMBI*; Ḥamdān, *Adab*, 457 = *MM*, 120n4; Ḥamīdū, *Mu'ḡam šuyūḥ al-Dānī*, 77–79; Sālim, *Mu'ḡam ḥuffāz*, 1.315–16, and 2.179–80; Sezgin, *GAS*, 16 №23; Tayyar Altıkulaç, “Ibn Ġalbūn,” *TDVİA*; and Walad Ubbāh, *Tārīḥ al-qirā'āt*, 156–160.

¹⁴⁵Ibn al-Ġazarī, *ĠN*, 1.470 №1967. Consult further the references in Ḥamdān, *MM*, 122n4.

¹⁴⁶Ibn al-Ġazarī, *ĠN*, 1.579 №2345. Consult further the references in Ḥamdān, *MM*, 123n1.

¹⁴⁷Consult the references in Abū Bakr Aḥmad b. 'Ubayd Allāh b. Idrīs, *al-Kiṭāb al-Muḥṭār fī ma'ānī qirā'āt ahl al-amṣār*, ed. 'Abd al-'Azīz b. Ḥamīd b. Muḥammad al-Ġahī? (Riyadh: Maktabat al-Ruṣd, 1428/2007), 5–28 (§ Editor's Introduction).

¹⁴⁸Ibn al-Ġazarī, *ĠN* 1.105 №483. Consult further the references in Abū al-Naṣr al-Ḥaddādī al-Samarqandī, *al-Maḍḥal li-'ilm tafsīr kitāb Allāh ta'ālā*, ed. Šafwān 'Adnān Dāwūdī (Beirut: Dār al-'Ulūm and Damascus: Dār al-Qalam, 1408/1988), 17–27 (§ Editor's Introduction); Brockelmann, *GAL*,

№	Name	Dates (AH/AD)	Origin
23	Abū al-Faṭḥ Fāris b. Aḥmad al-Ḥimṣī al-Ḍarīr ¹⁴⁹	333–401/944–1011	Šām
24	Abū al-Ḥasan ‘Alī b. Ğa‘far al-Sa‘īdī al-Ḥaḍḍā’ ¹⁵⁰	Dies 404/1014	Ġibāl

Appendix B

Qirā'āt works from the 7, 7+1 and 10+ Reading Systems until ca. 650 AH/1253 AD

Table 12: Table B.1: Works on 7 Readings (Total: 88)

	№	Title	Status	Author	Region
	1	<i>K. Mufradāt al-sab</i> ' [B.1.2]	Lost ²³¹	Abū Bakr Ibn Muğāhid (d. 324)	Mašriq

²²²Much of the literature reads his *nasab* as “Fīrruh,” follows the bio-bibliographical sources in vowelizing the initial *fā*’ with *kasrah* and geminating the penultimate *rā*’. I render it here, following the same restrictions, as the antecedent to the modern “Fierro.” On his life, see al-Ḍahabī, *MQK*, 3.1110–15 №839; and Ibn al-Ġazarī, 2.20–23 №2600. Consult further the references in Maribel Fierro, “Ibn Fīrruh al-Ru’aynī,” *BA*, 3.172–76 №480; Brockelmann, *GAL*, 1.409/453–55 №12 = *Supplement* 1.725/751–53 №12; Fritz Krenkow, “al-Šāṭibi,” *EI1*; Angelika Neuwirth, “al-Šāṭibi,” *EI2*; Ḥamdān, *MM*, 224n5; *PUA* (ed. Ávila) id7550, URL:https://www.eea.csic.es/pua/personaje/consulta_personaje.php?id=7550; Abdurrahman Çetin, “Šāṭibi, Kāsim b. Fīrruh,” *TDVİA*; and Walad Ubbāh, *Tārīḥ al-qirā’āt*, 345–46.

²²³al-Ḍahabī, *MQK*, 3.1206–13 №940; and Ibn al-Ġazarī, *ĠN*, 1.609 №4292. Consult further the references in Ḥamdān, *MM*, 231n2; and *PUA* (ed. Ávila) id7277, URL:https://www.eea.csic.es/pua/personaje/consulta_personaje.php?id=7277.

²²⁴al-Ḍahabī, *MQK*, 3.1229–31 №954 = *SAN* 23.41–42 №28; and Ibn al-Ġazarī, *ĠN*, 1.373 №1587. Consult further the references in Brockelmann, *GAL*, 410/455 №13 = *Supplement* 1.727/754 №13; and Ḥamdān, *MM*, 232n3.

№	Title	Status	Author	Region
Table 13: Table B.2: Works on 7+1 Readings (Total: 27)				
1	<i>K. al-Qirā'āt</i>	Lost ³¹⁶	Abū Bakr Muḥammad b. Aḥmad al-Dāğūnī al-Kabīr (d. 324)	Mašriq
2	<i>al-Īğāz wa-l-iqtisār fī al-qirā'āt al-ṭamān</i>	Lost or wrongly attributed ³¹⁷	Abū al-Ḥusayn Aḥmad b. Ġa'far Ibn al-Munādī (d. 336)	Mašriq
3	kitāb fī al-qirā'āt al-ṭamān	Lost ³¹⁸	Abū Ishāq Ibrāhīm b. 'Abd al-Razzāq al-Anṭākī (d. 338)	Mašriq
4	<i>K. al-Qirā'āt al-ṭamāniyah</i>	Lost ³¹⁹	Abū Bakr Muḥammad b. al-Ḥasan al-Naqqāš (d. 351)	Mašriq
5	<i>K. al-Badī'</i> (composed in al-Šām?)	Published ³²⁰	Abu 'Abd Allāh al-Ḥusayn b. Aḥmad Ibn Ḥālawayh (d. 370)	Mašriq
6	kitāb fī al-qirā'āt al-ṭamān	Lost ³²¹	Abū Tāhir Muḥammad b. al-Ḥasan al-Anṭākī (d. before 380)	Mašriq + Mağrib
7	kitāb fī qirā'at Ya'qūb	Lost ³²²	Abū Aḥmad 'Abd Allāh b. al-Ḥusayn Ibn Ḥasnūn (d. 386)	Mašriq + Mağrib
8	<i>Mā infarada bihī al-qurrā' al-ṭamāniyah min al-yā'āt wa-l-nūnāt wa-l-tā'āt wa-l-bā'āt</i>	Published ³²³	Abū al-Tayyib 'Abd al-Mun'im b. 'Ubayd Allāh Ibn Ġalbūn (d. 389)	Mašriq + Mağrib

³¹⁶Consult the references in Ḥamdān, *Adab*, 318–20 №196 = *MM*, 91n5, stressing that the work included the reading of Abū Ġa'far Yazīd b. al-Qa'qā' al-Madanī (d. 130/747).

³¹⁷Ibn al-Ġazarī, *GN*, 2.387. Consult further the references in Ḥamdān, *Adab*, 472–74 №340, suggesting that this title should actually be attributed to Abū al-Ḥasan al-Sa'īdī (B.2.12) = *MM*, 96n2.

³¹⁸al-Ḍahabī, *MQK*, 2.566. Consult further the references in Ḥamdān, *Adab*, 334 №21 = *MM*, 97n4.

³¹⁹Ibn al-Nadīm, *Fihrist*, 1.100, noting that this work included the reading of Ḥalaf b. Hišām al-Bazzāz (d. 229/843). Consult further the references in Ḥamdān, *Adab*, 362–63 №242.

³²⁰Ibn Ḥālawayh, *K. al-Badī'*, ed. Ġāyid Zaydān Muḥlif (Baghdad: Dīwān al-Waqf al-Sunnī and Markaz al-Buḥūṭ wa-l-Dirāsāt al-Islāmiyyah, 2007), based on the unicum manuscript in Dublin, Chester Beatty Library, Ar. 3051, URL: https://viewer.cbl.ie/viewer/image/Ar_3051/13/. Two late manuscripts based on the marginal commentary, containing the so-called *šād* readings identified by Ibn Ḥālawayh, were published separately as *Muḥtaṣar fī šawādd al-Qur'ān min 'K. al-Badī'* (= *Ibn Ḥālawayh's Sammlung nichtkanonischer Koranlesarten*), ed. Gotthelf Bergsträßer with an introduction by Arthur Jeffery (Cairo: al-Maṭba'ah al-Raḥmāniyyah, 1934), reprints Beirut: Orient-Institut Beirut, 2009, and Cairo: Maktabat al-Mutanabbī, N.D. Consult further the references in Ḥamdān, *Adab*, 383–84 №261 = *MM*, 109n2; and Sezgin, *GAS*, 18 №12.

³²¹al-Ḍahabī, *MQK*, 2.660. Consult further the references in Ḥamdān, *Adab*, 334 №214 = *MM*, 112n4.

³²²Consult the references in Ḥamdān, *Adab*, 414 №300n4, citing Abū 'Amr al-Dānī, *Mufradat Ya'qūb*, ed. Ḥatīm Šāliḥ al-Ḍāmin (Dammām, KSA: Dār Ibn al-Ġawzī, 1439/2008), 119 [= B.2.13]. The Arabic from al-Dānī, *Mufradat Ya'qūb*, reads: *ka-dā qara'tu 'alā* [Abū al-Faṭḥ] Fāris [b. Aḥmad al-Ḥimšī, Table A.1.23] *'an qirā'tihī 'alā 'Abd Allāh b. al-Ḥusayn* [Ibn Ḥasnūn al-Bağdādī] *wa-aḥsibuhū annahū lammā ra'ā* [viz. Ibn Ḥasnūn] *fī 'kitāb qirā'at Ya'qūb* (*wa-ğā'ilu l-layli sākinan*) (Q al-An'am 6:96) *zanna* [viz. Ibn Ḥasnūn] *l-murāda bi-iḥbāti l-'alif fīhi fī qawlihi (sākinan) bi-l-alif wa-innamā l-murādu bi-ḡālika qawlihi (wa-ğā'ilu)*. The text therefore seems to indicate that Ibn Ḥasnūn had access to an already extant work on the Reading of Ya'qūb; the attribution deserves further scrutiny.

³²³Muḥammad 'Abd al-Karīm Kāzim al-Rādī, "*Mā infarada bihī al-qurrā' al-ṭamāniyah* li-Abī al-Tayyib Ibn Ġalbūn," *Mağallat al-Mawrid* (Baghdad) 16, no. 1 (1407/1987):175–90 = Ibn Ġalbūn, *Mā infarada bihī al-qurrā' al-ṭamāniyah*, ed. 'Alī Ḥusayn al-Bawwāb, *Mağallat al-Buḥūṭ al-Islāmiyyah* (Riyadh) 26 (1410/1990):255–75, reprint *Min Ḍaḡā'ir al-turāt*, ed. 'Alī Ḥusayn al-Bawwāb (Riyadh: Kunūz al-Išbīliyyā, 2007), 35–70. Consult further the references in Ḥamdān, *Adab*, 441–45 №317.

№	Title	Status	Author	Region
9	<i>K. al-Taḍkirah fī al-qirā'āt al-ṭamān</i> (composed in al-Šām)	Published ³²⁴	Abū al-Ḥasan Ṭāhir b. 'Abd al-Mun'im Ibn Ġalbūn (d. 399)	Mašriq + Mağrib

15	<i>al-Qirā'āt al-mašhūrah fī al-amṣār al-ātiyah mağī' al-tawātur</i>	Published ³³⁰	Abū Muḥammad 'Alī b. Aḥmad Ibn Ḥazm al-Qurṭubī (d. 456)	Mağrib
16	<i>Mufradat Ya'qūb</i>	Published ³³¹	Abū 'Abd Allāh Muḥammad b. Šurayḥ al-Ru'aynī al-Išbīlī (d. 476)	Mağrib

³²⁴Abū al-Ḥasan Ibn Ġalbūn, *K. al-Taḍkirah fī al-qirā'āt al-ṭamān*, ed. Ibrāhīm 'Abd al-Fattāḥ Buḥayrī (Cairo: al-Zahrā' li-l-I'lām al-'Arabī, 1990) = ed. Ayman Ruṣḍī Suwayd, 2 vols. (Jeddah: Dār al-Manārah in association with al-Ġamā'ah al-Ḥayriyyah li-Taḥfīz al-Qur'ān al-Karīm, 1411/1991), second printing 1421/2001 = ed. Sa'īd Šāliḥ Za'imah (Alexandria: Dār Ibn Ḥaldūn and Beirut: Dār al-Kutub al-'Ilmiyyah, 1422/2001). Consult further the references in Pretzl, "Wissenschaft," 30–31 №A.2.16; Bergsträßer and Pretzl, *GdQ*, 3.223/561n125, where the translated text confusingly claims that this work was "modelled on the *Taysīr*"; Ibn al-Ġazarī, *Našr*, 3201–2 (§ fihris asmā' al-kutub), mentioned 141 times; Ḥamdān, *Adab*, 458–60 №330 = *MM*, 121n1; and Walad Ubbāh, *Tārīḥ al-qirā'āt*, 160–74. For the place of its composition see al-Ḍahabī, *Ta'rīḥ al-Islām wa-wafayāt al-mašāhīr wa-l-a'lām*, ed. Baššār 'Awwād Ma'rūf, 15 vols. + Indices (Beirut: Dār al-Ġarb al-Islāmī, 1424/2003), 10.31 (§ Muḥammad b. Aḥmad b. 'Alī Abū 'Abd Allāh b. Abī Sa'd al-Qazwīnī).

³²⁵Abū Bakr Aḥmad b. 'Ubayd Allāh b. Idrīs, *al-Kitāb al-Muḥtār fī ma'ānī qirā'āt ahl al-amṣār*, ed. 'Abd al-'Azīz b. Ḥamīd b. Muḥammad al-Ġaḥī? (Riyadh: Maktabat al-Ruṣḍ, 1428/2007). Consult further the references in Pretzl, "Wissenschaft," 31–32 №A.2.17.

³²⁶al-Ḍahabī, *MQK*, 2.717. Consult further the references in Bergsträßer and Pretzl, *GdQ*, 3.217/556n80; and Ḥamdān, *Adab* 468 №337 = *MM*, 125n4.

³²⁷Ibn al-Ġazarī, *GN*, 1.529, 2.387 (§ Ya'qūb b. Ishāq al-Ḥaḍramī al-Baṣrī) = *Našr*, 2711 (§ 4485), referring to this work as "*kitāb mūğaz fī al-qirā'āt al-mutammam bi-qirā'at Ya'qūb*"; elsewhere (2813 § 4651), he refers to it as "*kitāb marsūm bi-iḥṭilāf al-qurrā' al-ṭamāniyah*." Consult further the references in Pretzl, "Die Wissenschaften der Koranlesung," 233 №41, noting that another work on the 7+1 Readings, the *Muwaḍḍiḥ* (> *al-mūḍiḥ*) of Ibn Abī Maryam al-Fārisī [= B.2.25], names al-Sa'īdī as a precedent for writing a work on this set of Readings; and Ḥamdān, *Adab*, 474–76 №341 = *MM*, 129n3.

³²⁸Abū 'Amr al-Dānī, *Mufradat Ya'qūb*, ed. Ḥātim Šāliḥ al-Dāmin (Dammām, KSA: Dār Ibn al-Ġawzī, 1429/2008) = ed. Ḥusayn b. Muḥammad al-Awāğī (Riyadh: Kunūz Išbīliyyā, 1429/2008). Consult further the references in Ibn al-Ġazarī, *Našr*, 249 (§ 200); Pretzl, "Wissenschaft," 45–46 №A.4.34; Bergsträßer and Pretzl, *GdQ*, 3.224/561n121; and Ḥamdān, *MM*, 156n3.

³²⁹Abū 'Alī al-Ahwāzī, *Al-Wağiz fī šarḥ qirā'āt al-qara'ah al-ṭamāniyah a'immat al-amṣār al-ḥamsah*, ed. Durayd Ḥasan Aḥmad and reviewed by Baššār 'Awwād Ma'rūf (Beirut: Dār al-Ġarb al-Islāmī, 2002). Consult further the references in Ibn al-Ġazarī, *Našr*, 3231 (§ fihris asma' al-kutub), mentioned 18 times; and Pretzl, "Wissenschaft," 32 №A.2.18.

³³⁰Ibn Ḥazm, "al-Qirā'āt al-mašhūrah fī al-amṣār al-ātiyah mağī' al-tawātur," in *Ġawāmi' al-sīrah wa-ḥams rasā'il uḥrā*, ed. Ihsān 'Abbās and Našir al-Dīn al-Asad (Cairo: Dār al-Ma'ārif, 1390/1970), 269–71. Consult further the references in José Miguel Puerta Vilchez, "Inventory of Ibn Ḥazm's Works," in *Ibn Ḥazm of Cordoba: The Life and Works of a Controversial Thinker*, eds. Camilla Adang, Maribel Fierro, and Sabine Schmidtke, Handbook of Oriental Studies. Section 1 – The Near and Middle East 103 (Leiden: Brill, 2013), 681–760, at 734 №98.

³³¹Muḥammad b. Šurayḥ al-Ru'aynī, *Taghrīd al-iḥṭilāf bayna Ya'qūb al-Ḥaḍramī fī riwāyatay Ruways wa-Rawḥ 'anhu wa-bayna Nāfi' fī riwāyat Warṣ' 'anhu*, ed. 'Atīyyah Abū Zayd Maḥğūb al-Kiškī (Riyadh: Maṭbu'āt Ġāmi'at Mālik al-Sa'ūd, 1431/2010). Ibn Ḥayr (*Fahrasah* 38/68 №52) gives the title as "*K. Tawğīḥ ḥurūf qara'a bihā Ya'qūb b. Ishāq al-Ḥaḍramī lam yaqra' bihā aḥad min al-a'immaḥ al-sab'ah al-mašhūrīn*." Consult further the references in Bergsträßer and Pretzl, *GdQ*, 3.224/561n122; and Ḥamdān, *MM*, 179n2.

№	Title	Status	Author	Region
17	<i>K. al-Talḥīs fī al-qirā'āt al-ṭamān</i>	Published ³³²	Abū Ma'šar 'Abd al-Karīm b. 'Abd al-Šamad al-Ṭabarī (d. 478)	Mašriq

³³²Abū Ma'šar al-Ṭabarī, *K. al-Talḥīs al-qirā'āt al-ṭamān*, ed. Muḥammad Ḥasan 'Aqīl Mūsā (Cairo: Maktabat al-Taw'iyah al-Islāmiyyah and Jeddah: al-Ġamā'ah al-Ḥayriyyah li-Taḥfīz al-Qur'ān al-Karīm, 1412/1992), second printing 1422/2001. Consult further the references in Ibn al-Ġazarī, *Naṣr*, 3202–3 (§ fihris asmā' al-kutub), mentioned 76 times; Bergsträßer and Pretzl, *GdQ*, 3.224/562n128; Ḥamdān, *MM*, 180n1; and Walad Ubbāh, *Tārīḥ al-qirā'āt*, 176–84. The technique of this work is described as “to lump together readings peculiar to various [geographic] centres,” in Christopher Melchert, “The Relation of the Ten Readings to One Another,” *Journal of Qur'anic Studies* 10, no. 2 (2008):73–87, at 73.

³³³al-Ḍahabī, *MQK*, 2.849; and Ibn al-Ġazarī, *ĠN*, 1.125. Consult further the references in Ḥamdān, *MM*, 185n3.

³³⁴al-Ḍahabī, *MQK*, 2.861. Consult further the references in Ḥamdān, *MM*, 189n2.

³³⁵Consult the references in Ḥamdān, *MM*, 198n2.

³³⁶Ibn al-Faḥḥām, *Mufradat Ya'qūb*, ed. Iḥāb Aḥmad Fikrī and Ḥālid Ḥasan Abū al-Ġūd (Riyadh: Dār Aḍwā' al-Salaf, 2007) = 'Ammār Amīn Muḥammad Daddū, “Mufradat Ya'qūb,” *Mağallat al-Buḥūt wa-l-Dirāsāt al-Qur'āniyyah* (KSA) 5, no. 3 (1429/2008):175–314. Consult further the references in Ibn al-Ġazarī, *Naṣr*, 3228 (§ fihris asmā' al-kutub), mentioned 6 times; Pretzl, “Wissenschaft,” 46 №A.4.35; Bergsträßer and Pretzl, *GdQ*, 3.224/561n123; and Ḥamdān, *MM*, 197n1, listing the work only as extant in manuscript.

³³⁷Ibn Ḥayr al-Iṣbīlī, *Fahrasah*, 35/65 №48. Consult further the references in Ḥamdān, *MM*, 202n4.

³³⁸Ġānim Qadūrī al-Ḥamad, “*al-Ġam' wa-l-tawḡīḥ li-mā inḡarada bi-qirā'atihī Ya'qūb b. Ishāq al-Ḥaḍramī al-Baṣrī* li-Abī al-Ḥasan Šurayḥ b. Muḥammad al-Ru'aynī,” *Mağallat al-Mawrid* (Baghdad) 17, no. 4 (1408/1988):251–91. This composition likely formed part of a larger work entitled ‘*al-Mufradāt*’ attributed to both Muḥammad b. Šurayḥ and his son Šurayḥ (d. 539/1144), as in Abū 'Abd Allāh Ibn Ġāzī, *Fihris Ibn Ġāzī*, ed. Muḥammad al-Zāhī (Tunis: Dār Bū Salāmah li-l-Tibā'ah wa-l-Naṣr, N.D.), 93 (§ *al-Mufradāt li-Abī 'Abd Allāh b. Šurayḥ wa-ibnuhū Abī al-Ḥasan Šurayḥ*). Consult further the references in Ḥamdān, *MM*, 222n1.

³³⁹Ibn Abī Mušayrah al-Ḥaḍramī, *al-Mufīd fī al-qirā'āt al-ṭamān*, ed. Muḥammad Aḥmad Yūsuf al-Šumātī (Riyadh: Maktabat Ibn 'Abbās, 1431/2010). Consult further the references in Ibn al-Ġazarī, *Naṣr*, 3228 (§ fihris asmā' al-kutub), mentioned 8 times; Pretzl, “Wissenschaft,” 34–35 №A.2.20, referring to it as ‘*kitāb mufīdat al-qirā'ah*’; and Ḥamdān, *MM*, 213n5.

³⁴⁰Abū 'Abd Allāh Ibn Abī Maryam, *K. al-Muwaddiḥ fī wuḡūḥ al-qirā'āt wa-'ilalihā*, ed. 'Umar Ḥamdān al-Kubaysī, 3 vols. (Jeddah: al-Ġamā'ah al-Ḥayriyyah li-Taḥfīz al-Qur'ān al-Karīm, 1414/1993). A citation from a work by al-Sa'īdī [= B.2.12] occurs on *ibid.*, 1.102. Paratextual information from the manuscript records the date of its composition as 551/1156, and the date of copying as 557/1162, still within the life of the author. Consult further the references in Pretzl, “Wissenschaft,” 32–34 №A.2.19, referring to it as ‘*kitāb al-mūdiḥ*’; Bergsträßer and Pretzl, *GdQ*, 3.221/559n100,

mistakenly listing it as a work on the Seven Readings; and Ḥamdān, *MM*, 217n2.

³⁴¹ al-Dahabī, *MQK*, 3.1338. Consult further the references in Ḥamdān, *MM*, 241n1.

³⁴² Ibn al-Ġazarī, *ĠN*, 1.356 = *Našr*, 351 (§ 359). Consult further the references in Ḥamdān, *MM*, 241n3.

³⁴³ On Ibn Mihrān's publication of multiple *mufradāt*, consult the references in Ḥamdān, *Adab*, 406–7 №286 (Abū Ġa'far al-Madanī), recording instances where this work is referred to as '*kitāb qirā'ah*' or '*mufrad*'; 407 №289 (Ya'qūb al-Ḥaḍramī); 408 №291 (Ḥafṣ); 409 №294–95 (*ḥurūf* Nāfi'); and 409 №296 (Ḥamzah). Some sources additionally treat Ibn Mihrān's *iḥtiyār Ḥalaf* [b. *Hišām al-Bazzāz*] as a separable item; on its content and reception consult Abū Bakr Ibn Mihrān, *K. al-Mabsūṭ fī al-qirā'āt al-'ašr*, ed. Subay' Ḥamzah Ḥākimī (Damascus: Mağma' al-Luġah al-'Arabiyyah, 1401/1981), 110; Ibn al-Ġazarī, *Našr*, 3223 (§ fihris asmā' al-kutub), mentioned 6 times, with 3198 (§ fihris asmā' al-kutub) sometimes giving the title as '*al-Basūṭ*'; and Ḥamdān, *Adab*, 404 №281.

³⁴⁴ Abū Bakr Ibn Mihrān, *al-Ġāyah fī al-qirā'āt al-'ašr wa-yalīhi bāb fī al-isti'ādah wa-l-tasmiyah wa-'imālāt Qutaybah 'an al-Kisā'ī*, ed. Muḥammad Ḡayyāt al-Ġunbāz? (Riyadh: Dār al-Šawwāf, 1405/1985), second printing 1411/1990 = *K. al-Ġāyah fī al-qirā'āt al-'ašr wa-iḥtiyār Abī Ḥatīm al-Siġistānī*, ed. Ġamāl al-Dīn Muḥammad Šaraf (Taṭā, Egypt: Dār al-Šaḥābah li-l-Turāt, 1423/2003) = ed. Aḥmad Farīd al-Mizyadī (Beirut: Dār al-Kutub al-'Ilmiyyah, 1428/2007). The discrepancy in the number of Readings referred to in the title (10) and the number given in this survey refers to the inclusion of the *iḥtiyār* of Abū Ḥatīm al-Siġistānī (d. ca. 255/869). Consult further the references in Ibn al-Ġazarī, *Našr*, 3215 (§ fihris asmā' al-kutub), mentioned 47 times; Bergsträßer and Pretzl, *GdQ*, 3.225/562n130; and Ḥamdān, *Adab*, 401–2 №278 = *MM*, 113n4, and 114n1.

³⁴⁵ Abū Bakr Ibn Mihrān, *al-Mabsūṭ fī al-qirā'āt al-'ašr*, ed. Subay' Ḥamzah Ḥākimī (Damascus: Mağma' al-Luġah al-'Arabiyyah, 1401/1981), reprint Beirut: Mu'assasat 'Ulūm al-Qur'ān and Jeddah: Dār al-Qiblah, 1408/1988 = ed. Ġamāl al-Dīn Muḥammad Šaraf (Taṭā, Egypt: Dār al-Šaḥābah li-l-Turāt, 1425/2004), second printing 1427/2006. Consult further the references in Ḥamdān, *Adab*, 408–9 №293.

³⁴⁶ Ibn al-Ġazarī, *ĠN*, 1.49 = *Našr*, 187 (§ 105). Consult further the references in Ḥamdān, *Adab* 399–400 №276 = *MM*, 114n1.

³⁴⁷ al-Asad, *al-Fihrist al-sāmil*, 1.127 №38, reports a manuscript for this work, copied 416/1025?. It is also mentioned in Ibn al-Ġazarī, *ĠN*, 1.579. Consult further the references in Ḥamdān, *Adab*, 402 №1 = *MM*, 122n5.

³⁴⁸ Ibn al-Ġazarī, *ĠN*, 1.579. Consult further the references in Ḥamdān, *MM*, 123n2.

³⁴⁹ Abū al-Faḍl al-Ḥuzā'ī, *al-Muntahā fīhi ḥams 'ašarat qirā'ah*, ed. 'Abd al-Raḥīm al-Taḥhūnī (Cairo: Dār al-Ḥadīṭ, 2009) = ed. Muḥammad Šafā' at Rabbānī, 2 vols. (Riyadh: Muğamma' al-Malik Fahd, 2013). Consult further the references in Ibn al-Ġazarī, *Našr*, 3228 (§ fihris asmā' al-kutub), mentioned 8 times; and Ḥamdān, *MM*, 128n1.

³⁵⁰ Ibn al-Ġazarī, *ĠN*, 1.257. Consult further the references in Ḥamdān, *MM*, 123n2.

№	Title	Status	Author	Region
9	<i>K. al-Wāḍiḥ fī al-qirā'āt al-'ašr</i>	Lost ³⁵¹	Abū al-Ḥusayn Aḥmad b. Riḍwān al-Ṣaydalānī (d. 423)	Mašriq
10	<i>Šarḥ</i> 'K. al-Ġāyah li-Ibn Mihrān' [B.3.2] (composed 413)	Partially extant ³⁵²	Abū al-Ḥasan 'Alī b. Muḥammad Quhunduzī (d. 427)	Mašriq
11	<i>al-Rawḍah fī al-qirā'āt al-'ašr</i>	Lost ³⁵³	Abū 'Umar Aḥmad b. Muḥammad al-Ṭalamankī (d. 429)	Mağrib + Mašriq
12	<i>al-Rawḍah fī al-qirā'āt al-iḥdā 'ašr</i> (11 Readings)	Published ³⁵⁴	Abū 'Alī al-Ḥasan b. Muḥammad b. Ibrāhīm al-Mālikī (d. 438)	Mašriq
13	<i>K. al-Iqnā'</i> (23 Readings)	Partially extant ³⁵⁵	Abū 'Alī al-Ḥasan b. 'Alī al-Ahwāzī (d. 446)	Mašriq
14	<i>mufradat</i> Zayd b. 'Alī (d. 122/740)	Lost ³⁵⁶		
15	<i>Maḥārīd al-'ašarah bi-'ilaliḥā</i>	Partially extant ³⁵⁷		
16	<i>K. al-Taḍkār fī al-qirā'āt al-'ašr</i>	Lost ³⁵⁸	Abū al-Faṭḥ 'Abd al-Wāḥid b. al-Ḥusayn Ibn Šitā (d. 445 or 450)	Mašriq

³⁵¹ al-Ḍahabī, *MQK*, 2.735; Sirāğ al-Dīn al-Qazwīnī, *Mašyahah*, 135 №15, giving the title as “*al-Wāḍiḥ fī iḥtilāf al-qurrā' al-'ašarah*”; and Ibn al-Ġazarī, *ĠN*, 1.54, 1.392. Consult further the references in Ḥamdān, *MM*, 135n3.

³⁵² A partial manuscript of this work is reported in Pretzl, “Wissenschaft,” 29–30 №A.1.14; and al-Asad, *al-Fihrist al-šāmil*, 1.127 №37. See further the reference to al-Wāḥidī's (d. 468/1076) receipt of an *iğāzah* to transmit this text from al-Quhunduzī himself in Walid Saleh, “The Introduction to al-Wāḥidī's *al-Basīṭ*: An Edition, Translation and Commentary,” in *Aims, Methods and Contexts of Qur'ānic Exegesis (2nd/8th–9th/15th c.)*, ed. Karen Bauer (Oxford: OUP in association with the Institute of Ismaili Studies, 2013), 67–100, at 80.

³⁵³ al-Ḍahabī, *MQK*, 3.1210; Ibn al-Ġazarī, *ĠN*, 1.119–20 = *Našr*, 3210 (§ fihris asmā' al-kutub), mentioned 4 times; and Kātip Çelebī, *Sullam al-wuṣūl*, 2.218.

³⁵⁴ Abū 'Alī al-Mālikī, *K. al-Rawḍah fī al-qirā'āt al-iḥdā 'ašarah*, ed. Muṣṭafā 'Adnān Muḥammad Salmān, 2 vols. (Medina: Maktabat al-'Ulūm wa-l-Ḥikam, 2004) = *K. al-Rawḍah fī al-qirā'āt al-iḥdā 'ašarah wa-hiya qirā'at al-'ašarah al-mašhūrah wa-qirā'at al-A 'maš*, ed. 'Abd al-Raḥīm al-Ṭarḥūnī (Beirut: Dār al-Kutub al-'Ilmiyyah, 1433/2012). Consult further the references in Ibn al-Ġazarī, *Našr*, 3210–11 (§ fihris asmā' al-kutub), mentioned 73 times; Pretzl, “Wissenschaft,” 40–41 №A.3.29; Bergsträßer and Pretzl, *GdQ*, 3.226/564n148; and Ḥamdān, *MM*, 140n4.

³⁵⁵ The fragmentary text was published as Abū 'Alī al-Ahwāzī, “*Qit'ah min* 'K. al-Iqnā',” in 'Umar Ḥamdān, *al-Ahwāzī wa-ḡuhūduḥū fī 'ulūm al-qirā'āt wa-ma'a-hū qit'ah min* 'K. al-Iqnā'” *wa-qit'ah min* 'K. al-Tafarrud wa-l-ittifāq' li-l-Ahwāzī (Amman: al-Maktab al-Islāmī and Beirut: Mu'assasat al-Rayyān, 1430/2009), 177–264. Consult further the references in Ibn al-Ġazarī, *Našr*, 3197 (§ fihris asmā' al-kutub), mentioned 2 times; Bergsträßer and Pretzl, *GdQ*, 3.158/505n2, 3.208/548–49n35; and Ḥamdān, *MM*, 159n3.

³⁵⁶ Consult the references in Ḥamdān, *al-Imām Abū 'Alī al-Ahwāzī*, 145–46, referring to it as ‘*al-Nayyir al-ḡalī fī qirā'at Zayd b. 'Alī*’; Arthur Jefferey, “The Qur'ān Readings of Zaid b. 'Alī,” *Rivista degli Studi Orientali* 16 (1936):248–89; and idem, “Further Qur'ān Readings of Zaid b. 'Alī,” *Rivista degli Studi Orientali* 18 (1940):219–36.

³⁵⁷ Ibn al-Ġazarī, *ĠN*, 1.320. It is possible that the *mufradah* of Zayd b. 'Alī, referred to in the previous note, also formed part of this work. More certainly, two of the *mufradāt* from this collection, relating to al-Ḥasan al-Baṣrī (d. ca. 110/728) and Ibn Muḥayṣin al-Makkī (d. 123/740), have been published. For the text of al-Ḥasan al-Baṣrī's Reading, see al-Ahwāzī, *Mufradat al-Ḥasan al-Baṣrī*, ed. 'Umar Ḥamdān (Amman: Dār Ibn Kaṭīr and al-Maktab al-Islāmī, 1427/2006) = 'Ammār Amīn Muḥammad al-Daddū, “*Ḍikr mā ḥālaḥ biḥī al-Ḥasan al-Baṣrī Abā 'Amr b. al-'Alā' ḡayr mā ittafaqa 'alay-hi wa-mā lā ḥilāf fī-h*,” *Dirāsah wa-taḥqīq*,” *Mağallat al-Buḥūt wa-l-Dirāsāt al-Qur'āniyyah* 1, no. 2 (1427/2006): 167–301, reprint Beirut: Dār Ibn Ḥazm, 1427/2006 = ed. Muḥammad 'Īd Muḥammad al-Ša'bānī (Ṭantā, Egypt: Dār al-Šahābah li-l-Turāt, N.D.). For the text of Ibn Muḥayṣin's Reading, see 'Ammār Amīn Muḥammad al-Daddū, “*Mufradat Ibn Muḥaysan al-Makkī: Ḍikr mā inḥarada biḥī Ibn Muḥayṣin muḥālīfan Abā 'Amr b. al-'Alā' ḡayr mā ittafaqa 'alayhi wa-ḡayr mā lā ḥilāf fī-h*,” *Mağallat al-Aḥmadiyyah li-Dār al-Buḥūt wa-l-Dirāsāt al-Qur'āniyyah* (?) 22 (1427/2006):71–170, reprint Beirut: Dār Ibn Ḥazm, 1437/2016. Consult further the references in Bergsträßer and Pretzl, *GdQ*, 3.230/566; and Ḥamdān, *MM*, 163–64, listing citations of additional *mufradaḥs* for each of Abū 'Amr, Ḥamzah, 'Āṣim, and al-Kisā'ī.

³⁵⁸ al-Ḍahabī, *MQK*, 2.791; Sirāğ al-Dīn al-Qazwīnī, *Mašyahah*, 131 №11; and Ibn al-Ġazarī, *ĠN*, 1.473 = *Našr*, 3201 (§ fihris asmā' al-kutub), mentioned 33 times. Consult further the references in Ḥamdān, *MM*, 158n2.

³⁵⁹The full text of this work has not been published in a single edition, but is available across a number of theses and dissertations in Arabic. The beginning of the text up through the end of Sūrah al-Nūr (Q 24) was published as Aḥmad 'Adnān Yāsīn al-Zu'bī, "*Kitāb al-Išārah bi-laṭīf al-'ibārah fī al-qirā'āt al-ma'tūrāt bi-l-riwāyah al-mašhūrāt* li-l-imām Abī Naṣr Maṣṣūr b. Aḥmad al-'Irāqī al-mutawaffī fī ḥudūd sanati 450 hiğrī: Dirāṣah wa-taḥqīq min awwal al-kitāb ilā Sūrah al-Nūr [Q 24]," M.A. Thesis supervised by Aḥmad 'Alī al-Imām (Taybah, KSA: Dār al-Taybah al-Ḥaḍrā', 1441/2020?). A subsection of this material was also published in Aḥmad b. 'Abd Allāh b. Muḥsin al-Farīğ, "*Kitāb al-Išārah bi-laṭīf al-'ibārah fī al-qirā'āt al-ma'tūrāt*," Dirāṣah wa-taḥqīq min awwal Sūrah al-A'rāf [Q 6] ilā āḥir Sūrah al-Nūr [Q 24]," Ph.D. Dissertation supervised by Muṣṭafā b. Muḥammad b. Maḥmūd Abū Ṭālib (Mecca: Ġāmi'at Umm al-Qurā, 1426/2005). The contents from Sūrah al-Furqān (Q 25) until the end of the text were published as Maḥdī b. 'Abd Allāh Qārī Muḥammad Ṣiddīq, "*Kitāb al-Išārah bi-laṭīf al-'ibārah fī al-qirā'āt al-ma'tūrāt* li-l-imām Abī Naṣr Maṣṣūr b. Muḥammad al-'Irāqī al-mutawaffī fī ḥudūd sanati 450 hiğrī: Dirāṣah wa-taḥqīq min awwal Sūrah al-Furqān [Q 25] ilā nihāyat al-kitāb," Ph.D. Dissertation supervised by Muṣṭafā b. Muḥammad b. Maḥmūd Abū Ṭālib (Mecca: Ġāmi'at Umm al-Qurā, 1428/2007). Consult further the references in Ibn al-Ġazarī, *Naṣr*, 3196 (§ fihris asmā' al-kutub), mentioned 3 times; Pretzl, "Wissenschaft," 35 №A.3.21; Bergsträßer and Pretzl, *GdQ*, 3.225/562n133; and Ḥamdān, *MM*, 166n2.

³⁶⁰'Abd al-Raḥmān b. Muḥammad al-'Ubaysī?, "*al-Ġāmi' fī al-qirā'āt al-'ašr wa-qirā'at al-A'maš* li-Abī al-Ḥasan 'Alī b. Muḥammad al-Ḥayyāt dirāṣatan wa-taḥqīqan," Ph.D. Dissertation supervised by Muṣṭafā Muḥammad Maḥmūd Abū Ṭālib, 2 vols. (Mecca: Ġāmi'at Umm al-Qurā, 1434/2013) = *al-Ġāmi' fī al-qirā'āt al-'ašr wa-qirā'at al-A'maš*, ed. Ḥālid Ḥasan Abū al-Ġūd (Beirut: Dār Ibn Ḥazm, 1437/2016). Consult further the references in Ibn al-Ġazarī, *Naṣr*, 2307–8 (§ fihris asmā' al-kutub), mentioned 77 times; and Ḥamdān, *MM*, 165n4.

³⁶¹Ibn Fāris al-Ḥayyāt, *al-Tabṣīrah fī qirā'āt al-a'immah al-'ašarah*, ed. Riḥāb Muḥammad Mufid Ṣīqaqī, *Silsilat al-Ruṣd li-l-Rasā'il al-Ġāma'iyyah* 189 (Riyadh: Maktabat al-Ruṣd, 1428/2007).

³⁶²Ibn al-Ġazarī, *GN*, 1.280. Consult further the references in Ḥamdān, *MM*, 167n3.

³⁶³Ibn al-Ġazarī, *GN*, 2.337–38, stating the location of its composition and subsequent transmission = *Naṣr*, 3208 (§ fihris asmā' al-kutub), mentioned 17 times. Consult further the references in Pretzl, "Wissenschaft," 35–36 №A.3.22; Bergsträßer and Pretzl, *GdQ*, 3.225/562n138; and Ḥamdān, *MM*, 172n3.

³⁶⁴Abū al-Qāsim al-Ḥudālī, *K. al-Kāmil fī al-qirā'āt al-'ašr wa-l-arba'in al-zā'idah 'alayhā*, ed. Amāl b. al-Sayyid al-Rifā'ī Ṣāyib (Cairo: Mu'assasat al-Samā, 2007) = ed. Abū Ibrāhīm 'Amr b. 'Abd Allāh (Riyadh: Dār Samā, 1435/2014) = ed. 'Umar Ḥamdān and Tağrīd Ḥamdān, 7 vols. (Beirut: Dār Ibn Ḥazm, 1436/2015) = ed. Ḥālid Ḥasan Abū al-Ġūd, 4 vols. (Cairo: Dār 'Ibād al-Raḥmān, 2016). *Sirāğ al-Dīn al-Qazwīnī, Mašyaḥah*, 123 №4 gives the title as '*al-Kāmil al-muḥkam 'alā kuttāb (?) ahl al-'ašr fī al-qirā'āt*'. Consult further the references in Ibn al-Ġazarī, *Naṣr*, 33219–20 (§ fihris asmā' al-kutub), mentioned 176 times; and Ḥamdān, *MM*, 174n1. For the relation to Abū Naṣr al-'Irāqī's *al-Išārah* [= B.3.17], see Ibn al-Ġazarī, *Naṣr*, 334 (§ 332).

wa-tahqīq,” Ph.D. dissertation supervised by Ġānim Qaddūrī al-Ḥamad (Takrit, Iraq: Ġāmi‘at Tikrīt, 1423/2002) = Abū ‘Abd Allāh al-Andarābī, *K. al-Īdāh fī al-qirā‘āt*, ed. Ḥalīd Ḥasan Abū al-Ġūd, 5 vols. (Jeddah: Dār al-Awrāq al-Ṭāqafīyah, 2019), reprint Manšūrah, Egypt: Dār al-Lu‘lu‘ah, 1422/2021. For an overview of the work, especially the relation to Ibn Mihrān’s *K. al-Ġāyah* [= B.3.3], see Aḥmad Nuṣayyif Ġāsim al-Ġanābī, “*al-Īdāh fī al-qirā‘āt* li-l-Andarābī,” *Mağallat Ma‘had al-Maḥṭūṭāt al-‘Arabīyah* (Kuwait) 29, no. 1 (1985 / 1405):219–52; Muḥammad Riḍā Raḥmatī, “Andarābī wa-‘Kitāb al-Īdāh fī al-qirā‘āt’: Matn-i kohan az Karrāmiyyān-i Ḥurāsān,” *Āyneh-ye Mirāt* 27 (2004): 18–68; Tayyar Altukulaç, “al-Īzāh,” *TDVİA*; and Travis Zadeh, *The Vernacular Qur’an: Translation and the Rise of Persian Exegesis*, Qur’anic Studies Series Vol. 7 (Oxford: Oxford University Press, 2012), 493–95. Consult further the references in Ḥamdān, *Adab* 403 №4, referring to it as “*šarḥu šadri ‘al-Ġāyah’ wā-āḥiruhā min al-masā‘il fī aṭnā‘ihā*” = *MM*, 192n2.

³⁶⁶Abū Ma‘šar al-Ṭabarī, *Ġāmi‘ Abī Ma‘šar al-mašhūr bi-ism ‘Sawq al-‘arūs’*, ed. Ḥalīd Ḥasan Abū al-Ġūd, 5 vols. (Manšūrah, Egypt: Dār al-Lu‘lu‘ah, 1422/2021). Consult further the references in Ibn al-Ġazarī, *Našr*, 3211 (§ fihris asmā’ al-kutub), mentioned 5 times; Pretzl, “Wissenschaft,” 45 №A.3.32, referring to the title of this work, following the Berlin manuscript, as “*sūq al-‘arūs*”; and Ḥamdān, *MM*, 181n1.

³⁶⁷al-Ḍahabī, *MQK*, 2.898; and Ibn al-Ġazarī, *ĠN*, 2.214. Consult further the references in Ḥamdān, *MM*, 185n5.

³⁶⁸Abū Bakr al-Rūḍbārī, *Ġāmi‘ al-qirā‘āt*, ed. Hannān bt. ‘Abd al-Karīm b. Muḥammad al-Anazī, 3 vols. (Medina: Ġāmi‘at Ṭaybah, 1438/2017). Consult further the references in Ḥamdān, *MM*, 190n2.

³⁶⁹Aḥmad Ṭāhir Uways, “*K. al-Mustanīr fī al-qirā‘āt al-‘ašr*: Taḥqīq wa-dirāsah,” Ph.D. Dissertation supervised by Muḥammad Sālim Muḥaysin (Medina: al-Ġāmi‘ah al-Islāmiyyah bi-l-Madīnah al-Munawwarah, 1413/1993) = ed. Ġamāl al-Dīn Muḥammad Šaraf (Ṭanṭā, Egypt: Dār al-Šahābah li-l-Turāt, 1422/2002) = ed. ‘Ammār Muḥammad Amīn al-Daddū, 2 vols. (Dubai: Dār al-Buḥūt li-l-Dirāsāt al-Islāmiyyah wa-l-ḥyā’ al-Turāt, 1425/2005) = ed. ‘Uṭmān Maḥmūd Ġazāl (Beirut: Dār al-Kutub al-‘Ilmiyyah, 1431/2010). Consult further the references in Pretzl, “Wissenschaft,” 36–37 №A.3.23; Bergsträßer and Pretzl, *GdQ*, 3.225/563n142, suggesting a dependency on *al-Ibānah ‘an ma‘ānī al-qirā‘āt* by Makkī b. Abī Ṭālib [= A.2.5]; and Ḥamdān, *MM*, 186n1.

³⁷⁰Abū Ismā‘īl al-Mu‘addil, *al-Ġāmi‘ li-l-adā‘* (= *K. Rawḍat al-ḥuffāz aw-Rawḍat al-Mu‘addil*), ed. Ḥalīd Ḥasan Abū al-Ġūd, 3 vols. (Beirut: Dār Ibn Ḥazm, 2015). Bergsträßer considered this work to be a forerunner of a later work on 14 Readings, al-Dimyāṭī’s (d. 1117/1705) *Ithāf fuḍalā’ al-bašar fī qirā‘āt al-arba‘at ‘ašr*; see the comments in Ibn Ḥalawayh, *Muḥtaṣar fī šāwāḍḍ al-Qur‘ān min ‘K. al-Badī’ li-Ibn Ḥalawayh* (= *Ibn Ḥalawayh’s Sammlung nichtkanonischer Koranlesarten*), ed. Gotthelf Bergsträßer, Bibliotheca Islamica 7 (Cairo: al-Maṭba‘ah al-Raḥmāniyyah and Leipzig: F.A. Brockhaus, 1353/1934), 6 (§ Editor’s Introduction). Elsewhere, Bergsträßer and Pretzl (*GdQ*, 3.209/549) observe that this work “contains fifteen readings, among whom we find Ḥumayd b. Qays al-A‘raj, Ibn al-Sumayfā [cf. B.3.49], and Ṭalḥah b. Mušarriif al-Ḥamdānī.” Consult further the references in Ibn al-Ġazarī, *Našr*, 3210 (§ fihris asmā’ al-kutub), mentioned 18 times; Pretzl, “Wissenschaft,” 43–44 №A.3.31; and Ḥamdān, *MM*, 191n2.

mufradāt was Muḥammad b. Sumayfa ‘al-Yamānī (d. 113/731). The personal name *smayf* is attested in the Ancient South Arabian onomasticon, as in the inscriptions discussed in Jan Restö, “The Problem of Circumstantial Clause Combining (CCC) in Sabaeen,” in *Clause Combining in Semitic: The Circumstantial Clause and Beyond*, ed. Bo Isaksson and Maria Persson, Abhandlungen für die Kunde des Morgenlandes 96 (Wiesbaden: Harrassowitz, 2015), 297–364, at 336, 338 (§ RÉS 3945), and 349 (§ CIH 541). The vowelizing of this form reflects a contraction of the Ancient South Arabian *isum(u)* (“name”), making the full name a theophoric construction, “May God make [his] name exalted”; I am grateful to Ahmad Al-Jallad for clarifying this point. Compare with the vocalization “Samayfa” in Nasser, *The Second Canonization*, 17, where the given death date (213/827) is also incorrect.

³⁹¹ Sirāḡ al-Dīn al-Qazwīnī, *Mašyahah*, 149 №27, giving the title as “*al-Mufradāt fī al-qirā’āt*”; and Ibn al-Ġazarī, *ĠN*, 2.232. Consult further the references in Ḥamdān, *MM*, 222n3.

³⁹⁵ Ibn al-Ġazarī, *ĠN*, 2.339 = *Naṣr*, 311–12 (§ 295). Consult further the references in Ḥamdān, *MM*, 224n2.

³⁹⁶ al-Asad, *al-Fihris al-šāmil*, 90 №38 reports a manuscript of this work. See further Sirāḡ al-Dīn al-Qazwīnī, *Mašyahah*, 129–30 №8, especially for its record of the extensive transmission history of this work; and Ibn al-Ġazarī, *ĠN*, 2.41 №2656, indicating that the work compresses (*iḥṭaṣara*) a work entitled ‘*al-‘Iršād*’, without specifying the full title or author of the latter work; for the identification of the source text, see the references in Ḥamdān, *MM*, 227n1. al-Rūdānī, *Šilat al-ḥalaf*, 230 gives the author’s name as ‘Abū al-‘Abbās Aḥmad b. Zurayq al-Ḥaddād’.

³⁹⁷ Sirāḡ al-Dīn al-Qazwīnī, *Mašyahah*, 130 №9.

³⁹⁸ al-Asad, *al-Fihris al-šāmil*, 90 №8 reports a manuscript of this work. Ibn al-Ġazarī, *ĠN*, 2.259 describes it as a collection of *mufradāt* taken from the contents of *al-Ġāyah fī al-qirā’āt al-‘ašr* by Ibn Mihrān and arranged as a single book (*iḥṭaṣara* ‘al-Ġāyah’ ‘*alā ʔarīqi mā inʔarada bihī kullu wāḥidin mina l-qurrā’i wa-uḡuma ’ū fī kitāb*). Consult further the references in Ḥamdān, *MM*, 229n6.

³⁹⁹ Ibn al-Ġazarī, *ĠN*, 1.131. Consult further the references in Ḥamdān, *MM*, 240n2.

⁴⁰⁰ Sirāḡ al-Dīn al-Qazwīnī, *Mašyahah*, 145 №23, giving the title as ‘*al-Muğniyah*’; and al-Ḍahabī, *MQK*, 3.1337–38, giving the title as ‘*al-Ġunyah*’. Consult further the references in Ḥamdān, *MM*, 240n3.
